AGENDA ITEM BRIEFING

Submitted by: Michael K. Young, President
Texas A&M University

Subject: Approval to Amend the FY 2020-FY 2024 Texas A&M University System Capital Plan to Add the Railroad Quiet Zone Project (Project No. 2019-07296) for Texas A&M University with an FY 2020 Start Date

Proposed Board Action:

- (1) Amend the approved FY 2020-FY 2024 Texas A&M University System Capital Plan to add the Railroad Quiet Zone Project for Texas A&M University (Texas A&M) with an FY 2020 start date and a total planning amount of \$5,000,000.
- (2) Appropriate \$500,000 for pre-construction services and related project costs.

Funding/Planning Amount:

<u>Funding Source</u>	<u>Planning Amount</u>	<u>Average Estimated Annual Debt Service</u>	<u>Debt Service Source</u>
Cash (Investment Earnings)	<u>\$5,000,000</u>	N/A	N/A
Total Project Cost	<u>\$5,000,000</u>		

Project Justification:

Texas A&M and the cities of Bryan and College Station have experienced tremendous growth over the last several decades. With this growth, quality of life issues such as traffic and noise have become more prominent community issues. Texas A&M now has many large buildings, including residence halls, in proximity to the railroad, with several new buildings under construction or in design. The 21st Century Classroom building, one of the largest classroom buildings in the country, and soon to be the largest classroom building on campus, is adjacent to the Doug Pitcock '49 Texas A&M Hotel and Conference Center & Hotel and the Cain parking garage. These three buildings are across Wellborn Road from the railroad tracks. Similarly, a new undergraduate chemistry building is being designed and is planned for the corner of Olsen and Old Main, adjacent to the tracks. Because these facilities and others near the railroad corridor are so integral to academia and quality of campus life, and train horn noise affects that quality of life, university officials have been exploring options to establish a quiet zone in order to address noise concerns along the Union Pacific Railroad (UPRR) corridor.

Agenda Item No.
Agenda Item Briefing

Additionally, Brazos County, the City of College Station, and the City of Bryan are pursuing quiet zones in their jurisdictions. Texas A&M's efforts will allow for a contiguous quiet zone throughout the community. Texas A&M Transportation Services personnel met with local stakeholders to gather information and concerns, and led the effort to pursue actions necessary to establish a quiet zone along the UPRR corridor.

Establishing a railroad quiet zone is critical to Texas A&M in the realms of public safety, academic excellence and quality of life. The safety of faculty, staff, students and general public is a high-level concern. As there is always a risk of a crash occurring at an at-grade railroad crossing, any efforts that reduce the risk of crashes occurring should be considered. Train horn sound is adversely impacting educational and research activities on campus. It is also adversely impacting the work environment of staff providing support operations to campus and The Texas A&M University System. Finally, train horn sound is adversely impacting the quality of stay for guests at the Texas A&M Hotel and Conference Center. These concerns will only intensify with time as train traffic along the Navasota Subdivision of the UPRR is anticipated to increase from an average of 24 trains per day to nearly 50 trains per day within the next five years. Thus, Texas A&M Transportation Services views the expeditious establishment of a railroad quiet zone to be paramount.

Scope:

Vendor shall offer/propose to provide the necessary services as requested to facilitate the creation of a railroad quiet zone along the Navasota Subdivision of the UPRR near and adjacent to Texas A&M. A specific deliverable is to create the required railroad quiet zone improvements outlined in the Notice of Intent (NOI) as defined by Use of Locomotive Horns at Highway-Rail Grade Crossings; Final Rule (49 CFR Parts 222 and 229). Through a singular application process, the intent of the project is to establish a railroad quiet zone inclusive of the following four crossings for 24 hours a day, all days of the week:

- F&B Road (DOT No. 743209X) (At-Grade)
- Old Main Drive (DOT No. 743211Y)(At-Grade)
- John Kimbrough Drive (DOT No. 745037Y) (At-Grade)
- W. George Bush Drive/FM 2347 (DOT No. 743215B)(At-Grade)

The total length of the project is approximately 1.7 miles. Tracksides improvements of the project incorporates four public at-grade crossings of UPRR along the Navasota Subdivision. There are no cyclist or pedestrian only crossings within the project limits. There is one grade-separated crossing within the project limits. Additional work to enhance the Wellborn Road passageway openings, channelizing pedestrians, wayfinding, landscaping, sidewalk improvements and any other safety measures will be accomplished by traditional university procurement methods as determined by the contract value. Railroad quiet zones are established based on specific measurable criteria established by the Federal Railroad Administration in coordination with the Texas Department of Transportation and UPRR. Each railroad crossing is evaluated and scored based on the established criteria. Typical modifications to the crossings will channelize vehicle and pedestrian travel paths. Some crossings may require the addition of specific safety measures such as wayside horns, a median, median gates and pedestrian improvement. It is important to

Agenda Item No.
Agenda Item Briefing

note that all expenses associated with the design and construction of the improvements are the responsibility of Texas A&M. Also, the future maintenance costs of these improvements are borne by Texas A&M into perpetuity. The trackside improvements are typically performed by contractors that are approved by UPRR. Additional improvements identified to improve pedestrian safety and eliminate rail crossings at Wellborn Road require adjustments to the underground passageway and adjacent property. The intent is to modify the passageway to allow for more inviting access and eliminate at-grade pedestrian crossings along John Kimbrough Boulevard.

Other Major Fiscal Impacts:

None.

Strategic Plan Imperative(s) this Item Advances:

Approval of this agenda item will advance The Texas A&M University System Strategic Imperative 3, by providing faculty and students unmatched and distraction-free educational experiences and experiential opportunities in classrooms and labs. Because at least two state-of-the-art classroom and lab facilities near the railroad corridor are so integral to academia and quality of campus life, and train horn noise can adversely affect that quality of life, creating a Quiet Zone along the UPRR corridor will assist researchers and scientists who need a silent environment.

AGENDA ITEM BRIEFING

Submitted by: Michael K. Young, President
Texas A&M University

Subject: Approval of the Revised Project Scope and Budget, Appropriation for Construction Services, and Re-approval for Construction for the Aerothermochemistry Lab Expansion Project, Texas A&M University, College Station, Texas (SSC Project No. 2017-02079)

Background and Prior Actions:

The Aerothermochemistry Lab Expansion Project was included on the FY 2019 – FY 2023 A&M System Capital Plan and approved by the Board of Regents (board) at the August 2018 meeting. The project scope and current \$5,000,000 budget was approved by the board at the November 2018 meeting and the project was approved for construction. In addition, per System Policy 51.04, *Delegation of Authority on Construction Projects*, Section 4, an additional \$378,000 was appropriated to complete the scope as approved in the November 2018 Minute Order.

Proposed Board Action:

- (1) Approve an \$830,000 increase to the current approved project budget of \$5,000,000 as follows:
 - a. \$378,000 to complete the project scope and finish out second floor space for a laboratory and faculty/research associate office space.
 - b. \$452,000 to design and construct a 1400 square foot Light Detection and Ranging (LIDAR) laboratory onto the East side of the new facility and construct three additional offices in the second floor space.
- (2) Appropriate \$830,000 for construction services and related project costs. \$5,000,000 has been previously appropriated.
- (3) Approve construction of the Aerothermochemistry Lab Expansion Project at Texas A&M University (Texas A&M).

Funding/Budget Amount:

<u>Funding Source</u>	<u>Project Budget</u>	<u>Proposed Adjustment</u>	<u>Proposed Budget</u>	<u>Average Estimated Annual Debt Service</u>	<u>Debt Service Source</u>
Cash – Governor’s University Research Initiative (GURI)	\$2,500,000	\$415,000	\$2,915,000	N/A	N/A
Cash – Chancellor’s Research Initiative (CRI) – AUF	<u>\$2,500,000</u>	<u>\$415,000</u>	<u>\$2,915,000</u>	N/A	N/A
Total Project Funds	<u>\$5,000,000</u>	<u>\$830,000</u>	<u>\$5,830,000</u>		

Justification:

Dr. Richard Miles, Professor of Aerospace Engineering and Texas A&M Engineering Experiment Station (TEES) Eminent Professor, will establish and lead a center in interdisciplinary optical and laser detection systems for national security and safety at Texas A&M. Dr. Miles was recruited as part of the Governor's University Research Initiative (GURI), an effort to bring nationally recognized researchers to Texas institutions of higher education. A new laboratory addition is currently under construction to support the numerous research thrusts overseen by Dr. Miles.

Scope:

Additional funds have been made available due to a re-prioritization of needs associated with Dr. Miles' GURI award. The Governor's Office has approved the requested changes and funds are currently available to build-out the shell space on the second floor of the new Aerothermochemistry facility currently under construction at the Texas A&M wind tunnel complex. The completion of the second floor was included as Alternate #1 in the original construction documents and was part of the original project scope; however, funds were not available for the alternate during the bid. The second floor shell space to be finished out under Alternate #1 includes a laser laboratory plus faculty and research associate office spaces.

The second floor will be the main entry for the National Aerothermodynamics and Hypersonic Laboratory (NAL) that adjoins the new building. The build-out of the second floor is a priority for the completion of the construction and for the utility of the building. The total estimated cost for the second floor build-out is \$378,000.

Additionally, funds are now available to construct an adjacent LIDAR laboratory and three additional offices in the second floor space. The building foundation for this laboratory was designed and constructed as a part of the original building construction. The LIDAR laboratory will be a one-story laboratory with a small roof dome that can be opened, enabling a laser to be fired directly up into the atmosphere for testing of new LIDAR capabilities. In addition to the LIDAR lab, three additional offices will be constructed within the second floor office space in addition to those in the original scope. The total estimated cost for the design and construction of the LIDAR laboratory and three offices is \$452,000.

Other Major Fiscal Impacts:

None.

Strategic Plan Imperative(s) this Item Advances:

Approval of this agenda item will advance the strategic imperative of increasing the A&M System's prominence by further enhancing a robust and targeted research portfolio in hypersonics.

AGENDA ITEM BRIEFING

Submitted by: Michael K. Young, President
Texas A&M University

Subject: Approval of the Project Scope and Budget, Appropriation for Construction Services, and Approval for Construction for the Heldenfels 2nd Floor Renovation Project, Texas A&M University, College Station, Texas (Project No. 2018-3163)

Background and Prior Actions:

The Heldenfels 2nd Floor Renovation Project was included as an approved project on the FY 2020 – FY 2024 A&M System Capital Plan approved by the Board at the August 2019 meeting.

Proposed Board Action:

- (1) Approve the project scope and budget.
- (2) Appropriate \$6,738,075 for construction services and related project costs; \$748,675 has been previously appropriated.
- (3) Approve construction of the Heldenfels 2nd Floor Renovation Project at Texas A&M University (Texas A&M).

Funding/Budget Amount:

<u>Funding Source</u>	<u>Budget Amount</u>	<u>Average Estimated Annual Debt Service</u>	<u>Debt Service Source</u>
Cash – Designated Tuition	<u>\$7,486,750</u>	N/A	N/A
Total Project Funds	<u>\$7,486,750</u>		

Project Justification:

The enrollment growth in foundational courses in the Departments of Chemistry and Biology has made it impossible for the departments to deliver the quality laboratory educational experience that our students need and deserve.

Beginning in the 2014-15 academic year, the Department of Chemistry implemented a decision that negatively impacted the quality of instruction provided to students in the laboratory for first-year chemistry because it lacked sufficient laboratory space to teach laboratory sessions every week. Specifically, in order to accommodate growing enrollments in first-year courses, CHEM 111 was “compressed” to allow two sections to use the lab on alternating weeks throughout the semester. The effects of compression on curricular goals were mitigated by creating online

Agenda Item No.
Agenda Item Briefing

assignments for students to perform in “off weeks,” moving some laboratory experimental work into CHEM 112 and conducting laboratory check-in and check-out days. Nevertheless, student satisfaction with the course has declined.

The Department of Biology laboratories have become increasingly overcrowded; and spaces not designed for biology lab instruction have been pressed into service. The rapid expansion of pre-nursing and other allied health programs, as well as overall enrollment growth at Texas A&M, is driving increased demand for courses in the Department of Biology. Three areas, microbiology, human anatomy and physiology, and zoology are acutely affected, as detailed below.

Microbiology: Enrollment in the Department of Biology’s two undergraduate courses in general microbiology, BIOL 206 for non-majors (predominantly pre-nursing or other allied health majors), and BIOL 351 for biology, microbiology and other life science majors, has risen 40% since the 2009-10 academic year. Several factors, in addition to the general increase in overall enrollment at Texas A&M, are responsible for this increase. However, the rapid expansion of pre-nursing and other allied health programs is driving much of the increased demand for the non-majors course. Current facilities are saturated, and the only way to offer as many seats as were available was to cut the laboratory time in half. While this compression satisfies the minimum requirements, it does not provide an optimal learning experience for students. Moving the labs from their current location in the middle of the research areas to the 2nd floor of Heldenfels will provide more seats and allow a full laboratory experience for students and future health care providers. The project will allow an increase from two microbiology-teaching labs that hold only 20 students at a time to three labs (HELD 204, 205 and 208) that will hold 24 students. These new labs will provide an additional 192 seats each semester and, given the continued expansion of allied health programs, all of these will be needed to accommodate the demand.

Human Anatomy I and II: The two human anatomy and physiology (A&P) courses, BIOL 319 and 320, have also grown to limits of current capacity. Enrollment in these upper-level courses is up 28% since 2009-10. The increase in enrollment since 2013 has only been possible because the Department of Kinesiology allowed the use of HELD 212 as a teaching lab for these A&P courses. The saturation of previous labs prevented many students from taking these courses which delayed entry into upper-level courses and graduation. Saturation of this additional room is rapidly approaching. The room currently holds only 16 students (in space that was not designed to teach biology labs), and the plan is to remodel it to hold 24 students at a time which will accommodate an additional 96 students each semester.

Introductory Zoology: Demand for this course has increased 57% since 2009-10 because of increases in the Department of Health and Kinesiology, whose majors use this course as a pre-requisite for BIOL 319. All 24 seats in this room (HELD 209) will represent new capacity, allowing us to accommodate an additional 288 students per semester.

Financial Justification: When all five biology-teaching labs are renovated, they will accommodate 1,440 students each semester in modern teaching facilities. After this renovation, 567 seats represent new capacity. Each new student will pay approximately \$1,200 tuition for a four-hour course and generate approximately \$356 in subvention (assuming lower-level subvention for all of the new seats). In total, the new capacity has the potential to generate

Agenda Item No.
Agenda Item Briefing

\$1,764,504 per year and pay back the estimated \$3.1 million renovation cost in 1.76 years. If only half of the new seats are filled, the investment will be paid back in about 3.5 years.

Scope:

As a result of some other moves on campus, the Department of Chemistry now has the space to correct the situation and improve first-year chemistry instruction by adopting a more flexible laboratory. This new design will permit the laboratories to serve as places that facilitate teamwork and permit effective recitations.

The project will convert approximately 5,000 square feet of space that was appropriate for clinical lab space for the Department of Kinesiology to do exercise and physiological monitoring to teaching laboratory space for General Chemistry laboratory instruction. The lab space created will have a capacity of 120 students per time slot, adding a capacity of 1,800 students per semester.

In addition, the renovation to five biology-teaching labs will accommodate 1,440 students each semester in modern teaching facilities. The project will move the labs from their current location to the 2nd floor of Heldenfels and restore a full laboratory experience for students and future health care providers.

In total and in summary, the ten chemistry/biology laboratories being created are in every sense a *conversion* from space that had none of the accoutrements necessary for modern chemistry/biology laboratories to labs that are appropriately equipped.

The renovation of space for chemical storage and temporary waste storage will be included, as will some limited office space.

Demolition on this project is scheduled to start in February 2020, with substantial completion scheduled for July 2020. The total project budget is \$7,486,750.

Other Major Fiscal Impacts:

None.

Strategic Plan Imperative(s) this Item Advances:

Approval of this agenda item will advance The Texas A&M University System strategic imperative 1 by increasing Texas A&M's capacity for high quality instruction in chemistry and biology, helping to ensure that all qualified students will have an array of pathways to pursue their ambitions and interests, including careers in pre-nursing and other allied health fields.

AGENDA ITEM BRIEFING

Submitted by: Billy Hamilton, Deputy Chancellor and Chief Financial Officer
The Texas A&M University System

Subject: Approval to Amend the FY 2020-FY 2024 Texas A&M University System Capital Plan to Add the Texas A&M University TMC3 Biomedical Research Building Project (Project No. 23-3320) for Texas A&M University Health Science Center with a Fiscal Year 2020 Start Date

Proposed Board Action:

- (1) Amend the approved FY 2020-FY 2024 Texas A&M University System Capital Plan to add the Texas A&M University (Texas A&M) TMC3 Biomedical Research Building Project for Texas A&M University Health Science Center (TAMHSC) with an FY 2020 start date and a total planning amount of \$109,000,000.
- (2) Appropriate \$10,900,000 for pre-construction services and related project costs, including development of both the Program of Requirements (POR) and project design utilizing a single Architect/Engineering firm. Start of design will be contingent upon the completion of the POR.
- (3) Appropriate \$9,180,000 for construction services and related project costs to pay for the site work associated with Texas A&M's parcel.
- (4) Approve the following exceptions to system policy required by Items 1 through 3 above: a) Add project to the Capital Plan prior to completion of a POR; b) Exceed the maximum amount of appropriations (10%) prior to construction approval for the appropriations for pre-construction and construction services totaling 18.4%; and c) Authorize payment for construction services prior to construction approval.

Funding/Planning Amount:

<u>Funding Source</u>	<u>Planning Amount</u>	<u>Average Estimated Annual Debt Service</u>	<u>Debt Service Source</u>
Permanent University System Debt Proceeds	<u>\$109,000,000</u>	\$7,160,483	Available University Fund
Total Project Cost	<u>\$109,000,000</u>		

Project Justification:

TAMHSC has had a research presence in the Texas Medical Center (TMC) in Houston since 1999 when TAMHSC was formed and the Albert B. Alkek Institute of Biosciences and Technology (IBT) joined as a founding component. The IBT was established in 1983 originally as part of Texas A&M. In addition to offering graduate and postdoctoral education degrees, the IBT provides a bridge between Texas A&M/TAMHSC research investigators and scientists across the TMC, as well as to the growing biotechnology sector in Houston. The IBT is located in the Alkek Building, an 11-story research tower that is at capacity with no room to expand research activities.

Agenda Item No.
Agenda Item Briefing

The TMC3 Campus is a proposed collaborative effort among governmental and charitable research institutions to establish a premier research campus for biomedical innovation and commercialization in Houston. The TMC3 Campus will house and showcase world-class research among its member institutions. The project will optimize the flexible use of capital, reduce operational costs, maximize the potential for research collaboration and cost savings, and create a worldwide market for research talent and private venture capital.

The TMC is providing a 37-acre site for the TMC3 Campus located in the TMC's mid-campus. It is anticipated that the Texas A&M University TMC3 Biomedical Research Building will be located on either Parcel A or B, under a future ground lease from TMC to the A&M System, and will accommodate the institution's unique research, laboratory and ancillary space requirements for pre-clinical, clinical, and translational research.

Due to unique circumstances relating to this project, it is beneficial to add this project to the Capital Plan prior to completion of a POR and to proceed with site work prior to construction approval.

Scope:

The Texas A&M University TMC3 Biomedical Research Building will construct a research building to match the available budget, as determined during the programming phase. In addition to research laboratories and dedicated space for translational research, it will include administrative, faculty, and support staff offices, computer services space, conference and seminar rooms.

Additional project components will include site development and utility extensions, parking, movable furnishings, movable equipment, and audio/visual equipment.

A more definitive project scope and budget will be determined during the pre-construction phase with the development of the POR and design for approval by the Board prior to the construction contract award.

Other Major Fiscal Impacts:

None.

Strategic Plan Imperative(s) this Item Advances:

Approval of this agenda item will advance The Texas A&M University System Strategic Imperative 4, by providing facilities for the institution's unique research, laboratory and ancillary space requirements for pre-clinical, clinical, and translational research.

Members, Board of Regents
The Texas A&M University System

Subject: Approval to Amend the FY 2020-FY 2024 Texas A&M University System Capital Plan to Add the Texas A&M University TMC3 Biomedical Research Building Project (Project No. 23-3320) for Texas A&M University Health Science Center with a Fiscal Year 2020 Start Date

I recommend adoption of the following minute order:

“The request to amend the FY 2020-FY 2024 Texas A&M University System Capital Plan to add the Texas A&M University TMC3 Biomedical Research Building Project for Texas A&M University Health Science Center with an FY 2020 start date and a total planning amount of \$109,000,000 is approved.

The amount of \$10,900,000 is appropriated from Account No. 01-084243, Permanent University Fund Debt Proceeds (AUF), for pre-construction services and related project costs. With the exception of the cost for developing the Program of Requirements (POR), this appropriation is contingent upon the completion of the POR scoped to the approved budget.

The amount of \$9,180,000 is appropriated from Account No. 01-084243, Permanent University Fund Debt Proceeds (AUF), for project costs associated with site infrastructure support of the Texas A&M University TMC3 Biomedical Research Building site by the TMC3 collaborative project. This appropriation is not contingent upon the development of the POR.

The Board of Regents of The Texas A&M University System (Board) reasonably expects to incur debt in one or more obligations for this project, and all or a portion of the proceeds received from the sale of such obligations is reasonably expected to be used to reimburse the account(s) for amounts previously appropriated and/or expended from such account(s).”

Background Information:

Per S.B. 11, the campus concealed carry bill signed by Governor Abbott on June 13, 2015, each member submitted its campus carry rule to the Board of Regents for review at its April 27, 2016 meeting. In accordance with the applicable statute, the Board reviewed the rules and took no action to make any amendments. The system universities and agencies proceeded to implement their campus carry rules as originally submitted on August 1, 2016, the effective date of this legislation.

As part of the September 1, 2019 transition of the Texas Division of Emergency Management (TDEM) into The Texas A&M University System as a member agency, Chief Nim Kidd, following consultation with TDEM's employees in accordance with the Act, recommends its initial concealed carry rule for review at the Board's February 6, 2020 meeting.

Annually, each member is authorized to amend its campus carry rule as it deems necessary for campus safety. A detailed explanation of the reason(s) for any requested changes is required. Under the statute enacted by S.B. 11, the Board is required to review the amended rule, and the Board may, by a vote of no less than two-thirds of its members, further amend the rule in whole or in part. If the Board votes to further amend the rule in this manner, the member will implement the submitted rule as amended by the Board. However, if the Board reviews the submitted rule and takes no action to further amend it, the member will implement the submitted rule.

The Office of General Counsel has reviewed TDEM's new rule as well as the revisions proposed by eight members as shown on the attached exhibits and deems them legally sufficient.

Rule Summary

Texas A&M University-Central Texas (A&M-Central Texas) is committed to providing a safe and secure environment for the A&M-Central Texas community and its guests.

On the effective date of August 1, 2016, SB 11 (Act) generally authorizes a handgun license holder to carry a concealed handgun on the campus of an institution of higher education, subject to an institution's rules adopted in accordance with the Act.

In compliance with the provisions of the act, an institution may create a rule that prohibits concealed carry from specific campus areas or activities as long as the rule does not generally prohibit or have the effect of generally prohibiting concealed carry of handguns by license holders.

A&M-Central Texas has consequently elected to designate two campus areas where the concealed carry of handguns by license holders will be prohibited. These areas are the university's Counseling Center, including the co-located Community Counseling and Family Therapy Center, and the university's Testing Center during the administration of examinations. ~~(during the administration of standardized exams).~~

Rule Statement and Reason for Rule

The Texas A&M International University (TAMIU) President established this Rule after consulting with TAMIU students, staff, and faculty about the nature of the student population, specific safety considerations, and the uniqueness of the campus environment. This Rule has been reviewed by the System Board of Regents as required by law.

Senate Bill 11, signed into law in the 84th Legislative Session, authorizes handgun license holders to carry a concealed handgun on university campuses and includes a provision allowing institutions to establish limited rules regarding the storage of handguns in campus housing and prohibiting areas/premises on which license holders may carry.

Procedures and Responsibilities

A handgun license holder under Chapter 411, Texas Government Code, may carry a concealed handgun on or about the license holder's person while the license holder is on the TAMIU campus or in a TAMIU vehicle, unless prohibited by state or federal law, or this Rule. The open carrying of a handgun on campus is prohibited. Licensed peace officers are authorized by law to carry firearms at all times.

2. ENFORCEMENT

TAMIU enforces state law regulating firearms on campus. This enforcement occurs in two ways. First, TAMIU police or other applicable law enforcement agencies will investigate and take appropriate action, including referral for criminal prosecution, when violations occur. Second,

3. STORAGE OF HANDGUNS IN RESIDENTIAL FACILITIES

TAMU does not own and operate or lease and operate the residential facilities located on campus. Therefore, the management company of the residential facilities determines the restrictions on possession and storage of weapons in those facilities and lists those restrictions in its lease documents. The management company of on-campus residential facilities will notify TAMU of those restrictions by August 1 of each year.

Rule Summary

Texas A&M University-Central Texas (A&M-Central Texas) is committed to providing a safe and secure environment for the A&M-Central Texas community and its guests.

On the effective date of August 1, 2016, SB 11 (Act) generally authorizes a handgun license holder to carry a concealed handgun on the campus of an institution of higher education, subject to an institution's rules adopted in accordance with the Act.

In compliance with the provisions of the act, an institution may create a rule that prohibits concealed carry from specific campus areas or activities as long as the rule does not generally prohibit or have the effect of generally prohibiting concealed carry of handguns by license holders.

A&M-Central Texas has consequently elected to designate two campus areas where the concealed carry of handguns by license holders will be prohibited. These areas are the university's Counseling Center, including the co-located Community Counseling and Family Therapy Center, and the university's Testing Center during the administration of examinations.

Rule Statement

A safe and secure environment is fundamental to fulfilling the University's mission of teaching, research, and service. Prairie View A&M University (PVAMU) is committed to maintaining a safe and secure environment for all students, faculty, staff, and visitors.

Reason for Rule

This University Rule establishes guidelines for the carrying of concealed handguns by a holder of a license to carry a handgun, hereafter referred to as a "license holder," on PVAMU owned or leased premises. In addition, Texas Statutes require the adoption of a Rule for the carrying of concealed handguns on campus by license holders.

Official Procedures and Responsibilities

1. GENERAL

- 1.1 The President established this Rule after consulting with the students, faculty and staff of PVAMU about the nature of the student population, specific safety considerations, and the uniqueness of the campus environment. This Rule was reviewed by The Texas A&M University System Board of Regents as required by Texas Statutes.
- 1.2 Under Texas Government Code [Chapter 411, Subchapter H](#), a license holder may carry a concealed handgun on or about the license holder's person while the license holder is on the campus of PVAMU, or in a PVAMU vehicle, unless prohibited by federal or state law, or this Rule.
- 1.3 The open carrying of handguns is prohibited on campus. Licensed peace officers are authorized by law to carry firearms at all times.
- 1.4 PVAMU enforces state law regulating firearms on campus. This enforcement occurs in two ways.

- 1.4.1 The University Police Department or other applicable law enforcement agencies will investigate and take appropriate action, including referral for criminal prosecution when violations occur; and,
- 1.4.2 The University will consider any violation of state or federal law regulating firearms to be a violation of University Rules. Accordingly, such a violation is subject to disciplinary action under Rules applicable to students, faculty, and staff.

2. STORAGE OF HANDGUNS IN RESIDENTIAL FACILITIES

- 2.1 PVAMU has a contractual agreement with American Campus Communities (ACC) under which all on-campus residential premises are owned, controlled and operated by ACC. Therefore, any rules governing the possession and storage of handguns in said facilities, in accordance with Texas State law, are the responsibility of ACC.
