Hot Off The Press

October 2011 – BPP Enhancements

MSP Edit on Payroll Add/Correct Source Screens
MSP (Medical Supplemental Payment) is no longer allowed to be entered on the Payroll Add/Correct Source Screens for sources with a pay period end date after 08/31/2010.

AD&D Pretax Deduction Amount Added to 126 and 757
The Pretax Waive Flag on Screen 106 determines whether a person will have deductions taken pretax for medical, dental, vision, and/or AD&D. The Pretax fields can be viewed on the Insurance Type Detail Screens (Screen 120 – Medical; 121– Dental, 129 – Vision, and 126 - AD&D) and Benefit History by pressing the PF11 Key on the 757 screen. Previously, the pretax fields for medical, dental, and vision were displayed on their respective screens, but AD&D pretax values were not. Both Screen 126 and 757 were recently enhanced to show the AD&D pretax amount.

Master Error List Error 8471 - Active SGIP Elig Code with No Insurance
This error is usually reported when a person has an active SGIP Eligibility Code on the 101 screen but is not enrolled in Insurance. This error will no longer be reported for records that have a locked iBenefits record since it is assumed that iBenefits will either post benefits for this record or update the SGIP Eligibility code to resolve the error.

Comment for Dropping Med for Dependents Turning 26
A new comment will be written to Screen 106 and Benefit History stating "BP8096N – Dependents turning 26 – Med" when medical coverage for dependents turning 26 is turned off on the 115 screen and, if necessary, the number covered and family indicator is adjusted on Screen 106.

COBRA Notify Report
BP7077 is a weekly report that reports employees who potentially need to receive a COBRA Termination letter sent due to termination of employment. Anyone with an employee status code of 'T' and a COBRA Notify flag of 'N' and has not had a COBRA Termination letter record send to HRConnect will be reported. The report previously included records that had a letter record sent to HRConnect, but had not yet been downloaded (which sets the Notify flag to 'Y'). The report title has also been updated to read:

> Person's Termed with Insurance Coverage within 60 days
> Who did not get COBRA Term Letter generated in HRConnect

101 Screen Title Code Lookup
The title code lookup accessed on the 101 screen by pressing the PF1 key would previously bring up all workstation title codes for the System. Modifications have been made to the lookup so that only title code relative to the employee's PIN workstation will be shown in the pick list.

For questions relating to these changes, please contact BCSSupport@tamus.edu.
