Hummingbird Setup for Access to USAS

The following instructions will help you create a Hummingbird Session Profile for accessing USAS.

- After following the Hummingbird setup instructions on the TAMU CIS web site (http://hdc.tamu.edu/Systems_Software/Mainframe/Setting_up_Hummingbird_HostExplorer.php) double click the Hummingbird Neighborhood icon on your computer’s desktop.

- Double click on My Profile Space.

- Double click on New HostExplorer Profile.
• Type **USAS** as the **Profile Name**, type **mvs1.cpa.state.tx.us** as the **Host Name**. Click on the down arrow by **Properties** and choose SSL/TLS (SSL/TLS Version: SSL Version 2/3).

![New Profile](image1)

• Click on the **Connection** category and on the TN3270 tab, double click the **Host Name** and change the **Port** to **9023**.

![Edit Host Info](image2)

• Right click on the **USAS icon**, select **Create Shortcut**, scroll to the **Desktop** folder at the top of the scroll list and then press **OK**.
