MEMORANDUM

TO: System Office Employees

SUBJECT: System Office Strategic Plan

It is with great pleasure that I present the System Office Strategic Plan for Fiscal Year 2008 – 2012. The System Office Strategic Plan is the roadmap for where we want the System Office to go and how we plan to enhance the value added we bring to The Texas A&M University System. It should not be confused with the System-wide Strategic Plan, which we will begin in coming weeks and complete in 2008.

Over the past few months, some of you, your supervisors, the Executive Staff, and each of the System Members have provided a wide range of thoughts on what we can do differently, and/or better. We have worked through numerous revisions and iterations to narrow our focus to those critical efforts that will enable us to reach our vision of what the System Office can be. What emerged were five imperatives that the System Office must meet if it is to reach its vision.

1. Customer Satisfaction
2. Productivity & Efficiency
3. Professional Development
4. System Advancement
5. A Culture of Compliance & Integrity

We believe these imperatives and their associated goals, strategies, and performance measures will guide the System Office to serve the A&M System better. In addition, these imperatives should be a great tool for each System Office Employee to align their own role and performance objectives each year in finding new ways in supporting one or more of these imperatives.

The System Office Strategic Plan and the associated Executive Staff responsibility matrix for the plan is located on our website under the section “System Office Strategic Plan” at: http://www.tamus.edu/strategicplan/

Although this strategic plan looks five years ahead, it will be reviewed and adjusted annually to ensure that we stay on the right track and meet the System’s changing needs. Thanks again for your support and assistance.
