Prior Authorizations

• Prior Authorization (PA) is used when a contracted provider needs to get approval from the health plan to deliver a service.

• The goal is to make sure the service is best for the member, medically necessary and safe.

• PAs are not the member's responsibility. Contracted Providers are responsible for getting a PA. If they fail to get a PA before providing a service, the plan may not pay the claim and the provider would have to absorb the cost of the service.

• Members are not required to pay for the service if the provider fails to get a PA.

• If necessary, we can engage a care coordinator to assist with any additional member support.

Provider Interactions

• Providers can request a PA by calling customer service or via fax.

• Service delays can occur if a provider doesn’t submit requested documentation and records.

• If services are delayed or denied, providers can request a peer-to-peer review and/or appeal.
What services require Prior Authorization

Prior Authorization (PA) is when a contracted provider needs to get approval from the health plan to deliver a service.

Prior Authorization is required for:

- Advanced Imaging (MRI, MRA, CT scans and PET scans)
- Lab Management Solutions – Molecular and Genomic Lab Testing
- Musculoskeletal: Pain / Joint / Spine Services – excluding exams, physical therapy, and occupational therapy
- Inpatient stay that is not the result of an emergency
- Outpatient Medical Oncology
- Outpatient Radiation Therapy
- Outpatient Sleep Study
- Outpatient Specialty Drugs
- Select Durable Medical Equipment
- Some procedures that are performed as part of an inpatient stay

Twenty-three (23) hour observation and emergency room visits do not need prior authorization.
