Activity Descriptions

The Texas A&M University System Offices:

The A&M System Offices provide leadership and certain shared services for the system institutions (as detailed below) including financial, legal, auditing, and administrative services, academic and student program coordination, and HUB reporting, and oversight of board policy implementation.

System Offices have developed incrementally, as needed, to address the needs of member institutions for additional services, and pursuant to Regents' policies.

To a greater extent than any other in Texas, the A&M System has deliberately consolidated certain essential services and functions at the System Offices to take advantage of economies of scale and to provide value-added expertise that would otherwise be too expensive to acquire and maintain by the members independently, including cash, debt and investment management; health, risk, and property insurance programs; facilities planning and construction; communications; audit and legal services.

The majority of these services are billed (assessed) to and paid for by the A&M System member institutions from a variety of funding sources that are under their control. For example, all the internal auditors and legal counsel are part of the System Offices. Other centralized services include budgeting, accounting, payroll, and data reporting; fiscal management; investment management, intergovernmental relations; facilities planning and construction; real estate management; information technology services; and risk management.

FY 2016 Available University Funding for System Offices, includes increases to cover the elimination General Revenue appropriations for system office operations for the 2016-17 biennium and the redirection of institutional funds that will be used to provide funding for the Chancellor's Research/Teaching Initiative for our non-AUF eligible institutions.

In addition, the A&M System Offices operate several system-wide activities which include:

- The debt program for the A&M System (\$3.1 billion) which, in part, is funded through the biennial General Appropriations Act via tuition revenue bond (TRB) appropriations;
- The investment programs for the A&M System (\$4.3 billion) made up of operating funds and endowed fund;
- The A&M System self-insured group health/dental program (\$292 million) funded from employee and employer premiums;
- The A&M System workers' compensation insurance program (\$2.8 million) funded from member assessments; and
- The A&M System property and auto insurance programs (\$2.7 million) funded from member assessments and operated for the benefit of our member institutions.

IT Comprehensive Assessment

Contracted with Deloitte to conduct a comprehensive IT assessment to gain System-level insight into multiple facets of the IT environment across all TAMUS Member Institutions and Agencies, and to develop a System-level set of recommendations designed to increase the effectiveness and efficiency of the System. The goal of this assessment was to lay a solid foundation upon which to develop, grow and innovate in the process of becoming a “world class” Information Technology organization. Core to this foundation are the principles of reducing risk, exercising fiduciary control, building trust and a sense of “System” among Members, and developing strong leadership at both the System and System Member levels.

The project covered the following seven areas:

Information Technology Governance – IT Governance includes evaluating who is responsible and accountable for making and executing IT decisions and how these decisions are made, communicated and monitored.

Information Technology Security – IT Security includes assessing how well sensitive information and IT resources are secured and protected.

Information Technology Network and Infrastructure – IT Network and Infrastructure includes review of IT policies and standards, networking capabilities, and existing infrastructure architecture.

Application Management – Application Management includes assessing the processes used to develop, deploy, and manage applications.

Information Technology Operations – IT Operations includes reviewing how effectively IT service management and control processes and functions are utilized.

Information Technology Demand and Project Management – IT Demand and Project Management includes evaluating the alignment of IT projects with business objectives and the visibility of the IT project portfolio overall.

Information Technology Staffing and Support – IT Staffing and Support includes reviewing the alignment of the IT workforce and shared IT services in support of the needs of the TAMUS community.

Comprehensive Administrative Review

Contracted with PwC to conduct a comprehensive review and analysis of administrative structures, services, processes, practices and costs at all members of the Texas A&M University System. The primary purpose of the review was to:

- a. Make recommendations that would enhance administrative efficiency, effectiveness, and execution at all levels of our organizations. In particular, the review focused on identifying functions and services that may have been unnecessarily duplicated within and among A&M System members, as well as any organizational layers that created inefficiencies and complicated decision making and positive organizational change.
- b. Identify specific administrative cost savings that could be redirected into the System's core functions of teaching, research and service.

HR Classification-Compensation Standardization

Contracted with PwC on a project to standardize title codes and create a System-wide standardized compensation plan for non-faculty positions. The ultimate goal of this project was to make sure The Texas A&M University System can better recruit, develop, and maintain quality employees and do so in a way that makes sense across the entire System.

Chancellor's Research/Teaching Initiative

The objective of the Chancellor's Research/Teaching Initiative is to provide one-time funds to Texas A&M University and/or Prairie View A&M University for the recruitment and hiring of faculty members who will have a transformative impact upon the teaching and research missions of the University. It is envisioned that such candidates will markedly enhance research funding awarded to the University from federal, international, industrial, and/or foundation sources.

Funds are allocated based on the required incentives necessary to recruit the faculty members that are above and beyond what Texas A&M University or Prairie View A&M University can provide through their routine funding sources. FY 2016 marks the fourth year of the research portion of this initiative and the first year with regard to the teaching initiative.

IBM Supercomputer

The supercomputer project is a joint funded project between Texas A&M University and the A&M System Offices. This initiative will provide for faster than ever computing in support of a variety of scientific and medical research projects.

Institutional Financial Forecasting Model (IFFM)

Engaged the services of Huron Consulting Group to assist with the design & development, implementation, and ongoing monitoring & maintenance of an Institutional Financial Forecasting Model (IFFM) for The Texas A&M University System. This model is structured by inter-relating independent variables including student enrollment, tuition pricing, state and federal appropriations, multiple types of grants (e.g., federal, state, private), faculty and staff salaries & benefits, auxiliary enterprises (e.g., housing, parking, athletics), capital project needs, debt levels, gifts, investments and other relevant data. The model allows for TAMUS to conduct scenario analysis of these various inputs and provides detailed and summary results (reports, financial statements, etc.).

OFFICE OF THE BOARD OF REGENTS

Staff Positions and Responsibilities

- **Executive Director, Board of Regents – 1 FTE**

Principal officer to the Board of Regents in the administration of the responsibilities of the Office of the Board of Regents and the principal staff officer to each member of the Board in the discharge of his or her responsibilities.

- **Assistant to the Board of Regents – 1 FTE**

Performs administrative duties to support the Executive Director and the Board of Regents Office.

- **Board Office Manager – 1 FTE**

Performs management and administrative duties in support of the Board of Regents Office.

- **Board Operations Coordinator – 1 FTE**

Performs administrative duties including coordinating meeting logistics/arrangements, maintaining the website and coordination of special events for Board of Regents.

- **Administrative Assistant – 1 FTE**

Performs advanced administrative duties in support of Board of Regents Office. Types, transcribes, proofreads, edits and formats minutes of the Board.

- **Administrative Assistant – 1 FTE**

Performs administrative duties including composing, typing and distributing memoranda and other correspondence. Answers telephone and greets visitors to the Office of the Board of Regents. Assists with special events and supervises and coordinates schedules for all student workers.

- **Student Workers**

The Board Office staffs several student worker positions to assist with special events and any other administrative duties as necessary. Actual FTE count will vary depending on the actual number of hours worked by each student.
