87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**711 Texas A&M University**

---

Texas A&M University is holding to its primary purposes and Land-Grant mission: excellence in education and research for its students and the State of Texas, even amid the COVID-19 pandemic and the state's budget challenges. The following request is directly linked to maintaining and strengthening these primary purposes so Texas is ready for the resurgent economy that is around the corner.

Our students, faculty, and staff thank the Texas Legislature and the Governor for the support provided during the 86th legislative session. This support has made a profound and far reaching difference for students by helping support excellent teaching and research at Texas A&M.

This request highlights the success of the state's investment in Texas A&M and the challenges the university faces with extraordinary student enrollment growth – 27% and almost 14,000 since 2013. We have yet to accommodate growth and some of the challenges include:

- Higher student-to-faculty ratio (an increase from 20:1 in 2013 to ~23:1 currently);
- Staff per students, ranking last among all AAU public institutions and in the Southeastern Conference (SEC);
- Staff per faculty, ranking last among all AAU public institutions and in the SEC;
- Increased counseling service appointments (92% since 2013, currently at 33,000+ appointments), while staffing has only increased 22%;
- Maintaining one of the lowest administrative cost ratios in Texas, among the SEC and other AAU public institutions.

This is why support from the state is critical. The budget challenge we face is real. Even so, an investment in our students, faculty and staff “pays forward” for Texas to thrive economically and for the long-term health and well-being of its citizens.

**TEXAS A&M RESPONSE TO COVID-19 AND ONGOING COSTS**

Thanks to state legislative support, over the past few years Texas A&M has been able to strategically invest in areas to help advance our core mission of teaching, research and service to our students and the state of Texas. Because of these investments, Texas A&M was able to mobilize its world-class talent to transform operations quickly in the face of a historic pandemic, and continue fulfilling its core mission. A few highlights include:

- Facilitated an emergency transition to remote learning;
- Provided technology training to 1,400 faculty and teaching assistants, and offered numerous workshops in colleges and departments across the university;
- Helped more than 850 study abroad students return home safely from over 70 different countries.

Because of these efforts, we were able to complete the education and preparation of a record 10,796 students to receive their degrees in May, and another 2,005 in August. These 12,801 graduates went on to begin their careers, graduate programs or commission into the military.

Texas A&M researchers are also making significant discoveries and innovations in the fight against COVID-19, and we anticipate by the beginning of the session there will be more. Some examples of the research discoveries and innovations we know of today include:

- Texas A&M researchers worked on two COVID-19 vaccine candidates that could be mass produced quickly;
- A Texas A&M chemist was the first researcher to identify the experimental drug Remdesivir as a potential treatment option for COVID. The drug is now being used in hospitals across the state as the most effective treatment option;
- Created a Texas A&M directory of experts that was accessed by more than 325,000 people in the first few days it was available;

## Administrator's Statement

87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

### 711 Texas A&M University

---

- Utilized 3D printing to create 200 diffusers for Houston Methodist Hospital;
- The Texas A&M Veterinary Emergency Team headed to the Panhandle for its first human health deployment, and led an epidemiology unit to trace how COVID-19 was circulating in the region; and
- A Texas A&M research team identified the first COVID-19 positive cat in Texas. By sampling dogs and cats whose owners have tested positive, the team is working to understand how pets living in 'high-risk' households may be impacted by the virus.

There also continues to be significant ongoing costs in responding to COVID-19, and mitigating its effect on our students, faculty and staff, including our local communities. Like every institution across the state, we anticipate budget challenges, including: costs for remote delivery, retooling faculty, increasing protection measures across campus, and upgrading technology. It's worth noting that in a recent study by West Texas A&M University, they concluded that costs are nearly the same for delivering in-person and remote instruction, given that a reduction in on-campus college experiences for the traditional student "is essentially offset by increased information technology support required for effective online instruction." While the federal CARES Act provided emergency funding for students, families, and universities, this stopgap funding covered only part of these costs. It does not address the considerable current and growing costs incurred by areas across the university, including but not limited to:

- Refunds and reimbursements for housing, dining, and parking;
- Foregone budgeted revenues from cancelled campus events and necessary closure of revenue-generating activities (housing, dining, recreation center, parking, and others);
- Foregone budgeted revenues from not charging distance education tuition and fees due to move to online/remote courses;
- Increased overtime for IT and other staff;
- Emergency leave for faculty and staff;
- Technology costs associated with alternative delivery of courses;
- The growing costs associated with ensuring the safety of our campus, including PPE, classroom renovations, and additional cleaning and disinfecting.

Just as the virus itself and the impacts of the pandemic have been difficult to predict, we cannot accurately predict what the total cost will eventually be of responding to COVID-19, only that the cost to respond will continue to grow. Our commitment to serve our students and the state remains steadfast, but our ability to fulfill this commitment is only possible with the State's partnership and support.

#### IMPACT OF BUDGET REDUCTIONS

Maintaining college access and affordability is a concern with the additional costs of response to the pandemic. State funding is a critical component of maintaining access with affordability. At the time of this document, we submitted a five percent biennial budget reduction plan that included: a reduction in 72 faculty positions, a loss of 372 class sections, \$7 million in reduced research productivity, and a reduction in both student counseling and advising services. The loss of this teaching capacity and student service support will impact our four-year graduation rates, time-to-degree, and high impact freshman experiences, which are particularly important for the success and retention of first generation and underrepresented students. Any reduction in staffing affects recruitment and pre-application assistance, academic advising and student success/retention, counseling, and career advising and placement.

These budget reductions, in addition to the unfunded mandate of the Hazlewood program (which costs Texas A&M over \$28 million annually), continue to present difficult challenges that have serious ramifications for our students and our land-grant mission.

**711 Texas A&M University**

---

**STRIVING TO IMPROVE DIVERSITY, INCLUSION AND EQUITY**

In addition to COVID-19, there are challenges in responding to longstanding issues surrounding campus diversity, inclusion and equity. We want our student body and faculty to look more like the demographics of our state, and are working every day to achieve that goal.

To that end, we have been successful in growing the number of Hispanic and first-generation students enrolling at Texas A&M, and we are close to earning the Hispanic-serving Institution (HSI) designation. In spite of direct and targeted policy and financial actions, we have not been as successful in growing our African-American student enrollment, and although we are disappointed, we are not giving up. We will continue aggressively to recruit, retain and graduate more African-American students.

With regards to culture and climate, as a campus community, we are working to ensure every single student, faculty, staffer and visitor to campus are safe, welcomed and included. At Texas A&M, we are listening to current and former students who are sharing experiences of their time on campus, and we are making changes in response to their concerns.

**UPDATE ON INVESTMENTS FROM 86TH SESSION**

Thank you to the 86th Legislature! The institutional enhancement funding that the Legislature appropriated to Texas A&M made an incredible difference in our ability to continue investing into the already promising results of our Student Success Initiative.

The institutional enhancement funds Texas A&M received, supports student success and have been allocated to the following programmatic areas (percent invested): Student Success Initiative (18%), which will improve graduation and retention rates and; reduce and eliminate disparities for first generation and underrepresented students; strategically targeted faculty hires (36%) for colleges and programs impacted by student growth to enhance diversity and elevate existing areas of excellence; enhancements to graduate programs (18%); developing key focus areas in data science/artificial intelligence, an undergraduate neuroscience degree and expanded diversity support (18%); and academic and teaching innovation (9%) for instructional design and enhanced online learning, and teaching innovation grants for interdisciplinary programs, active learning, teaching in large classes and distance education. The strategic faculty hires align with our proposed Biological and Chemical Sciences Complex (capital construction request), both of which are a major point of emphasis for the future of the university.

All of these investments were crucial in helping us continue our essential mission of teaching, research, and service to our students and the state of Texas.

**STUDENT SUCCESS INITIATIVE**

Texas A&M educates and graduates more students than any other university in the state – and 94 percent of our undergraduates are from Texas. An important part of our service to the state is ensuring that students graduate on time and obtain the skills employers desire. This is why one of our most important recent investments has been our Student Success Initiative, where we have already seen positive results, for example:

- Increases to first-year retention (92.1% to 93.2%) and four-year graduation rates (56.2% to 59%) across the university;
- Increases to first-year retention (86.6% to 88.1%) and four-year graduation rates (50.3% to 54.5%) for first-generation students;
- Increases to first-year retention (86.6% to 89.1%) and four-year graduation rates (50.2% to 54.4%) for students from families making less than \$60,000 a year.

Texas A&M also ranks high among Texas public universities in several key areas:

- Tied for first in time-to-degree;

**Administrator's Statement**

10/23/2020 8:45:02AM

87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**711 Texas A&M University**

---

- Highest six-year graduation rate;
- Highest average starting salaries in the state; and
- Greatest lifetime return-on-investment for graduates.

Currently, more than 55 percent of our students graduate without any debt at all, and those that do have approximately \$6,000 less debt than the national average.

As a university, we have multiple ways of measuring success, beyond just the number of students who can pass a test or earn a degree. Success is also measured in the number of graduates who can get good jobs and who receive the entrepreneurial skills and support they need to create jobs for others. In 2018-19, more than 10,000 seniors either had jobs at graduation or were admitted to advanced programs for further education, and over 200 were commissioned for military service.

It's also measured in the more than 5,500 undergraduate students who are given the chance to work alongside renowned researchers in the laboratory, an opportunity provided at only two public research universities in Texas. It's measured in the more than 3,800 students—the most of any public university in the U.S.—who study or work abroad, giving them a glimpse of the complex challenges impacting their generation and teaching them to be citizens of the world.

**ECONOMIC IMPACT OF EDUCATING A&M STUDENTS**

Teaching and training undergraduate and graduate students isn't just about the personal benefits of education and their life-time earning potential. It's also about the economy. In the most recent national rankings, Texas A&M was 20th in the U.S. and 1st in Texas among all universities in research & development expenditures. Through research spending (\$980 million), start-up and spin-off companies (\$1.1 billion), construction (\$976 million) and other spending impact areas, students, former students, faculty, and staff each have contributed to Texas A&M's overall annual \$9.1 billion financial impact on Texas.

Numerous reports and significant business decisions affirm the economic impact of major research universities to the states in which they reside. For example:

- The average Texas A&M bachelor's degree holder earns \$575K more in median pay over 20 years than the average high school graduate.
- State and local governments, as well as their taxpayers, have a very strong incentive to boost college attendance and completion, especially at college and universities.

As our state and nation eventually climb out of our current economic situation, we will need key sectors to help us jumpstart the economy. Throughout history, higher education has consistently been a catalyst for economic activity. If the citizens of Texas cannot get the education or training they need to find better jobs, the economy could sputter or come to a standstill. However, if we take this opportunity to prepare our workforce for the future, we could see Texas recover more quickly than others, driving the growth and expansion of our economy and our state.

**TEXAS A&M SPECIFIC FUNDING REQUESTS**

As stated previously, we know significant challenges lay before the State of Texas, with difficult decisions relating to budget deficits and economic uncertainty. We look forward to partnering with the state to revitalize the economy and health of Texans.

**RESTORATION OF 5% REDUCTION**

Texas A&M requests the 5% budget cut be restored back to our base for FY22-23 (\$33.3 million for the biennium). This exceptional item only reflects the portion of the reduction associated with our non-formula items. Our request is to restore any reductions to formula funding as well.

**Administrator's Statement**

10/23/2020 8:45:02AM

87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**711 Texas A&M University**

---

After seeing positive results from our investment of strategic faculty hires that support our Student Success Initiative, a 5% reduction in our base for FY22-23 would severely hamper the momentum we have achieved to date. When students graduate on time, they incur less debt and can begin their careers and start earning income. This restoration would continue our positive momentum through strategic faculty hires, allowing us to keep class sections that would increase our overall retention and four-year graduation rates (and for underrepresented and first-generation students), while also reducing time-to-degree and the amount of debt incurred by students and families.

This restoration would also continue the trajectory of high impact freshman experiences, which positively impacts our first-year retention rates, four- and six-year graduation rates, and reduces the disparities in graduation rates for first-generation and underrepresented students. Based on the number of faculty and normal workloads and outcomes, this restoration would prevent the loss of 372 class sections, reduce additional debt burden on students and families, and continue the positive momentum of student success at Texas A&M.

**ACADEMIC RESOURCE INITIATIVE**

For FY 22-23, Texas A&M requests \$25.7 million for the biennium to hire 128 faculty, one-fourth of our overall goal to reach 514 by 2025.

Texas' greatest resource is its people: and for Texas A&M, it's our students, staff and faculty. Texas A&M, and the State, must attract and retain the best of each. But to accommodate the growth of the state's population and student enrollment and to continue being a creator of economic development, the university must hire and retain more faculty. (See attached graphic)

A decade ago, our student-to-faculty ratio was 20:1. Due to the university's land-grant commitment to meet the population growth of the state, our student-faculty ratio has grown to ~23:1. Our goal is 19:1, which is near that of the state's other flagship, and this current request is one fourth of the funding needed to attain that goal of 19:1. Reaching our goal by 2025 would increase the number of faculty involved in both teaching and research, thus elevating our contributions to students and the state and multiplying our economic impact.

Our scalable approach is mindful of the state's current financial climate, but also committed to remain as competitive as other states are in attracting Texas' most talented and brightest students. We adapted current enrollment (27% / 14,000 additional students since 2013) to keep up with population growth and the educational needs and expectations of high-performing Texas students. The expectation of these students and their parents are class sizes similar to other national universities, which has been confirmed by our own recent graduates. Of those surveyed, almost 40 percent reported that large classes contributed to a less than optimal learning environment. Class size also impacts our goal of improving retention and graduation rates, reducing time-to-degree and enhancing students' and parents' college return on investment.

Texas A&M invested last session's institutional enhancement for student success through strategically targeted and diverse faculty hires. An increase in faculty, means an increase in classroom engagement for our students, and this funding will help us meet the challenge of catching up with enrollment growth by:

- Hiring additional tenure-track faculty to address steep declines in tenure-track faculty.
- Increasing tenure-track faculty teaching lower division courses—rapid growth has driven these numbers well below the state THECB peer group.
- Continued enhancement to transfer student capacity and their academic success.

This request will also support Texas' economic diversification. In FY19-20, faculty contributed to Texas A&M's statewide financial impact through research spending

**711 Texas A&M University**

---

(\$980 million) and start-up and spin-off companies (\$1.1 billion).

Without this funding, we face the possibility of enrollment reductions, and Texas will continue to lose the most high-caliber students and their intellectual and economic contributions to other states. There is also the risk for students enrolling in Texas A&M of increased time-to-degree and debt levels; decreased graduation and retention rates; and an undesirable learning environment.

While we are always seeking to be more efficient and employ cost saving measures, we have the opportunity to look toward the horizons of the future by taking strategic advantage during a moment of uncertainty.

**PROPOSED TUITION REVENUE BOND PROJECT: BIOLOGICAL AND CHEMICAL SCIENCES COMPLEX**

Again, we know significant challenges lay before the State of Texas, with difficult decisions relating to budget deficits and economic uncertainty. Nevertheless, in order for Texas A&M to serve the state's need for a competitive and ready workforce for the post-pandemic recovery, the university needs an up-to-date Biological and Chemical Sciences facility.

At Texas A&M, biological, chemical and life sciences are a traditional strength for our university, as well as a key pillar of undergraduate education. Because these facilities haven't been upgraded for more than two decades, we run the risk of losing top students and are challenged in recruiting leading researchers and retaining our own outstanding researchers who are sought by other universities, many outside Texas.

To help ensure that we meet the needs of our students; retain and recruit researchers whose work stimulates the regional and state economies; and meet the STEM needs of the state; Texas A&M is investing in this area with a proposed \$250 million Biological and Chemical Sciences Complex. We respectfully request: \$200 million for a Tuition Revenue Bond Project to help fund the Biological and Chemical Sciences Complex.

**GRADUATE EDUCATION AND TEXAS RESEARCH UNIVERSITY FUND (TRUF)**

The State of Texas, like the United States, is facing a looming issue that has scientific, national security, and workforce consequences: the shortage of domestic applicants for graduate programs. The pandemic has exacerbated this issue. With the uncertainty of foreign travel, the growing tensions between certain countries and a desire to maintain international standing in the race for science, thoughtful and strategic investments and strategies are needed.

Graduate students matter to the entire research enterprise because they form the backbone of research operations. They help generate new knowledge and discoveries, and learn from researchers on the cutting edge of science, engineering and technology, who train them as the next generation of research pioneers. They will then go on to make future ground-breaking discoveries that will make our lives better. Graduate students also matter in the educational experience of undergraduate students, often teaching and facilitating labs, serving as mentors in research labs, and helping when needed to advance undergraduate learning.

Because graduate student financial support is traditionally low, domestic students often seek employment outside of academia while international students, many of whom are supported by their home nations, are willing to engage in educational and research opportunities in the U.S. This has created a situation where any disruptions to this international "supply chain" will in turn harm the state and nation's ability to respond to our most pressing research needs.

Therefore, if funds are available we request additional funding for the Texas Research University Fund (TRUF) that will match TRUF-eligible University investments in the recruitment and retention of domestic graduate students. We are investing funds from last session's institutional enhancement (\$10 million for the biennium) into

**Administrator's Statement**

10/23/2020 8:45:02AM

87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**711 Texas A&M University**

---

graduate programs. Additional funds will ensure that a better pipeline for these skilled domestically trained researchers will keep Texas in “the race” for discoveries that save lives, enrich our well-being, and generate economic development throughout the state.

We recognize the difficult financial situation and tough budget decisions that will face the 87th Legislature and will work collaboratively with state leaders to find the support needed for the education, research, and service we provide. A robust higher education sector is key to long term economic growth and resiliency, but increased costs, revenue losses, and budget reductions due to the pandemic have Texas’ higher education sector stressed and stretched. We request continued investment in higher education to maintain our service to the state. Key funding issues are detailed below:

**WEST TEXAS A&M INITIATIVE**

Texas A&M University is supportive of the exceptional item request that West Texas A&M University (WT) is seeking this session. WT received \$4 million last session for the Advancing Food Animal Production in the Panhandle initiative. \$2 million of this is supporting the veterinary partnership we have with WT. We implemented clinical rotations for fourth-year doctorate of veterinary medicine (DVM) students and summer internships for second- and third-year DVM students at WT, and we have seen a more than 3-fold increase in applications to our DVM program from WT students. We currently have eight veterinary students on campus at WT (limited by COVID -19 travel restrictions) doing the clinical research component of their education. Starting in the fall semester of 2021, a cohort of 18 veterinary students will begin their first two years of their four-year veterinary curriculum in Canyon. This will create the initial cohort of 18 students with planned growth to a cohort of 30 students per year, leading to 60 students on campus at all times, in addition to clinical rotations in the large food animal industry in the region. This 2+2 program will help increase the number of potential large animal DVM’s in the Texas Panhandle. Continued support of this initiative and favorable consideration of the additional \$4 million (\$8 million total) would greatly benefit the success this partnership is having on the animal industry in the Texas Panhandle.

**THE TEXAS A&M UNIVERSITY SYSTEM**

Base Funding – Maintaining equitable, reliable, and predictable funding for higher education is critical for our institutions to plan, teach, and support students through to graduation and to pursue excellence. This base funding is provided by the State through both formula and non-formula support.

Formula funding accounts for 80 percent of our institutions’ net GR appropriations and supports the core instructional, operational and infrastructure costs at our institutions. Our highest priority is maintaining the general revenue support to these formulas.

As higher education adapts to the financial hardships of COVID-19, non-formula items provide critical support for students and academic programs. We request that non-formula support items be maintained at FY2020-21 levels to preserve vital academic programs and student support services.

We request expansion of the Small Institution Supplement (SIS) to institutions up to 20,000 headcount. These institutions and their students’ success are key to economic recovery and long-term resiliency. Expanding the SIS up to 20,000 students would provide critical support to help these institutions remain affordable for students and effective in fulfilling their missions.

Restoration of 5% Reductions – Across the A&M System the reductions total \$84.6 million. These reductions hurt. Our institutions had to cut into the teaching and services provided to our students that are and will continue to impact students’ success and time to degree. Continuing these reductions into the 2022-23 biennium will further harm our students.

Outcomes Based Funding – Any performance funding contemplated as part of state support for higher education should be in addition to formula funding , especially as

**Administrator's Statement**

87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**711 Texas A&M University**

---

institutions struggle with the economic fallout from the pandemic. While this session may not be optimal timing for a major funding initiative, we have worked across higher education on a proposal for increased student success at Texas' 27 regional institutions and can provide additional information as requested.

Higher Education Group Health Insurance – We request funding to cover increases in covered enrollments and in health care costs beyond our control. We also request restoration of the gap in funding for our employees compared to state employees in the ERS group plan.

Student Financial Aid – Increased support for student financial aid is vitally important to help students graduate with lower debt. We request increases to TEXAS grants and other financial aid programs be made in conjunction with funding the formula that provides the state's share of the costs of educating students.

Background Checks – Texas A&M's statutory authority to conduct background checks on employees of the University comes from Texas Govt. Code Chapter 411 Subchapter (f) and Texas Education Code Section 51.215. It is Texas A&M's policy and practice to conduct such checks on all employees being considered for positions at Texas A&M.

# ACADEMIC RESOURCE INITIATIVE

"Texas' greatest resource is its people: and for Texas A&M, it's our students, staff and faculty." - Texas A&M President Michael K. Young

## FACTS

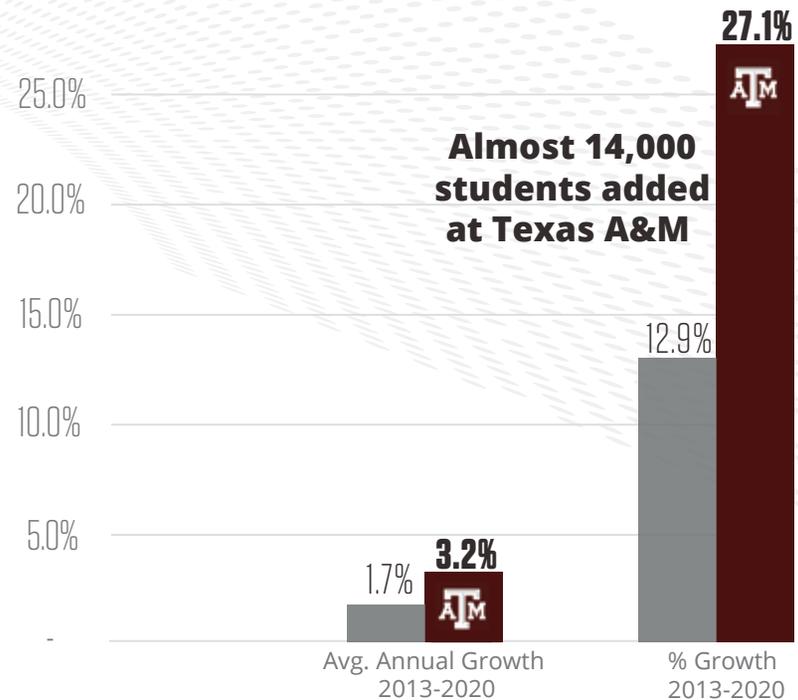

- ▶ **Texas A&M** has added almost 14,000 students since 2013, and must **hire and retain more faculty** to catch up with student growth.
- ▶ **Texas A&M grew enrollment** to meet the needs of the state's growth, and our **student-to-faculty ratio has grown to ~23:1**. A decade ago, our ratio was 20:1.
- ▶ **Texas A&M's** goal of a 19:1 student-to-faculty ratio is near the state's other flagship.
- ▶ This **scalable request** is mindful of Texas' current financial climate, and is 1/4 of the funding needed to reach our goal by 2025.
- ▶ Our students have told us they expect class sizes similar to other national universities. Of those surveyed, **almost 40%** said large classes contributed to a less than optimal learning environment.

## DID YOU KNOW?

In 2018-19, over 10,000 **Texas A&M** seniors had jobs at graduation or were admitted to advanced programs for further education, and over 200 were commissioned for military service!

## ENROLLMENT GROWTH

## CERTIFICATE

**Agency Name** Texas A&M University

This is to certify that the information contained in the agency Legislative Appropriations Request filed with the Legislative Budget Board (LBB) and the Governor's Office Budget Division (Governor's Office) is accurate to the best of my knowledge and that the electronic submission to the LBB via the Automated Budget and Evaluation System of Texas (ABEST) and the PDF file submitted via the LBB Document Submission application are identical.

Additionally, should it become likely at any time that unexpended balances will accrue for any account, the LBB and the Governor's Office will be notified in writing in accordance with Article IX, Section 7.01 (2020-21 GAA).

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium. The Teaching Experience Supplement formula provides an additional weight of 10 percent to lower and upper division semester credit hours taught by tenured and tenure-track faculty.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Infrastructure Support formula distributes funding associated with plant-related formulas and utilities. This formula is driven by the predicted square feet for universities' educational and general activities produced by the Coordinating Board Space Projection Model. The portion of the formula related to utilities is adjusted to reflect differences in unit costs for purchased utilities, including electricity, natural gas, water and wastewater, and thermal energy.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Cyclotron Institute is a Department of Energy (DOE) Supported Center of Excellence, jointly supported by DOE and the State of Texas. It is a major technical and educational resource for the state and the nation. The primary functions of the Institute are to conduct basic research, to educate students in accelerator based science and technology, and to provide accelerator capabilities for a wide variety of applications in materials science, nuclear medicine, space science, and analytical procedures. Additionally, the Cyclotron Institute is developing a radioisotope production program. Radioactive isotopes are central to non-invasive diagnostic medical procedures as well as therapeutic nuclear medicine. Through this program, methods of production for medically important radioisotopes will be pursued, resulting in new knowledge, increased availability of these isotopes and students trained in radiochemistry.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

This item is important to the University’s mission, thus we supplement the GR received from the state, but those amounts are not included in the requested years.

Additional information for this strategy is available in Schedule 9, Special Item Information.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Texas Sea Grant College Program at Texas A&M University was created to improve the understanding, wise use and stewardship of Texas’ coastal and marine resources. To achieve this mission, Texas Sea Grant directs its research, outreach and education programs to benefit the citizens, businesses and communities of Texas – from providing grants and scholarships that benefit students and workforce development, to funding Texas’ innovative researchers to solve real-world problems, to deploying a boots-on-the-ground extension team to help industry in Texas be more competitive in a global marketplace and coastal communities to grow sustainably and build resilience to impacts from storms and other hazards.

This unique partnership unites the resources of the federal government, the State of Texas, industry and universities across the state to create knowledge, innovative tools, products and services that benefit the Texas economy, environment and citizens. Texas Sea Grant yields a 20:1 return on investment – for every state dollar invested in Texas Sea Grant, it returns more than \$20 to the Texas economy. Additionally, the program receives federal funding that requires a match of one state dollar for every two federal dollars received.

The Texas Sea Grant College Program is part of a national network of Sea Grant programs in coastal and Great Lakes states. The network is funded by the National Oceanic and Atmospheric Administration (NOAA) in partnership with the states.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Clean, affordable, and sustainable energy is critical to the state of Texas and its consumers, and as a major economic engine that affects the global competitiveness of the United States. For many decades, Texas has led in providing solutions to the energy challenges facing the nation and the world. The Energy Resources Program (ERP) at Texas A&M University was created to provide the state with a concentration of expertise in research, teaching, and public service directed at continuously developing solutions to Texas' and the nation's changing energy and environmental challenges. Texas A&M's ERP maintains programs and provides overarching coordination among multiple colleges, departments, and disciplines that addresses both immediate and long-term needs in an area of major importance to Texas and the national economy. The ERP accelerates advanced and emerging technologies in both renewable and traditional sources of energy by cultivating innovative strategies to maintain the State's leadership in wind power, renewable energy technologies, natural gas production and distribution, and critical issues associated with water use and energy production.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The vision of the Texas A&M Colonias Program (COLN) at Texas A&M University (TAMU) is to serve some of Texas’ most isolated and economically distressed rural communities where most residents live without one or more major infrastructures, such as basic access to potable water. The program seeks to enhance the quality of life for the residents that live in these Colonias communities along the Texas/Mexico border and in other economically distressed areas of Texas.

The mission of the COLN is to identify livability, resilience, and sustainability problems in the Colonias communities, and partner with various organizations in the public and private sector to develop and deliver solutions in six dimensional areas: (1) Health and Human Services, focusing on the well-being of individuals, families, and communities; (2) Education and Workforce Development; (3) Economic Development; (4) Planning and Design of rural to urban environments; (5) Critical Civil Infrastructure Systems, with an emphasis on water, energy, transportation/mobility, sewage and stormwater, and communication systems; and (6) Affordable Housing and Community Facilities.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Texas A&M University has added 17,000 students since 2008, and Institutional Enhancement is used to support the success of these students. Specifically, Institutional Enhancement is used to invest in:

- Student Success Initiative to improve graduation and retention rates, and reduce and eliminate disparities for first generation and underrepresented students
- Enhancements to graduate programs
- Development of key focus areas in data science/artificial intelligence, biology and nutrition, technology commercialization, early childhood education, an undergraduate neuroscience degree and expanded diversity support
- Academic innovation for instructional design and enhanced online learning, and teaching innovation grants that target areas such as interdisciplinary programs, active learning, teaching in large classes and distance education
- Targeted faculty hires in colleges/programs impacted by student growth

This strategy also includes specialty license plate revenues.

**Program Prioritization:** Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.

Texas A&M University prioritizes funds distributed through existing formulas as the highest priority as these formulas provide equitable, reliable and predictable funding to higher education. Funds distributed by a formula—yet outside I&O, E&G, and supplemental support—are vital for the mission in which the funds are intended. Existing tuition revenue bonds are needed to continue to pay the debt previously authorized for new facilities by the state. Non-formula items remain important for addressing specific needs beyond the formula, particularly in addressing unique institutional needs and/or providing an opportunity to leverage other resources, particularly federal funds, and provide public services to citizens of Texas. As part of the prioritization of existing funding sources, reinstating the 5% budget reduction helps maintain existing programs. While reductions to the formulas is not included in the LAR process, we ranked the reinstatement of the 5% reduction ahead of new exceptional item requests primarily due to the importance of reinstating the 5% reductions to formula funding. Finally, new funding to address specific needs at Texas A&M University were prioritized over other strategies due to the impact these new funds could have on advancing the institution.

**4.A. Exceptional Item Request Schedule**  
 87th Regular Session, Agency Submission, Version 1  
 Automated Budget and Evaluation System of Texas (ABEST)

-------	-------

**DESCRIPTION / JUSTIFICATION:**

Maintaining college access and affordability is a concern with the additional costs of response to the pandemic. State funding is a critical component of maintaining access with affordability. This exceptional item only reflects the portion of the reduction associated with our non-formula items. Our request is to restore any reductions to formula funding as well.

**EXTERNAL/INTERNAL FACTORS:**

Major accomplishments to date and expected over the next two years: Texas A&M educates and graduates more students than any other university in the state – and 94 percent of our undergraduates are from Texas. An important part of our service to the state is ensuring that students graduate on time and obtain the skills employers desire. Texas A&M also ranks high among Texas public universities in several key areas:

- Tied for first in time-to-degree;
- Highest six-year graduation rate;

**4.A. Exceptional Item Request Schedule**  
 87th Regular Session, Agency Submission, Version 1  
 Automated Budget and Evaluation System of Texas (ABEST)

DATE: 10/23/2020  
 TIME: 8:45:27AM

Agency code: 711 Agency name: Texas A&M University

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

- Highest average starting salaries in the state; and
- Greatest lifetime return-on-investment for graduates.

See Schedule 9 for list of accomplishments for each non-formula item.

Year established and funding source prior to receiving non-formula support funding: varies

Formula funding: Request is to restore

Non-general revenue sources of funding: None

Consequences of not funding: The loss of this teaching capacity will impact our four-year graduation rates, time-to-degree, and high impact freshman experiences, which are particularly important for the success and retention of first generation and underrepresented students. A reduction in staffing affects recruitment and pre-application assistance, academic advising and student success/retention, counseling, and career advising and placement. Additionally, non-formula items will not be able to perform as much public service or research for the state, and the loss of funding will negatively impact their ability to leverage other funding, such as federal funds and grants.

These budget reductions, in addition to the unfunded mandate of the Hazlewood program (which costs Texas A&M over \$28 million dollars annually), continue to present difficult challenges for Texas A&M in achieving excellence in education and research for our students and the State of Texas.

**PCLS TRACKING KEY:**

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Restoration of 5% reduction: Teaching and research faculty, administrative, counseling, advising staff, restore lost class sections and research funding. Salaries related to non-formula items that perform research and public service functions. These amounts represent the non-formula portion of the reduction.

**ESTIMATED ANTICIPATED OUT-YEAR COSTS FOR ITEM:**

2024	2025	2026
\$1,496,756	\$1,496,756	\$1,496,756

**DESCRIPTION / JUSTIFICATION:**

Texas' greatest resource is its people: and for Texas A&M, it's our students and faculty. Texas A&M, and the state, must attract and retain the best of each. But to accommodate the growth of the state's population and student enrollment and to continue being a creator of economic development, the university must hire and retain more faculty.

For FY 22-23, Texas A&M requests \$25.7 million for the biennium to hire 128 faculty, one-fourth of our goal of 514 by 2025.

A decade ago, our student-to-faculty ratio was 20:1. Due to the university's land-grant commitment to meet the population growth of the state, our student-faculty ratio has grown to ~23:1. Our goal is 19:1, which is near that of the state's other flagship, and this current request is one-fourth of the funding needed to attain that goal of 19:1. Reaching our goal by 2025 would increase the number of faculty involved in both teaching and research, thus elevating our contributions to students and the state and multiplying our economic impact.

Our scalable approach is mindful of the state's current financial climate, but also committed to remain as competitive as other states are in attracting Texas' most talented and brightest students. We adapted current enrollment (almost 27%+/14,000+ students since 2013) to keep up with population growth and the educational needs and expectations of high-performing Texas students. The expectation of these students and their parents are class sizes similar to other national universities, which has been confirmed by our own recent graduates. Of those surveyed, almost 40 percent reported that large classes contributed to a less than optimal learning environment. Class size also impacts our goal of improving retention and graduation rates, reducing time-to-degree and enhancing students' and parents' college return on investment.

Agency code: 711 Agency name: Texas A&M University

CODE	DESCRIPTION	Excp 2022	Excp 2023
------	-------------	-----------	-----------

**EXTERNAL/INTERNAL FACTORS:**

Major accomplishments to date and expected over the next two years:

Texas A&M has seen promising positive metrics from the Student Success Initiative outcomes. On a per capita basis, Texas A&M invested almost 50 percent of last session's institutional enhancement for student success through strategically targeted and diverse faculty hires. Increased faculty numbers and classroom engagement will occur and funding will help finance:

- Hiring additional tenure-track faculty to address steep declines in tenure-track faculty.
- Increasing tenure-track faculty teaching lower division courses - rapid growth has driven these numbers well below the state THECB peer group.
- Continued enhancement to transfer student capacity and their academic success.

This request will also support Texas' economic diversification. In FY19-20, faculty contributed to Texas A&M's statewide financial impact through research spending (\$980 million), start-up, and spin-off companies (\$1.1 billion).

Year established and funding source prior to receiving non-formula support funding: 2020, none

Formula funding: None

Non-general revenue sources of funding: None

Consequences of not funding: Without this funding, we face the possibility of enrollment reductions, and Texas will continue to lose the most high-caliber students and their intellectual and economic contributions to other states. There is also the risk for students enrolling in Texas A&M of increased time-to-degree and debt levels; decreased graduation and retention rates; and a less than optimal learning environment.

<b>TOTAL, METHOD OF FINANCING</b>		<b>\$17,436,912</b>	<b>\$17,436,912</b>

**DESCRIPTION / JUSTIFICATION:**

At Texas A&M, biological, chemical, and life sciences are a traditional strength for our university, as well as a key pillar of undergraduate education. Because these facilities have not been upgraded in more than two decades, we run the risk of losing top students and are challenged in recruiting leading researchers and retaining our own outstanding researchers who are sought by other universities, many outside Texas.

Biology is a basic requirement for many undergraduate majors, and chemistry also impacts many other disciplines. 50% of undergraduates will take at least one chemistry course. This area also engages medicine, veterinary medicine, and agriculture among others. As the state of Texas' population has grown, so has Texas A&M's enrollment and critical demand for research facilities to support the high-caliber students taking these courses, who will go on to graduate into a wide range of jobs that are important to the health and prosperity of Texas.

The Biological and Chemical Sciences Complex will address this need while also meeting the increased student demand for research facilities that support life sciences disciplines, particularly for biology and chemistry. The building complex will:

- Fill a campus need for state-of-the-art Biosafety Lab (BSL) 2 facilities to support faculty research, with enhanced security for research labs, storage, and disposal of biohazard materials.
- Help recruit faculty who are leaders in traditional and emerging fields of science, by providing faculty support and office space.
- Provide opportunities for the additional faculty hired, to be more competitive in securing external research dollars (e.g., National Institutes of Health), bringing money back to the state of Texas, and enhancing the cutting-edge research and scholarship in the classroom.

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2022</b>	<b>Excp 2023</b>
-------------	--------------------	------------------	------------------

**EXTERNAL/INTERNAL FACTORS:**

External/Internal Factors:

- The lack of significant improvements in Texas A&M's research infrastructure the last two decades has severely hampered student recruitment and research experiences, faculty hiring and retention, and research and scholarship in the classroom. Biological science graduates hold a wide range of jobs that are important to the future growth of Texas.
- Existing climate control and utility services are sub-standard for research projects critical to the state.
- Departments have been unable to apply for grants for better equipment, due to a lack of adequate and state-of-the-art research facilities.
- Texas A&M consistently ranks high (tied for #1) in the state regarding space utilization.

**B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals**

**Attainment:**

Agency 711 exceeded Statewide Building Construction and Commodity goals in both FY18 and FY19 and Statewide Professional Service goal in FY19.

**Applicability:**

Generally, Heavy Construction is not a procurement category applicable to this agency's operations. Limited spend will occur here due to expenses associated with building renovations or parking area construction. All other categories applicable.

**Factors Affecting Attainment:**

Special Trade numbers declined in FY19 resulting from several existing HUB subcontractor certifications expiring, rendering expenditures ineligible for consideration as HUB. Other services impacted by specialized expenditures in research, education and building technologies where a HUB opportunity did not exist.

**"Good-Faith" Efforts:**

Texas A&M made the following good faith efforts to comply with statewide HUB procurement goals in FY 2018-2019:

- \* Collaborated with other TAMUS members to host an annual HUB vendor event to align services with university purchasing needs.
- \* Deployed pre-bid/proposal meetings that ensured information dissemination reflecting the university's procurement and HUB requirements.
- \* Worked with outsourcing partner to increase the opportunities & utilization of HUB suppliers.
- \* Utilized an online e-commerce system with hosted vendor catalogs to facilitate university purchasing. primarily in commodities. Of the 23 hosted catalogs, 14 are HUB vendors.
- \* In accordance with Texas A&M University Rule 25.06.01.M1, every university employee has the responsibility of making a good faith effort of ensuring that HUBs are afforded an equitable opportunity to compete for all procurement and contracting activities of the university.

------	-------------	----------	----------	----------	---------	---------

**USE OF HOMELAND SECURITY FUNDS**

TAMU used \$18,735,147 in CARES Act for direct emergency grants to students with a documented financial need. These funds were to cover eligible expenses under a student's cost of attendance such as food, housing, course material, technology, health care and child care. All funds received for this purpose were expended prior to August 31, 2020.

TAMU will use \$19,035,147 received in CARES Act funding for institutional support to address the following priorities:

- Increased technology costs for a learning management system consultant, for Zoom, for exam proctoring, for virtual open access labs and for other technology that may be needed to move courses to a remote learning environment.
- Investments in enhanced fall course delivery, including synchronous and remote teaching capabilities. This includes cameras in classrooms, technology upgrades in traditional and non-traditional classroom spaces, compensation to faculty for upgraded courses, additional faculty in order to offer more sections of classes, and additional costs incurred due to longer operating hours.
- Investments in enhanced protection for campus. These costs include the purchase of personal protection equipment (PPE), masks, plexiglass, signage, increased cleaning of facilities (especially classroom facilities), HVAC operations (filtering and increased air exchange within buildings), and contact tracing/testing/waste water.

1	Construction of Buildings and Facilities	<p><b>Biological and Chemical Sciences Complex</b>- At Texas A&amp;M, biological, chemical, and life sciences are a traditional strength for our university, as well as a key pillar of undergraduate education. Because these facilities haven't been upgraded for more than two decades, we run the risk of losing top students and are challenged in recruiting leading researchers and retaining our own outstanding researchers who are sought by other universities, many outside Texas. Biology is a basic requirement for many undergraduate majors, and chemistry also impacts many other disciplines. 50% of undergraduates will take at least one chemistry course. This area also engages with medicine, veterinary medicine, and agriculture among others. As the state of Texas' population has grown, so has Texas A&amp;M's enrollment and critical demand for research facilities to support the high-caliber students taking these courses, who will go on to graduate into a wide variety of jobs that are important to the health and prosperity of Texas. The Biological and Chemical Sciences Complex will address this need while also meeting the increased student demand for research facilities that support life science disciplines, particularly for biology and chemistry.</p> <p>The building complex will 1) fill a campus need for the state-of-the-art Biosafety Level (BSL) 2 facilities to support faculty research, with enhanced security for research labs, storage, and disposal of biohazard materials; 2) help recruit faculty who are leaders in traditional and emerging fields of science, by providing faculty support and office space; and 3) provide opportunities for the additional faculty hired, to be more competitive in securing external research dollars (e.g., National Institutes of Health), bringing money back to the state of Texas, and enhancing the cutting-edge research and scholarship in the classroom.</p>	X				\$200,000,000		Tuition Revenue Bond	Yes	No	\$ -	\$ 34,873,824	0001	General Revenue

**Project Description**

At Texas A&M, biological, chemical and life sciences are a strength for our university, and a key pillar of undergraduate education. Because these facilities haven't been upgraded for more than two decades, we run the risk of losing top students and are challenged in recruiting researchers and retaining our own outstanding researchers.

Biology is a basic requirement for many undergraduate majors, and chemistry also impacts many other disciplines. This area also engages with medicine, vet medicine, and agriculture among others. As Texas' population has grown, so has our enrollment and the critical demand for research facilities to support the high-caliber students taking these courses, who will take a wide range of jobs important to the health and prosperity of Texas.

This complex will address these needs while also meeting the increased student demand for research facilities that support life sciences disciplines, particularly for biology and chemistry.

---

**Cyclotron Institute**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1965
Year Non-Formula Support Item Established:	1964
Original Appropriation:	\$186,002

**(2) Mission:**

The Cyclotron Institute is a Department of Energy (DOE) Supported Center of Excellence, jointly supported by DOE and the State of Texas. It is a major technical and educational resource for the state and the nation. The primary functions of the Institute are to conduct basic research, to educate students in accelerator based science and technology, and to provide accelerator capabilities for a wide variety of applications in materials science, nuclear medicine, space science, and analytical procedures. Additionally, the Cyclotron Institute is developing a radioisotope production program. Radioactive isotopes are central to non-invasive diagnostic medical procedures as well as therapeutic nuclear medicine. Through this program, methods of production for medically important radioisotopes will be pursued, resulting in new knowledge, increased availability of these isotopes and students trained in radiochemistry.

**(3) (a) Major Accomplishments to Date:**

The Institute has developed unique technological capabilities and has constructed two cyclotrons, the second a superconducting machine making Texas A&M one of only two laboratories in the U.S. and one of only five in the world to have such a facility. It has become a major resource for development of applied programs in the state. The facility radiation effects line supports testing of aircraft, spacecraft, and satellite electronic parts for NASA and a number of aerospace contractors and semiconductor chip manufacturers (Boeing, McDonnell Douglas, Motorola, Lockheed, etc). Over 100 components of the SpaceX Crew Dragon capsule were tested prior to its trip to space in May 2020 because the facility can create the same radiation that exists in space. The Cyclotron Institute has long been a DOE Office of Science Center of Excellence. In 2018, a new DOE / National Nuclear Security Agency (NNSA) Center of Excellence in Low Energy Nuclear Science was started. This is a recognition of the outstanding research and education ongoing at the Cyclotron. The mission is to provide the research experience necessary to develop the next generation of leaders in the area of low-energy nuclear science, thus supporting workforce and research needs relevant to the NNSA mission. Additionally, the Institute has the ability to contribute to improved health for Texans in the future, by focusing on an important isotope (<sup>211</sup>At) for targeted alpha particle therapy for cancer treatment.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**711 Texas A&M University**

---

With additional advancements in beam current, we anticipate being able to increase the isotope <sup>211</sup>At activity, leading to clinically relevant quantities. Although much of the excitement of targeted alpha therapy is for treating cancer, we have just begun a collaboration with the Texas A&M College of Veterinary Medicine to assess the effect of <sup>211</sup>At on osteoarthritis in dogs. In the next two years, we will carry out this study and grow our collaboration for future work that could lead to new treatment modalities for both animals and humans.

There is an increasing urgent need from the Department of Defense to be able to test electronic components against known radiation exposures. The Cyclotron Institute is the leading location for such testing, and we are developing the appropriate beams on the K150 cyclotron so we can meet this important nuclear security need by providing an additional 1000 hours of heavy-ion beams for such testing.

With the commissioning of a new detector system (TexAT) this past year, the Cyclotron Institute has positioned itself to pursue a suite of experiments that will better understand the formation of the chemical elements. A new separator for Texas A&M's K150 Radioactive Ion beams coupled with the world's largest open source penning trap will enable a discovery science program in physics beyond the standard model. These devices augment the existing equipment and fundamental science programs in the facility.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

Funding by the U.S. Department of Energy, The Robert A. Welch Foundation and the State were started simultaneously in the mid 1960's.

**(5) Formula Funding:**

None

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

2015

\$4,380,000 Department of Energy  
\$496,000 Brookhaven Science Associates  
\$262,000 National Science Foundation  
\$468,000 Robert A. Welch Foundation  
\$3,144,000 Industrial and Private Sources

2016

\$4,200,000 Department of Energy  
\$496,000 Brookhaven Science Associates  
\$262,000 National Science Foundation

**Schedule 9: Non-Formula Support**  
87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

10/23/2020 8:45:30AM

---

**711 Texas A&M University**

---

\$300,000 Robert A. Welch Foundation  
\$3,370,000 Industrial and Private Sources 2017

2017

\$3,907,000 Department of Energy  
\$400,000 Brookhaven Science Associates  
\$415,000 National Science Foundation  
\$300,000 Robert A. Welch Foundation  
\$4,439,000 Industrial and Private Sources

2018

\$4,205,000 Department of Energy – Office of Science  
\$2,000,000 Department of Energy - NNSA  
\$400,000 Brookhaven Science Associates  
\$299,000 National Science Foundation

\$400,000 Brookhaven Science Associates  
\$299,000 National Science Foundation  
\$120,417 Robert A. Welch Foundation  
\$3,000,000 Industrial and Private Sources (this may be lower due to COVID-19)

**(9) Impact of Not Funding:**

---

**711 Texas A&M University**

---

The non-formula item support of the Cyclotron Institute currently provides approximately 8% of the facility funding. The remaining 92% is obtained from external grants and support from TAMU. The special item support leverages over a 12-to-1 return in Institute funding. It provides part of the continuing baseline support first agreed to by TAMU and DOE for this DOE Supported Center of Excellence. Continuing support from the State of Texas was critical to the Institute obtaining funding for the new NNSA Center of Excellence and the DOE Isotope Program grant. Loss of the state line item support would lead to severely curtailed operations and almost certain loss of the federal support for research and operations. This non-formula item has been reduced in previous sessions. Any additional reductions, including the 5% in the current biennium have a significant impact on service levels, research and matching funds.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuu**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

Hours of beam delivered in 2018-2019:

9,893 for radiation effects; 12,106 hours for fundamental science

Number of students in program: 42 in 2019

Number of external users on radiation effects line:

2018 – 350 individuals

2019 – 450 individuals

Other grant support: See Non-General Revenue Sources of Funding

Publications: Approximately 50 papers per year over the past few years (<http://hamilton.physics.tamu.edu/publications/index.php/publications/showlist/year/0>)

**711 Texas A&M University**

---

**Energy Resources Program**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1976
Year Non-Formula Support Item Established:	1976
Original Appropriation:	\$958,072

**(2) Mission:**

Clean, affordable, and sustainable energy is critical to the state of Texas and its consumers, and as a major economic engine that affects the global competitiveness of the United States. For many decades, Texas has led in providing solutions to the energy challenges facing the nation and the world. The Energy Resources Program (ERP) at Texas A&M University was created to provide the state with a concentration of expertise in research, teaching, and public service directed at continuously developing solutions to Texas' and the nation's changing energy and environmental challenges. Texas A&M's ERP maintains programs and provides overarching coordination among multiple colleges, departments, and disciplines that addresses both immediate and long-term needs in an area of major importance to Texas and the national economy. The ERP accelerates advanced and emerging technologies in both renewable and traditional sources of energy by cultivating innovative strategies to maintain the State's leadership in wind power, renewable energy technologies, natural gas production and distribution, and critical issues associated with water use and energy production.

**(3) (a) Major Accomplishments to Date:**

The ERP has played a key role on projects funded by federal agencies and external entities on energy systems engineering, energy scenario analysis, fossil energy research, smart manufacturing for energy efficiency, water reuse, disaster recovery for fuel and chemical supply chains, CO2-capture, and others.

Members serve in leadership capacities for two U.S. Department of Energy-led Manufacturing USA institutes, the Clean Energy Smart Manufacturing Innovation Institute and the Rapid Advancement in Process Intensification Deployment Manufacturing Institute, with federal funding of \$70M each and more than \$200M each in private and university funding. The ERP has helped to fund 37 competitive seed grants to encourage collaborative research, which has resulted in more than 110 publications, presentations, or conference proceedings; 2 patents; more than 50 proposals to federal and private agencies; and successfully funded proposals to external entities totaling more than \$7M in external funds. This has yielded to Texas nearly four times the value in external funding and immense value in research outputs, visibility, and student enhancements.

The ERP catalyzed efforts to educate the general workforce with a curriculum addressing all facets of the energy landscape that naturally connect. Over the last five years, the Texas A&M Energy Institute (EI) has offered numerous seminars, workshops and conferences featuring nationally and internationally renowned energy scholars.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**711 Texas A&M University**

---

Through the EI, the ERP funds will be leveraged to advance energy education, research, and partnerships in six strategic areas: a) For the expansion of the university-industry collaboration and Faculty Affiliate membership to all relevant members of the A&M System. b) For student engagement through further partnering with the Texas A&M Energy Research Society to increase participation in the annual Conference on Energy led by students. c) To increase collaborative research and leadership roles in major proposal submissions by Texas A&M faculty teams with other universities and national labs, including National Science Foundation Engineering Research Centers, Major Research Instrumentation Program and Energy Frontier Research Centers. d) For workforce development, the Master of Science in Energy and Certificate in Energy programs will draw more participants from industry and will look for remote offerings in addition to the face -to-face and distance offerings. e) For industry partnerships, expanding its industrial partner's base for education, research, collaboration, and student recruiting. Finally, f) to increase international collaborations through new research collaborations, faculty exchanges, and sponsored students.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

None

**(5) Formula Funding:**

None

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

The ERP funds were used to bring in additional external funds to the State of Texas for energy research and education. The annual awards from federal, private, and other non-general revenue sources are as follows:

2016 - \$74.1M

2017 - \$72.0M

2018 - \$81.8M

2019 - \$82.1M

2020 - \$86.2M (estimated)

**(9) Impact of Not Funding:**

---

**711 Texas A&M University**

---

A loss of funding will impede the mission to pursue new approaches for energy research, education, and partnerships. Funds are leveraged to engage in areas of energy, economics, law, public policy, and the environment. Many opportunities would not be possible without funding grounded in research and collaboration, education of future leaders, and industry relationships. This non-formula item has been reduced in previous sessions. Any additional reductions, including the 5% in the current biennium have a significant impact on service levels provided.

Energy is critical to the economy of Texas and the well-being of its citizens. According to the U.S. Energy Information Administration, Texas produces more electricity than any other state. Texas is also the top U.S. producer of both crude oil and natural gas. In 2019, the state accounted for 41% of the nation's crude oil production and 25% of its marketed natural gas production. Texas leads the nation in wind-powered generation and produced about 28% of all the U.S. wind-powered electricity in 2019. Texas wind turbines have produced more electricity than both of the state's nuclear power plants since 2014. Leveraging of the ERP funds into this critical component of the state's economy has been dramatic. Without this investment, it will be difficult to attract the historic levels of federal and industry investment in the EI and in the state's energy future.

**(10) Non-Formula Support Needed on Permanent Basis/Discontin**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

The overall return on the ERP investment, as measured by the additional external funds generated, will be a metric; currently we are leveraging the ERP funds about 268:1. We will also continue to monitor the impact we have on workforce development and training through participation numbers and direct feedback from our industry and government partners.

---

---

**711 Texas A&M University**

---

**Institutional Enhancement**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2020
Year Non-Formula Support Item Established:	2020
Original Appropriation:	\$27,500,000

**(2) Mission:**

Texas A&M University has added 17,000 students since 2008, and Institutional Enhancement is used to support the success of these students. Specifically, Institutional Enhancement is used to invest in:

- Student Success Initiative to improve graduation and retention rates, and reduce and eliminate disparities for first generation and underrepresented students
- Enhancements to graduate programs
- Development of key focus areas in data science/artificial intelligence, biology and nutrition, technology commercialization, early childhood education, an undergraduate neuroscience degree and expanded diversity support
- Academic innovation for instructional design and enhanced online learning, and teaching innovation grants that target areas such as interdisciplinary programs, active learning, teaching in large classes and distance education
- Targeted faculty hires in colleges/programs impacted by student growth

**(3) (a) Major Accomplishments to Date:**

- Increases to first-year retention (92.1% to 93.2%) and four-year graduation rates (56.2% to 59%) across the university;
- Increases to first-year retention (86.6% to 88.1%) and four-year graduation rates (50.3% to 54.5%) for first-generation students;
- Increases to first-year retention (86.1% to 89.1%) and four-year graduation rates (50.2% to 54.4%) for students from families making less than \$60,000 a year.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

In addition to continued increases in graduation and retention rates, and decreases and elimination of disparities for first generation and underrepresented students, the additional request for FY22-23 will:

- Continue enhancing the university's transfer capacity and their academic success
- Improve classroom engagement
- Increase the university's faculty numbers to address steep declines in tenure-track faculty
- Increase tenure-track faculty who teach lower division courses (rapid growth has driven these numbers well below the state THECB peer group)

This, along with our FY22-23 request, will also result in economic diversification for Texas. In FY19-20, our faculty contributed to Texas A&M's statewide financial impact through research spending (\$980 million), start-up, and spin-off companies (\$1.1 billion).

---

711 Texas A&M University

---

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

None

**(5) Formula Funding:**

None

**(6) Category:**

Institutional Enhancement

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Institutional enhancement funds supplement insufficient per student funding and allow specific targeted investments in student success programs. Additional hiring is also supported from state formula funding and tuition and fees.

**(9) Impact of Not Funding:**

A total loss of this funding would result in the elimination of class sections, increased time-to-degree and student debt levels, decreased graduation and retention rates, an undesirable learning environment for students, the possibility of enrollment reductions, and Texas continuing to lose the most high-caliber students and their intellectual and economic contributions to other states.

After seeing positive results from our investment of strategic faculty hires that support our Student Success Initiative, a 5% reduction in our base for FY22-23 would severely hamper the momentum we have achieved to date.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

The impacts of this funding will be reviewed and tracked through metrics such as retention and graduation rates and the student-faculty ratio. These metrics are expected to show improvements over time as students begin to benefit from these strategically focused investments.

---

**711 Texas A&M University**

---

**School of Architecture**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1992
Year Non-Formula Support Item Established:	1991
Original Appropriation:	\$1,000,000

**(2) Mission:**

The vision of the Texas A&M Colonias Program (COLN) at Texas A&M University (TAMU) is to serve some of Texas' most isolated and economically distressed rural communities where most residents live without one or more major infrastructures, such as basic access to potable water. The program seeks to enhance the quality of life for the residents that live in these Colonias communities along the Texas/Mexico border and in other economically distressed areas of Texas.

The mission of the COLN is to identify livability, resilience, and sustainability problems in the Colonias communities, and partner with various organizations in the public and private sector to develop and deliver solutions in six dimensional areas: (1) Health and Human Services, focusing on the well-being of individuals, families, and communities; (2) Education and Workforce Development; (3) Economic Development; (4) Planning and Design of rural to urban environments; (5) Critical Civil Infrastructure Systems, with an emphasis on water, energy, transportation/mobility, sewage and stormwater, and communication systems; and (6) Affordable Housing and Community Facilities.

**(3) (a) Major Accomplishments to Date:**

- Served some of the state's regions that were hardest hit by COVID-19 through partnering with community groups to organize grocery deliveries and provide information about COVID-19 prevention methods. Mini-medical units (40 foot converted containers) were distributed across the state and have been used for COVID-19 testing and other clinical purposes.
- Partnered with the 5th Army North Innovative Readiness Training (IRT) to deliver critical services to colonias communities that included resurfacing roads and delivering general medicine, dental and optical procedures. Webb County reported a total of \$10.4 million dollars that has been generated, and the majority of the grant money will be used to improve infrastructure services into the 62 identified colonias in the county.
- Developed strategies for improving census response rates to help increase funding in the state.
- Awarded a border-wide grant for \$500,000 per year for the next three years by the USDA Supplemental Nutrition Assistance Program (SNAP), with a focus on increasing food security and reducing hunger, and providing children and low-income people in the colonias with access to food, a healthy diet, and nutrition education.
- Involved in developing and executing relationships with the Isleta (Tiguas) Reservation in El Paso and the Kickapoo Reservation in Eagle Pass, and continues to develop additional partnerships that will include developing technology and training approaches in rural communities.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

---

**711 Texas A&M University**

---

- Continue to meet the basic needs of those impacted by COVID-19 and slow the spread of the virus. As part of the Texas A&M Health Science Center/Texas Health contact tracing campaign, the COLN has been tasked in hiring 100 contact tracers, 100 case investigators, and eight epidemiology leaders to be part of the statewide COVID-19 contact efforts through the Texas Department of Health and Human Services (TDHHS). The COLN training program dedicated to training community workers prompted the assignment of this task. Based on previous successes, the COLN has two requests to convert 40-foot containers into Emergency Command Centers.
- Scheduled an IRT medical mission for Webb County for Spring 2021 and an IRT medical and civil affairs mission to Nueces County for Summer 2021. Another IRT mission to Maverick County is pending approval for 2021. These missions could easily generate 15-20 million dollars in economic development for colonias. These counties do not have the funding streams nor the tax base to produce the contributions to medical services and infrastructure development.
- Submitted a second SNAP grant proposal for \$200,000 per year for the next three years for the TIGUA reservation and is awaiting approval.
- Exploring possible collaboration with the Texas A&M Law School in the identification of legal needs in colonias and other economically distressed areas.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

None

**(5) Formula Funding:**

None

**(6) Category:**

Public Service

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

Funding above legislative allocation (University + External Grants Funding):

FY 2017: \$ 1,873,280

FY 2018: \$ 1,914,672

FY 2019: \$ 1,553,608

FY 2020: \$ 1,198,214

**(9) Impact of Not Funding:**

---

**711 Texas A&M University**

---

Not funding the COLN program will have a significant negative impact on the residents of the colonias because they are some of the most isolated and hardest hit by COVID-19 in Texas. Networks that coordinate grocery distribution may be disrupted. Efforts to slow the spread of the virus will be compromised if funding is not available to pay the COLN staff to fulfill the needs of the contact tracing campaign. Even after the pandemic ends, the health of the communities will suffer if staff are not able provide resources on important health issues.

The livelihoods of the residents in these areas will also be threatened if COLN staff are eliminated and not able to connect these communities with the resources and service providers needed. If administrative staff are cut, grant funding that funds other employees could be threatened.

This non-formula item has been reduced in previous sessions. Any additional reductions, including the 5% in the current biennium have a significant impact on service levels provided. Not funding or a reduction in funding will impact the ability to identify and establish strategic partnerships and alliances; secure external funding that serves the residents of the colonias across its geographic area; and support efforts like the 5th Army North IRT and the mobile mini-facilities. With further reductions, COLN would probably have to close one of its regions, which could easily equate to a \$6M loss in economic development.

**711 Texas A&M University**

---

**Sea Grant Program**

<b>(1) Year Non-Formula Support Item First Funded:</b>	1968
Year Non-Formula Support Item Established:	1968
Original Appropriation:	\$52,861

**(2) Mission:**

The Texas Sea Grant College Program at Texas A&M University was created to improve the understanding, wise use and stewardship of Texas' coastal and marine resources. To achieve this mission, Texas Sea Grant directs its research, outreach and education programs to benefit the citizens, businesses and communities of Texas – from providing grants and scholarships that benefit students and workforce development, to funding Texas' innovative researchers to solve real-world problems, to deploying a boots-on-the-ground extension team to help industry in Texas be more competitive in a global marketplace and coastal communities to grow sustainably and build resilience to impacts from storms and other hazards.

This unique partnership unites the resources of the federal government, the State of Texas, industry and universities across the state to create knowledge, innovative tools, products and services that benefit the Texas economy, environment and citizens. Texas Sea Grant yields a 20:1 return on investment – for every state dollar invested in Texas Sea Grant, it returns more than \$20 to the Texas economy. Additionally, the program receives federal funding that requires a match of one state dollar for every two federal dollars received.

The Texas Sea Grant College Program is part of a national network of Sea Grant programs in coastal and Great Lakes states. The network is funded by the National Oceanic and Atmospheric Administration (NOAA) in partnership with the states.

**(3) (a) Major Accomplishments to Date:**

- Supported workforce development in Texas by funding curriculum development for university-level programs in STEM fields (science, technology, engineering and math) and providing scholarships, fellowships and research grants to students.
- Awarded over \$50 million in competitive research grants to Texas state universities.
- Introduced experimental, fuel-efficient fishing gear that saved Texas fishermen between 20 to 39 percent in fuel costs, valued at tens of millions of dollars.
- Reduced by-catch of commercially and recreationally important fish and endangered sea turtles by the Texas shrimp fishing industry, which have restored fish stocks, saved species and sustained Texas' recreational fishery and commercial fishing industry.
- Built coastal community capacity to keep Texans, their homes and their businesses safe during and after hazardous events such as coastal storms, hurricanes, harmful algal blooms and oil spills.
- Created a statewide beach cleanup program to keep Texas beaches clean and safe.
- Made Texas coastal waters cleaner by educating the boating public and marina business owners about "clean boating best practices" for handling refuse and boat-generated waste.
- Developed a state-wide Monofilament Recovery and Recycling Program to educate Texans and remove over 1,000 miles of used fishing line from our coast.
- Led efforts to attain protective status for the Flower Garden Banks, which led to its designation as a National Marine Sanctuary in 1992.

---

**711 Texas A&M University**

---

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

- Following the passage of HB1300 in the 86th Legislative session, develop an education, outreach and engagement program to support Texas' new Cultivated Oyster Mariculture Program and industry.
- Award \$1.6 million in competitive research grants to Texas state universities and \$250,000 in scholarships, fellowships and research grants to university students.
- Ensure a safe, secure and sustainable supply of seafood to meet public demand.
- Inform Texans about the health benefits of seafood consumption and how to evaluate the safety and sustainability of the seafood they buy .
- Reduce by-catch of commercially and recreationally important fish and endangered sea turtles by the Texas shrimp fishing industry .
- Develop a future workforce that is skilled in science, technology, engineering, mathematics and other disciplines critical to local, state, regional and national needs.
- Teach Texas coastal communities to use comprehensive planning to make informed strategic decisions to increase their resiliency to hazards and extreme events .
- Improve Texas water resources to sustain human health and ecosystem services.
- Protect, restore and enhance Texas coastal habitat.
- Improve ecosystem services by enhancing the health, diversity and abundance of fish, wildlife and plants.
- Promote and support the use of ecosystem-based approaches to manage land, water and living resources.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

Since Congress established the National Sea Grant College Program, the State of Texas has provided the matching funds required to receive federal funds. There was no funding source prior.

**(5) Formula Funding:**

None

**(6) Category:**

Research Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

The primary source of funding for Texas Sea Grant is through NOAA's National Sea Grant College Program. Core federal funding provided the program with \$3.9 million for the 2018-19 biennium. Core funding is supplemented by special NOAA competitions, funds available only to state Sea Grant programs. As much as \$1 million may be awarded annually through these competitions. Texas Sea Grant also wins competitive grants and contracts from federal, state, corporate and not-for-profit sponsors. These grants and contracts provide additional revenue sources and leverage the program's core federal funds. During the 2018-2019 biennium, Texas Sea Grant received more than \$1 million in additional funding from grants and contracts.

**(9) Impact of Not Funding:**

---

**711 Texas A&M University**

---

The Texas Sea Grant College Program receives its federal funding in the form of a grant from NOAA, and this grant requires a match of one state dollar for every two federal dollars received. There are no other sources of state funds available to support the Texas Sea Grant College Program.

The consequences of not funding this non-formula item are (1) the federal funds discussed in Section (8) above will not be received by the State of Texas to support research, outreach and education (2) the Texas Sea Grant College Program will end (3) Texas A&M University will no longer be a Sea Grant Institution and (4) the State of Texas will lose millions of dollars in direct and indirect economic benefits derived from Texas Sea Grant program activities. This non-formula item has been reduced in previous sessions. Any additional reductions, including the 5% in the current biennium have a significant impact on service levels, research and matching funds.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuu**

Permanent

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

The specific criteria reviewed align with those required by our federal sponsor. Every year Texas Sea Grant submits an annual report required by NOAA to determine if progress has been made toward achieving goals identified in our state strategic plan. In this annual report, Texas Sea Grant reports progress toward specific performance measures and metrics and reports impacts and accomplishments. Every four years, Texas Sea Grant is reviewed by an external committee during a site visit held at Texas A&M University to determine if the program meets the Standards of Excellence per <https://www.gpo.gov/fdsys/granule/CFR-2017-title15-vol3/CFR-2017-title15-vol3-sec918-3>, which includes meeting the goals and objectives identified in the program's strategic plan and meeting targets for performance measures and metrics. The last program review was conducted in 2019 and it was determined that Texas Sea Grant meets the Standards of Excellence.
