### 749 Texas A&M University - San Antonio

---

Texas A&M University-San Antonio (A&M-SA) is a contemporary university reflecting the diverse and vibrant community it serves. Founded as a stand-alone institution by the legislature in 2009, it was the first upper-division institution of higher education in South San Antonio. A&M-SA today is a comprehensive four-year university offering affordable high-quality education embodying the rich cultural history of the surrounding San Antonio communities. We just celebrated our 10-year anniversary and take pride in being a pathway to success for many first-generation students and a key socio-economic engine for our diverse student population. As an official Hispanic Serving Institution (70% Hispanic), we expect to have among the highest retained and graduated students from historically underserved populations. Some bright spots and recent milestones include:

- Welcomed our inaugural class of freshman students in Fall 2016
- Became the first university in the nation to mandate military cultural competence training for faculty and staff
- Designated as a National Center for Academic Excellence in Cyber Defense Education by the National Security Agency
- Expanded new academic programs in Water and Cyber Security
- Expanded campus-wide financial literacy programs with private support

A&M-SA is one of Texas' fastest growing universities. Enrollment has grown by 47% since 2015 (from 4,564 in Fall 2015 to 6,714 in Fall 2019). Please see Graph 1 showing enrollment trends. The University is entering its fifth year as a comprehensive university and, prior to the global pandemic, was anticipating momentous growth from its current enrollment. The success story of growth the University has experienced goes beyond numbers. A&M-SA's comprehensive expansion in Fall 2016 included student-centered programs to increase degree completion rates, provide greater control over learning outcomes and skill development, and decrease the amount of debt students may incur as a result of lost transfer credit.

In addition to continued growth in teacher education at both the undergraduate and graduate levels, the University is expanding its signature cyber security programs and moving into the engineering technology arena. Since Fall 2018, students have been able to earn the Cyber Defense Certificate as part of their Computer Science degree programs by choosing appropriate electives. A&M-SA now offers a Bachelor of Science in Cyber Engineering Technology as well as a BS in Electronics Systems Engineering Technology.

Faculty, staff and administrators are committed to a student-centered environment where students and their success are always at the forefront and top priority. The next stage of expansion includes more undergraduate and graduate programs to meet the changing demands of the growing student body and the economic need for an educated workforce in our region.

A&M-SA is well-positioned for continued enrollment growth as the result of its comprehensive expansion to further serve the needs of the growing citizenry of San Antonio and the surrounding region. Funding reductions planned for Expansion Funding and a baseline reduction significantly curtail progress the University had expected for the next few years. Funding reductions to a new university shortly after transitioning to a comprehensive university is especially deleterious, given the lag in formula computation. The University's mission and Texas' 60x30TX Strategic Plan for increasing educational attainment statewide both highlight the need for increased support for this University.

#### BASELINE REQUEST:

Our appropriation request is for base funding equal to the 2020-21 base, as adjusted for the 5% reduction (\$2,387,677) mandated by the policy letter from State leadership. Administration has implemented organizational restructuring and efficiencies leading to cost-saving measures during the current biennium. Cost savings from these

## Administrator's Statement

Automated Budget and Evaluation System of Texas (ABEST)

---

### 749 Texas A&M University - San Antonio

---

efficiencies are redirected to student-related expenses. Funding at 95% of 2020-2021 base will negatively impact the University's synergy and momentum that it has gained in providing direct services to students or to programs established to ensure student success, especially for historically underserved populations. Please see Graph 2 showing retention rates for 1st term students.

#### SIGNIFICANT CHANGES:

Texas A&M University-San Antonio welcomed its first class of freshman students in fall 2016. The University and its constituents are extremely appreciative of the support received from the Legislature to enable the transition to a four-year university. This major accomplishment was a response to the ever-growing need for quality higher education on the South Side of San Antonio and in the surrounding area. A special report in the San Antonio Express-News states that officials expect the population of Bexar County, presently at 1.9 million, to grow by another 1.1 million by the year 2040. In order to meet the demands this population growth will place on the region, A&M-SA is dealing with the challenges of transitioning to a comprehensive university by implementing new programs and practices that will ensure the region and Texas have an educated, well-trained workforce. A&M-SA is listed in the City of San Antonio's SA Tomorrow as a regional center.

The major changes the University is implementing include:

- Recruitment of Top 10% high school graduates doubled between Fall 2018 and Fall 2019. The number of Top 10% students admitted for Fall 2020 shows a 14% increase. Please see Graph 3 showing progress made in recruiting Top 10% students.
- Developed agreement with seven school districts that surround the University. The A&M-SA and South Bexar County Partnership to Impact Regional Equity (ASPIRE) was formed to create a framework for the districts and the University to work in collaboration on numerous issues that impact our shared community.
- Under the guidelines of SB 1882, 85th Legislature, formed the Institute for School and Community Partnerships, a non-profit entity responsible for the management of in-district charter schools and other relevant partnerships. The Institute formed a partnership with Edgewood ISD to operate the Burleson Center for Education and Innovation and the Gus Garcia University School (a middle school).
- The Henry G. Cisneros Institute for Emerging Leaders was established in Fall 2019 to serve as an incubator of leadership talent to serve the nation. Students participating in programs will be well-prepared to solve some of our region's most pressing problems. The Institute sponsored two signature initiatives, the Fall Leadership Conference and the Emerging Leader Certificate program.
- The Mays Center for Experiential Learning and Community Engagement provides enhanced learning opportunities and access to resources and relationships to develop students into career-ready and community-minded graduates. The Mays Center houses Career Services, Civic Engagement, and Experiential Learning offices and support opportunities including financial literacy programs, a career clothes closet, and the campus food pantry.
- The University's Department of Computing and Cyber Security received a grant from the Texas A&M University System Chancellor's Research Initiative to create the Cyber Engineering Technology/Cyber Security Research Center.
- A&M-San Antonio established a partnership for the Bexar County Fostering Educational Success (BCFES) Pilot Project with Alamo Colleges, the University of Texas at San Antonio, CASA Advocates, Child Protective Services, and the Bexar County Court System. A&M-SA served 56 foster and adopted youth in the first year of the

---

**749 Texas A&M University - San Antonio**

---

program and established a Center offering wrap-around services to foster and adopted youth.

**HISTORY OF A&M-SA:**

Texas A&M University-San Antonio was first established in San Antonio as a Texas A&M University System Center in 2000. The establishment of the System Center expanded access to higher education for residents of the South Side of San Antonio and 32 counties in South Texas, an area that has been historically underserved in terms of higher education.

In 2005, the City of San Antonio committed to provide support and infrastructure for a campus on the South Side of the city. The Texas A&M University System approved a \$40 million Tuition Revenue Bond (TRB) in 2006 for Phase I construction on a new campus. In 2007, the Verano Land Group donated 694 acres of undeveloped land on the city's south side for the construction of a new campus.

In 2009, SB 629 established Texas A&M University-San Antonio as a stand-alone institution and cleared the path to accessing the TRB funding for Phase I of the permanent campus. In 2016, the Legislature provided funding allowing A&M-SA to downward expand from an upper-division only university to a comprehensive, four-year institution. From Fall 2009 through Fall 2019, overall student enrollment has grown dramatically.

The Science and Technology Building, funded with TRB funds, opened in the Fall of 2018, providing more than 27 new classrooms and labs and impressively enhancing science and technology offerings. Rapid expansion continues to put pressure on facilities. Two temporary modular classroom buildings were added in 2017 to give the University an extra 17 classrooms. Also in 2017, the Texas A&M Board of Regents approved PUF funding for a new classroom building, known as Classroom Hall, to provide an additional 19 classrooms. This building opened in the Fall of 2020. To provide sufficient classrooms and labs to accommodate expected growth, Phase II of the classroom building is currently in the design phase and is scheduled for occupancy in Fall 2022. This much-needed facility will provide additional classrooms, permanent University library space, and house the College of Business.

According to the Campus Master Plan developed in 2017 and updated in 2019, the campus will eventually grow to accommodate student enrollment of 25,000 to 50,000 depending on vertical growth. This will include the construction of additional academic buildings, athletics and outdoor recreation areas, student housing, dining and food services, and conference and meeting space.

**MILITARY EMBRACING:**

As a military embracing University, there is a focus on supporting those currently serving, veterans and their dependents. The Office of Military Affairs was established to assist and support active duty, reserve, National Guard, veterans and their families to prepare them for successful careers in the civilian workforce. The office currently serves approximately 1,300 students.

The Patriots' Casa is designed for veterans, wounded warriors, and other students from the military community. Space and programs of the Casa support co-curricular activities and training for veterans and their families as they make the challenging transition from warrior to scholar and beyond, to a civilian career in their chosen field.

A chapter of the Student Veterans of America (SVA) was established at A&M-SA to provide collegial and fraternal mutual assistance, a friendly community of common experience, and ample opportunities for community service. The SVA is a student-run organization and supports opportunities for veterans and all military community students enrolled or interested in enrolling at the University. A&M-SA has created the only national honor society (SALUTE) in the U.S. that honors the service and

**749 Texas A&M University - San Antonio**

---

scholastic achievements of this generation's great veterans.

**Impact of 5% Reduction Plan:**

As a public institution, A&M-SA is committed to responsible stewardship of all resources, including State appropriations. As a university situated in one of the fastest growing regions and cities in Texas, and one serving primarily first-generation, underrepresented populations, A&M-SA anticipates a long-lasting impact of the fiscal reductions, with limited pathways for recovery. Having just undertaken downward expansion in 2016, the University is still developing the basic infrastructure needed to support growth and emerging operations that are still in their infancy. Thus, additional cuts disproportionately impact a vulnerable population and the campus growth trajectory. The current economic situation requires prudent fiscal planning to account for unknown revenue variables such as student enrollment, coupled with the rescission and potential future reductions in appropriations.

In response to the request by the Governor and the Legislative Budget Board, A&M-SA will return 5% of General Revenue appropriations for fiscal years 2020 and 2021. The impact on A&M-SA for the biennium is \$2,387,677. This cut results in the loss of 15 faculty FTE.

**Impact of COVID-19 Pandemic:**

Like all other universities across the nation, A&M-SA has had to adapt quickly to respond to the global pandemic. Following an extended spring break, all courses were converted to on-line delivery; this delivery method was extended into the summer 2020 sessions. Summer credit hours and number of students enrolled exceeded both projections and the prior year. As the University opened for Fall 2020 classes, it adopted its course offerings to a multi-modal delivery, a blend of online and in-person courses, using an innovative block course model (primarily for freshmen.) In-person classes will be taught in rooms at less than 30% occupancy.

To maintain academic quality and a successful learning environment via digital delivery, and ensure accessibility to course materials, the University has invested in enhanced information technology training for faculty, and additional support for students. Because of the digital divide –lack of digital access in the community we serve – A&M-SA must provide laptops and software to students who otherwise would not be able to access their courses.

The traditional student enrollment process has been in a state of upheaval in response to the COVID-19 pandemic. Standard practices – high school visits, campus tours, orientation sessions and other direct connections – have been replaced with virtual engagements, to varying degrees of success. This makes it more difficult for students and families to make what is among the most important decisions that they have to make about the future.

Procurement of supplies for fall, including supplies necessary to support social distancing and public health standards, continues to be an ongoing challenge. Redesigning spaces to ensure appropriate social distancing is costly, but necessary to accommodate on-campus activities.

As of July 2020, the University incurred approximately \$2.5 million in COVID-19 expenditures, with an additional \$2.6 million expected to be expended by August 31, 2020. Of the total \$5.1 million anticipated to be spent in FY 2020, \$4.6 million is expected to be covered by CARES Act funds. However, we anticipate ongoing expenses continuing throughout FY 2021. These ongoing expenses include: COVID testing for students, faculty, and staff; providing personal protective equipment; frequent cleaning and re-sanitizing classrooms and other spaces; additional faculty required to enforce social distancing requirements; and rental of temporary facilities to provide additional classrooms needed for social distancing.

---

**749 Texas A&M University - San Antonio**

---

**EXISTING NON-FORMULA FUNDING ITEMS:**

It is critical and essential that A&M-SA retain its current non-formula funding to support its recent transition to a comprehensive university. The existing non-formula items, Expansion Funding and Institutional Enhancement, are vitally important to student success and timely graduation rates at A&M-SA, particularly for an institution with historically underserved populations. Over 50% of our undergraduates receive Pell Grants. The ability to hire the necessary faculty to deliver quality instruction is made possible through these appropriations. All of these funds are “base” funding in the University’s operating budget just like our formula funding. The loss of this funding, even the 25% reduction of Expansion Funding as provided by rider language, along with other base funding reductions would severely impact the core academic activities of the University.

The Legislature has provided essential funding to A&M-SA and five of the state’s other smaller regional institutions in order to enable them to better meet the growing higher education needs of their communities and the state. The 86th Legislature cut this funding and included rider language to establish phasing out of this funding. Given the unprecedented financial hardships due to the COVID-19 pandemic and the essential education and workforce training the institutions provide, we request these items be treated similarly to other non-formula support items, without a 25% cut in this biennium, and deletion of the corresponding rider.

**EXCEPTIONAL ITEMS:**

A&M-SA recognizes that Texas faces a significant budget deficit and economic uncertainty. However, it is important to request two exceptional items in order to plan for future programmatic opportunities. The funding of these exceptional items will positively impact the quality of life in San Antonio and South Texas. They will provide the resources necessary to continue developing the University and meeting the goals of the state’s higher education strategic plan.

Restoration of 5% reduction to the 2022-2023 Base – \$1,013,412

Fully cognizant of the significant budget deficit and economic uncertainty that faces state government, our number one priority is to request restoration of the 5% reduction to the 2022-2023 base. As a university situated in one of the fastest growing regions and cities in Texas, and one that serves primarily first-generation, underrepresented populations, A&M-SA anticipates a long-lasting impact of the fiscal reductions, with limited pathways for recovery. Having just undertaken downward expansion in 2016, the University is still developing the basic infrastructure needed to support growth and emerging operations that are still in their infancy. Thus, cuts disproportionately impact a vulnerable population and the campus growth trajectory.

The most negative impact of the reduction to base funding is elimination of faculty and instructional positions. This impacts course offerings for students, which may result in larger class sizes, fewer course sections and fewer faculty available for mentoring students. This impact is amplified by the need to maintain appropriate social distancing in face-to-face classroom settings. The effect of not restoring the funding is a reduction of 12 faculty FTE, equivalent to approximately 95 class sections per year.

Student academic support services are critical for the success of first generation, low-income and historically underrepresented minorities; there are equity concerns to consider in maintaining quality systems for student success. Position elimination results in providing fewer services to students and other stakeholders, primarily in the areas of student success coaching, library, technology support, admissions, financial aid, and business services. This may result in longer wait times to address student needs and impact student success in retention, satisfaction, and graduation rates. Lack of staff to support research will negatively impact efforts by faculty to gain external funding for projects enhancing the overall quality of educational and research opportunities available to students.

---

**749 Texas A&M University - San Antonio**

---

Finally, the reduction to base funding will impact travel, campus events, faculty and staff development and technology purchases, as well as general operating expenses. These reductions impact continuing professional development for employees and faculty opportunities to share scholarly research. The reduction in campus events will negatively affect students' learning experiences and engagement. There is a disproportionate impact on first generation students who would otherwise benefit from faculty and mentor engagement and cocurricular learning. Reductions in technology impact an atmosphere of discovery and support for students as well as faculty instructional settings.

Providing STEM+H Education for Traditionally Underserved Populations: \$7,500,000

A&M-SA requests support for development of new Public Health and Healthcare Management Program initiatives (STEM+H) seeking to address preventive health, health education and social determinants of health, and access and equity issues in health care through STEM+H education and training of our traditionally underserved student population.

The Public Health Program curriculum will be designed for students to achieve competencies informed by traditional public-health core-knowledge areas—biostatistics, epidemiology, social and behavioral sciences, health-services administration, and environmental health sciences—and that cross cut emerging public-health areas.

The requested funding will help build the campus infrastructure for introducing a new Public Health academic programs initiative in collaboration with the Texas A & M School of Public Health. The goal is to create a new 100% online MPH program, extend the BS in Environmental Health program to A&M-SA (with online and face-to-face mixed models), and develop a Healthcare concentration in the existing MBA program. The requested funding includes support for:

- New health-data analysis and research labs
- Public-health laboratory instrumentation
- Equipping and servicing labs
- Full-time lab staff positions
- Health-science librarians
- Community-outreach specialists
- Tenure- and non-tenure-track faculty

A&M-SA is focused on providing educational opportunities for socioeconomic transformation, but the challenges are many. As articulated in a study by the Intercultural Development Research Association, the neighborhoods in the seven school districts surrounding A&M-SA are among the most economically challenged areas in San Antonio. This contributes to a health divide (limited access to health programs), which then leads to further economic, social, and health disparities for low-income and underserved populations.

Without the funding necessary to expand STEM+H programs and support the development of public health and healthcare-management programs, our students will continue to face obstacles to educational and career preparedness in disciplines of greatest need, at a time when the entire world, including the United States and Texas, are reeling under the effects of a pandemic that has significantly impacted people's lives, especially those who are underserved by access to food and health care. In short, the health divide will become more profound.

Capital Request

---

**749 Texas A&M University - San Antonio**

---

Debt Service on TRB requested for Public Health and Education Building - \$ 13,077,684

Though the University is fully cognizant of the significant budget challenges and economic uncertainty facing the state, this request is important to continue developing the infrastructure that will accommodate future growth. This Tuition Revenue Bond Project request, Public Health and Education Building, will provide the campus's first teaching auditorium, technology-enabled/computer classrooms, public health research labs, health data/statistical analysis labs, and operational support facilities for public health graduate and undergraduate programs and the healthcare MBA program. This request is for an 80,000 GSF building.

Key to our growth and the mission of A&M-San Antonio and the Texas A&M Public Health program, this academic and community outreach facility will provide necessary spaces to (1) prepare high-quality public health scientists, educators, and specialists to meet the Texas workforce shortages in public health, healthcare management, and STEM+H specialty areas, and (2) provide necessary services to improve health and quality of life.

The building will enable A&M-SA to develop a campus-based contemporary public-health research center. The development of a state-of-the-art center for public-health research, education, and outreach will immediately impact the health of the people in Bexar County and across South Texas. Additionally, two centers will likely be housed in this facility: the Center for School Partnerships and the Center for Applied Behavioral Analysis.

Underserved Texas regions represent a large concern for the continued health and socioeconomic development of Texas, Bexar County, and the city of San Antonio. The growth of Public Health and Healthcare programs is critical to ensuring that our local and regional health districts are provided the best-trained health personnel possible, particularly as the region looks forward to a prolonged period of major population growth.

#### **PRIORITY NEEDS FOR THE TEXAS A&M UNIVERSITY SYSTEM**

We recognize the difficult financial situation and tough budget decisions facing the 87th Legislature, and will work collaboratively with state leaders to find the support needed for the education, research, and service we provide. A robust higher education sector is key to long term economic growth and resiliency, but increased costs, revenue losses, and budget reductions due to the pandemic have Texas' higher education sector stressed and stretched. We request continued investment in higher education to maintain our service to the state. Key funding issues are detailed below:

**Base Funding** – Maintaining equitable, reliable, and predictable funding for higher education is critical for our institutions to plan, teach, and support students through to graduation and to pursue excellence. This base funding is provided by the State through both formula and non-formula support.

**Formula funding** accounts for 80 percent of our institutions' net GR appropriations and supports the core instructional, operational and infrastructure costs at our institutions. Our highest priority is maintaining the general revenue support to these formulas.

As higher education adapts to the financial hardships of COVID-19, non-formula items provide critical support for students and academic programs. We request that non-formula support items be maintained at FY2020-21 levels to preserve vital academic programs and student support services.

We request expansion of the Small Institution Supplement (SIS) to institutions up to 20,000 headcount. These institutions and their students' success are key to economic recovery and long term resiliency. Expanding the SIS up to 20,000 students would provide critical support to help these institutions remain affordable for students and effective in fulfilling their missions.

**Administrator's Statement**

10/22/2020 11:51:11AM

87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**749 Texas A&M University - San Antonio**

---

Restoration of 5% Reductions – Across the A&M System the reductions total \$84.6 million. These reductions hurt. Our institutions had to cut into the teaching and services provided to our students that impact, and will continue to impact, their success and time to degree. Continuing these reductions into the 2022-23 biennium will further harm our students.

Outcomes Based Funding – Any performance funding contemplated as part of state support for higher education should be in addition to formula funding , especially as institutions struggle with the economic fallout from the pandemic. While this session may not be optimal timing for a major funding initiative, we have worked across higher education on a proposal for increased student success at Texas' 27 regional institutions and can provide additional information as requested.

Higher Education Group Health Insurance – We request funding to cover increases in covered enrollments and in health care costs beyond our control . We also request restoration of the gap in funding for our employees compared to state employees in the ERS group plan.

Student Financial Aid – Increased support for student financial aid is vitally important to help students graduate with lower debt . We request increases to TEXAS grants and other financial aid programs be made in conjunction with funding the formula that provides the state's share of the costs of educating students .

**CRIMINAL BACKGROUND CHECKS:**

Criminal background checks are conducted by A&M-SA under Texas Education Code Section 51.215 and Texas Government Chapter 411 Subchapter (f). In addition, A&M-SA abides by a University rule on criminal background checks approved in compliance with System Policy 33.99.14. All employment positions, including student workers, adjunct, part-time, and temporary, at the University are considered security-sensitive and require a criminal background check.

**SUMMARY:**

The vibrancy and audaciousness of Texas A&M University-San Antonio continues to enhance the lives of the citizens of San Antonio and the region. The entire South Texas region's educationally underserved Hispanic population is taking advantage of the academic opportunities to make better lives for themselves and their families . A&M-SA is poised to play a major role in the development of the region's future workforce. The tremendous growth that the University has experienced is proof that the need for a comprehensive university in South San Antonio is merited and deserves continuing support. We are grateful for the commitment that the legislature has made towards the establishment and the continuation of A&M-SA.

A&M-SA respectfully requests the legislature's strong consideration of the exceptional items, capital request and the non-formula funding outlined in its current Legislative Requests. Without these funds, A&M-SA will have difficulty providing students the excellent learning environment and programs necessary to sustain the University's strong growth pattern, which is vital to the state's 60X30TX initiative and in ensuring all graduates are successful in today's highly competitive workforce.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Instruction and Operations Formula provides funding for faculty salaries, departmental operating expense, library, instructional administration, research enhancement, student services and institutional support. The funds are distributed on a weighted semester credit hour basis. The rate per weighted semester credit hour is established by the Legislature each biennium.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

**FULL TIME EQUIVALENT POSITIONS:**

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

To provide funds for the statutorily mandated compensation insurance (Article 8309b VTCA). This program provides partial income continuation for regular employees impacted by reduction in force.

Only components of the University of Texas and Texas A&M University Systems have this strategy because they operate their own risk pools. These General Revenue Fund appropriations are used for unemployment compensation insurance.

CODE	DESCRIPTION	Exp 2019	Est 2020	Bud 2021	BL 2022	BL 2023
------	-------------	----------	----------	----------	---------	---------

To maintain and support growth of the Texas A&M University-San Antonio campus for the purpose of providing higher education access to the south San Antonio area and surrounding region. The ability to hire the necessary faculty to deliver quality instruction is made possible through this appropriation. With the growth of the institution, transition funding emulates “base” funding in the university operating budget. The loss of this funding would severely impact the core academic activities of the university.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Additional information for this strategy is available in Schedule 9, Non-Formula Support information.

------	-------------	----------	----------	----------	---------	---------

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Institutional Enhancement is a direct appropriation to institutions and was established by the Seventy-sixth Legislature (1999). These funds are intended to supplement an institution's base funding for core academic operations. These funds are expended for general institutional, academic and research support and are used to support recruitment, retention and enhancing student's success.

Not funding this non-formula item would severely impact our institution's ability to fund the core academic costs of the university. Without these funds we would be required to reduce instructional positions and operating funds, which would impact access, success and retention of students. Elimination of these funds would create critical budget needs and would impact our ability to meet the goals of the State's Higher Education Strategic Plan, 60X30TX.

<b>Program Prioritization:</b> Indicate the methodology or approach taken by the agency, court, or institution to determine the ranking of each program by priority.	
Texas A&M University-San Antonio prioritizes funding strategies in order to achieve its overall strategic goals:	
<ol style="list-style-type: none"> <li>1. Become a National Model for Student and Academic Success embracing all students, particularly first-generation and underrepresented communities, while achieving graduation and retention rates above the national average.</li> <li>2. Continue to build academic excellence.</li> <li>3. To achieve enrollment growth through strategic enrollment management, student-focused academic experiences, co-curricular programs and student support services.</li> <li>4. Engage in partnerships that advance student growth as well as create opportunities for faculty and staff engagement, scholarship and research.</li> </ol>	
Texas A&M University-San Antonio prioritizes funds distributed through existing formulas as the highest priority as these formulas provide equitable, reliable and predictable funding to higher education. Existing tuition revenue bonds are needed to continue to pay the debt previously authorized for new facilities by the state. Non-formula items – Expansion Funding and Institutional Enhancement – remain important for addressing specific needs beyond the formula, particularly in establishing new academic and student support infrastructure for a relatively new and growing institution which downward expanded just over four years ago, in the fall of 2016.	
Other funds distributed by a formula—especially E&G space support and supplemental support for teaching experience—are vital for the mission in which the funds are intended. As part of the prioritization of existing funding sources, reinstating the 5% budget reduction helps maintain existing programs. We ranked the reinstatement of the 5% reduction ahead of the other new exceptional item requests to emphasize the importance to us of restoring both the non-formula and formula components of the reduction. The other new exceptional items request funding to address specific academic initiative needs at Texas A&M University-San Antonio, and are prioritized over other strategies due to the impact these new funds could have on advancing the institution.	

### 3.B. Rider Revisions and Additions Request

<b>Agency Code:</b> 749	<b>Agency Name:</b> Texas A&M University-San Antonio	<b>Prepared By:</b> Chris Leach	<b>Date:</b> Sep 18, 2020	<b>Request Level:</b> Baseline
<b>Current Rider Number</b>	<b>Page Number in 2020-21 GAA</b>	<b>Proposed Rider Language</b>		

3

III-113

~~**3. Expansion Funding – Texas A&M University San Antonio.** It is the intent of the legislature that non-formula General Revenue operations funding in Strategy C.1.1, Expansion Funding for Texas A&M University San Antonio will be phased out by 25 percent over four biennia beginning in the 2022-23 biennium as formula funding increases, or until the institution reaches 6,000 full-time student equivalents.~~

Given the unprecedented financial hardships due to the COVID-19 pandemic and the essential education and workforce training that A&M-San Antonio provides, we request that this rider be removed and that funding is maintained at 2020-21 appropriated funding levels.

**4.A. Exceptional Item Request Schedule**  
87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

TOTAL, METHOD OF FINANCING			\$506,706	\$506,706
FULL-TIME EQUIVALENT POSITIONS (FTE):			7.00	7.00

**DESCRIPTION / JUSTIFICATION:**

Fully cognizant of the significant budget deficit and economic uncertainty that faces state government, our number one priority is to request restoration of the 5% reduction to the 2022-2023 base. As a university situated in one of the fastest growing regions and cities in Texas, and one that serves primarily first-generation, underrepresented populations, A&M-San Antonio anticipates a significant long-lasting impact of the fiscal reductions, with limited pathways for recovery. Having just undertaken downward expansion in 2016, the University is still developing the basic infrastructure needed to support growth and emerging operations that are still in their infancy. Thus, cuts are disproportionately impactful to a vulnerable population and the campus growth trajectory.

The most negative impact of the reduction to base funding is elimination of faculty and instructional positions. Eliminating these positions impacts course offerings for students, which may result in larger class sizes, fewer course sections, and fewer faculty available for mentoring students. This impact is amplified by the need to maintain appropriate social distancing in face-to-face classroom settings.

**EXTERNAL/INTERNAL FACTORS:**

Major accomplishments to date and expected over the next two years:

A&M-SA will continue to increase academic success rates among first-time in college and transfer students.

The University will continue to hire full-time faculty, as needed to support growth in A&M-SA's degree programs.

Develop new academic programs, as appropriate, to meet the workforce needs of the region and state.

**4.A. Exceptional Item Request Schedule**  
87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

DATE: **10/22/2020**  
TIME: **11:51:36AM**

Agency code: **749**                      Agency name: **Texas A&M University - San Antonio**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2022</b>	<b>Excp 2023</b>
-------------	--------------------	------------------	------------------

Year established and funding source prior to receiving special item funding: 2020-2021 biennium Institutional Enhancement non-formula funding appropriated by 86th Legislature and subsequently reduced.

Formula funding: No

Non-general revenue sources of funding: None

Consequences of not funding:

Eliminating positions results in providing fewer student services to students and other stakeholders, primarily in the areas of student success coaching, library, technology support, admissions, financial aid, and business services. This may result in longer wait times to address student needs and impact student success in retention, satisfaction, and graduation rates. Lack of staff to support research will negatively impact efforts by faculty to gain external funding for projects that enhance the overall quality of educational and research opportunities available to students.

Finally, the reduction to base funding will impact travel, campus events, faculty and staff development and technology purchases, as well as general operating expenses. These reductions impact continuing professional development for employees and faculty opportunities to share scholarly research. The reduction in campus events will negatively affects students' learning experiences and engagement. There is a disproportionate impact on first generation students who would otherwise benefit from faculty and mentor engagement and co-curricular learning. Reductions in technology impact an atmosphere of discovery and support for students as well as faculty instructional settings.

**DESCRIPTION / JUSTIFICATION:**

Texas A&M–San Antonio seeks to develop new Public Health and Healthcare Management academic program initiatives (STEM+H) in collaboration with the Texas A&M School of Public Health. The goal is to create a new online Master of Public Health program, extend the Bachelor of Science in Environmental Health program to A&M–San Antonio, and develop a Healthcare concentration in the existing Master of Business Administration program.

**EXTERNAL/INTERNAL FACTORS:**

Major accomplishments to date and expected over the next two years:

The proposed programs will address preventive health, health education, social determinants of health, and access and equity issues in health care by reaching our traditionally underserved students. This will assist Bexar County and South Texas in meeting the professional workforce needs of the future by improving public-health quality in one of the fastest-growing areas of the state. Given the coronavirus pandemic, there is urgency around providing formal public health and health improvement education into our region and the population served by A&M-San Antonio. Specific expected accomplishments include:

- (1) Develop new STEM+H-discipline majors
- (2) Increase the number of traditionally underserved students majoring in STEM+H disciplines
- (3) Demonstrably increase technical and digital proficiencies for students in non-STEM+H majors

Agency code: **749**                      Agency name:  
**Texas A&M University - San Antonio**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2022</b>	<b>Excp 2023</b>
-------------	--------------------	------------------	------------------

Year established and funding source prior to receiving special item funding: N/A

Formula funding: Yes

Non-general revenue sources of funding: None

Consequences of not funding:

South Texas remains largely rural and sometimes isolated, lacking the infrastructure and trained workforce from which other regions benefit. Shortages of a trained public health and healthcare management workforce will continue. This will result in underserved communities of Texas continuing to suffer economic, social, and health disparities.

	<b>TOTAL, METHOD OF FINANCING</b>	<b>\$6,538,842</b>	<b>\$6,538,842</b>

**DESCRIPTION / JUSTIFICATION:**

Capital project authorization is requested for \$75,000,000 for the construction of the Public Health and Education Building. This building will provide the University's first teaching auditorium, tiered lecture halls, traditional classrooms, research and statistical analysis labs, and public outreach and support facilities. This request is for an 80,000 GSF building.

**EXTERNAL/INTERNAL FACTORS:**

Underserved Texas regions represent a large concern for the continued health and socioeconomic development of Texas, Bexar County, and the city of San Antonio. The growth of Public Health and Healthcare programs is critical to ensuring that our local and regional health districts are provided the best-trained health personnel possible, particularly as the region looks forward to a prolonged period of major population growth.

A&M-San Antonio has invested a significant amount of time performing needs analysis and planning. As articulated in a study by the Intercultural Development Research Association, the neighborhoods in the seven school districts surrounding the University are among the most economically challenged areas in San Antonio. This situation contributes to a health divide (limited access to health programs), which then leads to further economic, social, and health disparities for low-income and underserved populations.

Building design and construction is expected to commence between 2022 and 2025. This item is not eligible for formulas. Consequences of not funding this item will negatively impact the University's ability to meet the academic support and programming needs of a growing population of students, faculty, staff, and the greater community.

	<b>Total Expenditures</b>		<b>18.0%</b>		<b>\$3,748,391</b>	<b>\$20,833,730</b>		<b>27.9%</b>		<b>\$5,162,604</b>	<b>\$18,523,427</b>

**B. Assessment of Fiscal Year - Efforts to Meet HUB Procurement Goals**

**Attainment:**

For FY 2018 the University exceeded three of the applicable University HUB procurement goals, for an overall attainment of 18% of expenditures with HUB vendors.  
For FY 2019 the University exceeded four of the five applicable University HUB procurement goals, for an overall attainment of 27.9% of expenditures with HUB vendors.

**Applicability:**

The Heavy Construction and Professional Services categories were not applicable in the University operations in both FY 2018 and FY 2019, as the Universities did not have any strategies or programs related to construction or professional services.

**Factors Affecting Attainment:**

In FY 2018, the goal for the category of Professional Services was not met because several of the University's contracts limited the University to the use of non-HUB vendors. The University's total HUB spend for FY 2019 increased by 37.7% from FY 2018.

**"Good-Faith" Efforts:**

The University made the following good faith efforts to comply with statewide HUB goals per 34 TAC Section 20.13(d):

Incorporated the importance of using HUB vendors during procurement card and "How to do business" training classes. Cardholders and end users for procurement are provided a listing of HUB vendors via University website.

Encouraged and assisted small, minority-owned, woman-owned, and veteran-owned businesses to pursue State HUB certification.

**6.A. Historically Underutilized Business Supporting Schedule**  
87th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

Agency Code: **749**      Agency: **Texas A&M University - San Antonio**

Developed and updated bids lists with HUB vendors and increased the number of bids sent to HUB vendors.

Attended Spot Bid Fairs.

Developed and fostered business relationships through the mentor protégé program by seeking and partnering with large businesses willing to assist small businesses in developing their companies.

Attended and participated in other public sector forums to maximize HUB participation.

**NO FUNDS WERE PASSED THROUGH TO OTHER STATE AGENCIES OR INSTITUTIONS OF HIGHER EDUCATION****USE OF HOMELAND SECURITY FUNDS**

Homeland security expenditures related to COVID-19 are included within specified strategies. All funds are retained by the University for the purpose of covering costs associated with significant changes to the delivery of instruction due to the coronavirus, as authorized by Section 18004(c) of the CARES Act. These changes include the purchase of IT infrastructure to support online learning, personal protective equipment, plexiglass dividers where social distancing is not feasible, and temporary employees to operate wellness check stations across campus. Grants represent amounts disbursed directly to students.

**Project Description**

This TRB project request, Public Health and Education Building, will provide the campus's first teaching auditorium, technology-enabled/computer classrooms, public health research labs, health data/statistical analysis labs, and operational support facilities for public health graduate and undergraduate programs and the healthcare MBA program. This request is for a 80,000 GSF building addition.

The building will enable A&M-SA to develop a campus-based contemporary public-health research center. The development of a state-of-the-art center for public-health research, education, and outreach will immediately impact the health of the people not only in Bexar County but across South Texas. Additionally two centers will likely be housed in this facility, the Center for School Partnerships and the Center for Applied Behavioral Analysis.

---

**Expansion Funding**

**(1) Year Non-Formula Support Item First Funded:** 2020  
Year Non-Formula Support Item Established: 2020  
Original Appropriation: \$6,599,405

**(2) Mission:**

To expand access to a four-year comprehensive university in order to provide more educational opportunities to an underserved, non-traditional, growing student population in the South San Antonio area and surrounding region.

**(3) (a) Major Accomplishments to Date:**

- (1) Enrolled first class of first-time in college students in Fall 2016.
- (2) Increased freshman class from 495 students in Fall 2016 to 705 students in Fall 2019.
- (3) Began teaching freshman and sophomore level courses in Fall 2016.
- (4) Assessed new programs and implemented changes that would result in continuous improvement to students' academic success.
- (5) Added 81 full-time faculty positions from Fall 2015 to Fall 2019 to support downward expansion and growth in existing academic programs.
- (6) Graduated 85 students from the first class of incoming freshmen (Fall 2016 cohort) in May 2020.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

- (1) Increase academic success rates among first-time in college and transfer students: course completion rates, retention, and progress towards degree.
- (2) Expand academic support services such as tutoring, mentoring, academic coaching, and library/ITS resources to support programming needs identified during the four years of downward expansion.
- (3) Continue to hire full-time faculty as needed to support growth in A&M-San Antonio's degree programs.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

The University previously received separate non-formula support funding for Downward Expansion and Transitional Funding. These were combined into a single non-formula support item, Expansion Funding.

**(5) Formula Funding:**

N/A

**(6) Category:**

Instructional Support

**(7) Transitional Funding:**

N

---

**749 Texas A&M University - San Antonio**

---

**(8) Non-General Revenue Sources of Funding:**

N/A

**(9) Impact of Not Funding:**

Texas A&M-San Antonio would not be able to continue the momentum of expansion without this critical non-formula funding. This would hinder the University's ability to meet the Texas Higher Education Coordinating Board's 60x30TX strategic plan. Expansion funding is critical to the A&M-San Antonio as it allows the University to develop the services and programs to support degree attainment in an underserved population of students. Expanded access to higher education and increased degree completion rates benefit the communities and employers in South San Antonio, Bexar County, and the surrounding areas. Growth in formula funding has not been sufficient to counterbalance prior biennia's reductions in Expansion Funding and its non-formula support item predecessors.

Given the unprecedented financial hardships due to the COVID-19 pandemic and the essential education and workforce training the institutions provide, we request that these items be treated similarly to other non-formula support items without an additional 25% reduction in the base bill and deletion of the corresponding rider. Further reductions as currently scheduled will hamper the University's ability to achieve its desired student success outcomes.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:**

PERMANENT

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

A&M-San Antonio has established specific criteria for student success in its strategic plan:

- (1) Freshmen – first semester to second semester persistence rate: 90%
  - (2) Freshmen – first year to second year persistence rate: 80%
  - (3) Transfer students – three-year persistence rate and/or graduation rate: 80%
  - (4) 4-year and 6-year graduation rates: 37% (4-year) and 60% (6-year)
-

---

**749 Texas A&M University - San Antonio**

---

**Institutional Enhancement**

**(1) Year Non-Formula Support Item First Funded:** 2014  
Year Non-Formula Support Item Established: 2014  
Original Appropriation: \$500,000

**(2) Mission:**

Base funding for core academic operations. The 76th Legislature, 1999, Regular Session, merged numerous special items for certain institutions into a new appropriation, Institutional Enhancement. Institutional enhancement funds are expended for general institutional, academic and research support. These funds are used to support recruitment, retention and enhancing student's success.

**(3) (a) Major Accomplishments to Date:**

- (1) Increased student headcount from 3,120 students in Fall 2010 to 6,714 students in Fall 2019.
- (2) Received SACSCOC accreditation reaffirmation in December 2019.
- (3) Successfully transitioned to a separate student information system for Fall 2016 registration.
- (4) Received approval from the Department of Education to award federal financial aid, effective Fall 2016.
- (5) Admitted the University's first class of freshmen in Fall 2016.
- (6) Created and implemented the general education core curriculum and lower division courses in Fall 2016
- (7) Opened the first residence hall in Fall 2017 (Public Private Partnership).
- (8) Competed construction of six academic buildings (four funded by PUF, and two funded by TRBs) between 2011 and 2020 at the University's permanent location; planning for the next building (to be funded by PUF) is in progress.
- (9) Increased the number of full-time faculty from 98 in Fall 2014 to 186 in Fall 2019.
- (10) Graduated 85 students from the first class of incoming freshmen (Fall 2016 cohort) in May 2020.
- (11) Expanded student and academic support programs to support students' academic and personal growth.

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

- (1) Increase academic success rates among first-time in college and transfer students: course completion rates, retention, and progress towards degree.
- (2) Expand academic support services such as tutoring, mentoring, academic coaching, and library/ITS resources, which are vital to support student success.
- (3) Develop new academic programs, as appropriate, to meet the workforce needs of the region and state.
- (4) Continue to hire full-time faculty as needed to support growth in A&M-San Antonio's degree programs.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

N/A

**(5) Formula Funding:**

N/A

---

**749 Texas A&M University - San Antonio**

---

**(6) Category:**

Institutional Enhancement

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

N/A

**(9) Impact of Not Funding:**

Without the funding, Texas A&M University-San Antonio would not be able to fund faculty salaries that support the course offerings needed to continue to support an underserved population of students.

The University's rapid growth is an indication of how underserved the south side of San Antonio has been. A&M-San Antonio's enrollment grew 187% from Fall 2009 to Fall 2019. This progress has been possible as a result of non-formula support funding provided to the institution. This funding is critical since the formula does not provide sufficient funding for a new and developing university. It is critical that the University retain the full Institutional Enhancement funding of \$3,516,344 to be able to continue offering quality instruction to the additional students who will enroll in the next biennium. The University will strive to continue enrollment growth with a focus on student success. The formula funding will not be sufficient to meet the needs of the students seeking higher education in the region.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuation:**

Permanent – Continued investment in A&M-San Antonio's comprehensive expansion will ensure that students within a traditionally underserved region of south Texas will have additional opportunities to complete a college degree. A&M-San Antonio was created with a focus on increasing access to higher education; the institution targets the underserved, first generation students primarily from the south side of San Antonio and the surrounding region. Institutional Enhancement (Academic & Student Support) funding is critical to Texas A&M University-San Antonio as it allows the University to develop the services and programs to support degree attainment in an underserved population of students. Expanded access to higher education and increased degree completion rates benefit the communities and employers in San Antonio and the surrounding areas, and contribute to the state's goals for higher education, which are laid out in the 60x30TX strategic plan.

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

**749 Texas A&M University - San Antonio**

---

A&M-San Antonio has established specific criteria for student success in its strategic plan:

- (1) Freshmen – first semester to second semester persistence rate: 90%
- (2) Freshmen – first year to second year persistence rate: 80%
- (3) Transfer students – three-year persistence rate and/or graduation rate: 80%
- (4) 4-year and 6-year graduation rates: 37% (4-year) and 60% (6-year)

In addition, A&M-San Antonio will monitor the following metrics related to faculty sufficiency:

- (1) Percentage of sections and semester credit hours (SCH) taught by full-time faculty
  - (2) Percentage of lower-division course sections and SCH taught by full-time faculty
  - (3) Faculty to student ratio
-

**Providing STEM+H Education for Traditionally Underserved Students**

<b>(1) Year Non-Formula Support Item First Funded:</b>	2022
Year Non-Formula Support Item Established:	2022
Original Appropriation:	\$4,000,000

**(2) Mission:**

Texas A&M–San Antonio seeks to develop new Public Health and Healthcare Management academic program initiatives (STEM+H) in collaboration with the Texas A&M School of Public Health. The goal is to create a new online MPH Program, extend the BS in Environmental Health program to A&M–San Antonio and develop a Healthcare concentration in the existing MBA program.

The proposed programs will address preventive health, health education, social determinants of health, and access and equity issues in health care by reaching our traditionally underserved students. This will assist Bexar County and South Texas meet the professional workforce needs of the future by improving public-health quality in one of the fastest-growing areas of the state. Given the coronavirus pandemic and the impact it has had, especially on underserved communities with greater incidence of chronic disease, there is urgency around providing formal public health and health improvement education into our region and the population served by A&M-San Antonio.

Our approach to developing STEM+H education for underserved populations is two-fold. First, increase the availability of accredited undergraduate and graduate programs in Public Health and Healthcare Management. Second, add and significantly expand academic programs in specific STEM+H disciplines with high employability prospects and that can benefit from the diversity our predominantly underrepresented student population can introduce to the field.

**(3) (a) Major Accomplishments to Date:**

N/A

**(3) (b) Major Accomplishments Expected During the Next 2 Years:**

- (1) Develop new STEM+H discipline majors.
- (2) Increase the number of traditionally underserved students majoring in STEM+H disciplines.
- (3) Demonstrably increase technical and digital proficiencies for students in non-STEM+H majors.

**(4) Funding Source Prior to Receiving Non-Formula Support Funding:**

N/A

**(5) Formula Funding:**

N/A

**(6) Category:**

Instructional Support

**(7) Transitional Funding:**

N

**(8) Non-General Revenue Sources of Funding:**

N/A

**(9) Impact of Not Funding:**

Without the funding necessary to expand STEM+H programs and support the development of public health and healthcare-management programs, our students will continue to face obstacles to educational and career preparedness in disciplines of greatest need, especially at a time when the entire world, including the United States and Texas, are reeling under the effects of a pandemic that has caused significant impact on people's lives, especially those who are underserved by access to food and health care. In short, the health divide will become more profound.

Health-research applications of faculty, and the innovation generated through collaborative research, will be curtailed and constricted, which in turn will inhibit interdisciplinary research outcomes and inter-professional education, both of which would directly benefit our service region.

**(10) Non-Formula Support Needed on Permanent Basis/Discontinuu**

Provided that the formula funding rate continues at FY20/FY21 levels, we anticipate non-formula support can be discontinued in the future once formula funding is sufficient for program sustainability.

**(11) Non-Formula Support Associated with Time Frame:**

N/A

**(12) Benchmarks:**

N/A

**(13) Performance Reviews:**

A&M-San Antonio will monitor the following metrics related to this program:

- (1) Number of semester credit hours generated
  - (2) Number of students majoring in STEM+H disciplines
  - (3) Number of program graduates
  - (4) Number of graduates employed in the STEM+H field within two years of graduation
-
