### 576 Texas A&M Forest Service

---

#### TEXAS LEADERSHIP

One of the primary roles of government is to help ensure the safety of its citizens. The Texas A&M Forest Service is a proud member of a team of agencies fulfilling this role through the state's support and direction. A clear example of this occurred during the 87th legislative session when a supplemental appropriation of \$56.4 million was provided to cover the emergency response costs for wildfires and other natural disasters (Tropical Storm Imelda, COVID-19 Pandemic, Hurricane Delta, and Hurricane Hanna). When wildfires or other disasters occur – Texas leaders, legislators and elected officials are there to support this agency, the firefighters and the citizens of Texas. THANK YOU!

#### TEXAS WILDFIRE PROTECTION PLAN – WILDFIRES & EMERGENCY RESPONSE

Disasters are measured in human impact – lives, homes, and property. As one of the fastest growing states in the nation, Texas must lead in emergency preparedness and response. The Texas A&M Forest Service delivers wildfire response and protection through the Texas Wildfire Protection Plan (TWPP). First developed and tested over two decades ago, TWPP is a proven emergency response model utilizing continuous fire danger and risk analysis, mitigation, prevention and preparation, followed by a coordinated and rapid response. TWPP also recognizes the importance of building the local response capacity across the state, providing protection for communities during initial response and reducing fire size and losses.

Wildfire activity has continued to require extended mobilization of fire suppression resources into high-risk areas in Texas. Over the last five fiscal years, Texas has reported 40,608 wildfires for nearly 1.8 million acres with 18,479 homes saved. With over 90% of all Texas wildfires caused by human activity and 86% occurring within two miles of a community, the impact on lives and property is tremendous. The agency began tracking data on property saved from wildfires in FY2005. Through the end of FY2021, the agency and local fire departments have saved a total of 130,737 homes from wildfires. Total property value saved is \$16.97 billion.

In addition to the wildfire activity, the agency is called upon by the Texas Division of Emergency Management (TDEM) to support state response efforts to a wide variety of disasters and emergency events such as floods, tornados, winter storms, hurricanes, and pandemics. The agency provides operational resources, such as saw crews and heavy equipment to clear roads of ice and storm debris, as well as incident management teams to support state and local response operations. Resource and mission tracking, logistics support, safety and organization are needed on any event. The same organizational structure used to manage large wildfires is used to support other types of disaster response. Coordinated through TDEM, agency-led incident management teams are used to support local jurisdictions and state disaster district operations. Over the past 5 years, the Texas A&M Forest Service mobilized 1,603 personnel to non-wildfire disasters.

#### THE DEMAND FOR FIREFIGHTERS AND EMERGENCY RESPONDERS – TIERED APPROACH – TESTED AND PROVEN

Texas uses a tiered approach to emergency response and wildfire suppression, relying on strong interagency partnerships and working relationships. Local fire departments and counties are the first responders, with state response being activated as fires or conditions exceed the local capacity to control. The Texas A&M Forest Service is the lead state agency for wildfire response in Texas, with strategically placed resources across the state. The agency's Predictive Services and Planning & Preparedness departments monitor wildfire occurrence and weather conditions statewide. As emergency response activity increases, resources from other state agencies, such as the Texas Department of Public Safety, the Texas Department of Transportation and Texas Military Department are mobilized through TDEM. As the capacity of state resources is exceeded, out-of-state resources are brought in to meet essential needs.

The demand for agency firefighters and emergency management personnel continues to increase for all types of disasters. Demand for agency emergency responders has increased to the point where the agency often finds itself responding to multiple types of disasters at the same time. As an example, on March 22, 2022, the Texas A&M Forest Service staffed 13 wildfires, including the 54,463-acre Eastland Complex wildfire in West Texas, supported the Texas Department of Transportation by clearing roadways impacted by snow and ice, and provided storm cleanup and damage assessments in Cass, Houston, Marion, Nacogdoches and Upshur counties following

---

**576 Texas A&M Forest Service**

---

severe weather.

The number of volunteer firefighters – the most common local emergency responder for most of the state – is dropping. Over the past two decades, Texas has seen a 21% drop in the number of volunteer firefighters in the state – making the availability of agency firefighters and other response resources even more critical as the size, scope and impact of disasters continue to increase. This situation increases demand on agency personnel and equipment for response historically covered by locals. In order to address this decline in local capability while at the same time contend with the increase in demand for services due to population growth in the state, the agency proposes an increase in response personnel and equipment found in the number one exceptional item request in this LAR.

Over the last 14 years, the Texas A&M Forest Service has been working with state leadership to increase the agency’s capabilities and make better statewide use of local fire and emergency management resources. Utilizing local-level Texas emergency responders and equipment from areas of the state unaffected by current disasters, TDEM and the Texas A&M Forest Service are creating the surge capacity to meet essential emergency response needs with rapidly responding Texas-based resources. The Texas Intrastate Fire Mutual Aid System (TIFMAS) and the Texas A&M All-Hazard Incident Management Team (AHIMT) programs are highly successful examples of Texans helping Texans and are national models.

**LOCAL RESPONDERS**

Local fire departments are the first line of defense against wildfires across the state. Currently there are 1,839 fire departments in Texas - 1,333 of these are fully volunteer. Of the 55,000 local firefighters in the state, nearly half are volunteers – dedicated men and women who serve their state and communities, while holding other jobs. Many departments operate with aged, battle-worn equipment, very limited funding and decreasing numbers of volunteers.

The Texas A&M Forest Service administers a number of fire department assistance programs that set national standards for providing training, equipment, and grants to help build their capacity to respond. The largest and most impactful of these programs is the Rural Volunteer Fire Department Assistance Program. This program was created in 2001 by the 77th Texas Legislature – providing pass-through grants to Texas VFD’s for crucial equipment and training – and is funded through a special assessment to the insurance industry (Fund 5064). Since 2002, grants for more 2,061 fire trucks, 10,654 pieces of equipment and Personal Protective Equipment (PPE) and 93,679 training tuitions have been awarded to volunteer fire departments across the state. The continuing needs are great, as evidenced by the \$159 million in unfunded requests. The Texas Legislature currently provides funding for grants under this program at just under \$17 million per fiscal year.

**REGIONAL RESPONDERS**

Texas Intrastate Fire Mutual Aid System (TIFMAS):

In 2007 the 80th Texas Legislature passed SB 11, establishing the framework for mutual aid response in Texas. Operating under this legislative direction, the agency worked with TDEM and the Texas Fire Chiefs Association to develop TIFMAS. Managed and coordinated by the Texas A&M Forest Service, the program includes training, qualification, and mobilization systems to make statewide use of local resources. The program was first used during Hurricane Ike in 2008 and has since been used in response to the Presidio flooding, Hurricane Alex, the plant explosion at West, 2016 and 2017 flooding, Hurricane Harvey, and wildfires in 2009, 2011, 2012, 2015, 2016, 2017, 2018, 2019, 2020 and 2021. Since 2008, TIFMAS mobilizations have provided 1,730 fire engines, 45 boats and 7,790 firefighters during state- led emergency response to disasters. By mobilizing local resources from unaffected areas, TIFMAS fills a critical surge capacity need that cannot be met using out-of-state resources. A side benefit is the “pay-it-forward” attitude developed by recipients of TIFMAS assistance in their enthusiastic willingness to deploy to other areas of Texas when called.

The 81st Texas Legislature enacted legislation allowing the Texas A&M Forest Service to provide grants for fire trucks, protective gear and training to municipal fire

---

departments who agree to mobilize under TIFMAS to support statewide and regional emergency response. Developed with support from the Texas Fire Chiefs Association, State Firefighters' and Fire Marshals' Association and the Texas State Association of Fire Fighters, these grants directly benefit both local and statewide response capabilities. Since the inception of the TIFMAS grants, the agency has awarded grants to fire departments for 61 fire trucks, 540 pieces of PPE and 10,743 training tuitions.

#### All-Hazard Incident Management Teams (AHIMTs):

Initiated in 2006 by Governor Rick Perry's executive order, the Texas A&M AHIMT program is built upon the neighbor-helping-neighbor model. This program maintains a network of trained incident management teams and personnel from local and municipal entities within Texas to supplement state and regional emergency response operations. The program is maintained by the Texas A&M Forest Service using homeland security funds from TDEM. The AHIMT program currently has four regional teams available for mobilization with the goal of six teams by June 2023. To date, AHIMT personnel have helped fill critical response needs on 39 all-hazard incidents (hurricanes, floods, tornados, ice storms, Hurricane Harvey, COVID-19, border operations, etc.) in addition to supporting Texas wildfire operations in 2008, 2009, 2010, 2011, 2012, 2015, 2017, 2018, 2019, 2021 and 2022.

Through TIFMAS and Texas A&M AHIMT, local responders across the state stand ready to assist communities in times of need. But more is needed.

#### EXCEPTIONAL ITEMS

##### Keeping Texas Prepared: Emergency Response Capability - \$31.4 million for the 2024-25 biennium

As an agency with substantial responsibilities in emergency response, including wildfires and all-hazard, sustaining a properly trained and qualified workforce is critical to protecting the citizens of Texas and their property. Total impact of the Texas Wildfire Protection Plan – Texas A&M Forest Service Operations for FY2005-FY2021 is \$9.53 billion in property values saved (\$8.8 billion net taxpayer savings after state funding) and 61,569 homes saved. To enhance the agency's capacity, the Texas A&M Forest Service is requesting \$15.7 million/year in exceptional item funding to achieve four critical objectives: (1) Add 100 fire/emergency response positions to maintain effective statewide wildfire mitigation and response; (2) Improve current pay levels to strengthen the agency's ability to recruit and retain employees to sustain a trained and qualified workforce capable of meeting the agency's statutory-mandated responsibilities; (3) Add/replace suppression equipment; and (4) Fund aviation support costs (e.g. retardant) that can no longer be deferred under federal agreement.

##### Keeping Texas Prepared: Local Firefighting Capacity - \$17.9 million for the biennium

VFD's are the state's first line of defense against wildfires. VFD grants are for fire trucks, protective gear, equipment, and training for eligible VFDs. TIFMAS departments are the state's surge capacity. TIFMAS grants are for fire trucks, protective gear, and training to participating municipal fire departments. Both VFDs and TIFMAS departments are critical to protecting the citizens of Texas and their property. Total combined impact of TWPP – VFD Grants and TWPP – TIFMAS Grants for FY2005-FY2021 is \$7.44 billion in property values saved (\$7.1 billion net taxpayer savings after state funding) and 69,168 homes saved. The Texas A&M Forest Service is requesting \$8.95 million/year increase in funding to enhance local firefighting capacity. Funding will be used to help reduce the growth in backlog of unfunded VFD and TIFMAS grant requests.

#### SUPPLEMENTAL APPROPRIATIONS REQUESTS

##### Wildfire and Emergency Response Bills:

Drought, fire weather and large wildfires continue to impact Texas – with active fires seasons in 2021 and 2022 requiring the mobilization of ground and aviation resources

---

**576 Texas A&M Forest Service**

---

to assist with fire suppression. Thanks to the foresight of the Texas Legislature, the agency has been able to maintain an active ground response with minimal reliance on costly out-of-state resources. The mobilization and use of firefighting aircraft however, is not currently funded within the normal state appropriations to the agency. While final billing from the USDA Forest Service and reimbursements from FEMA have not yet been received, we estimate \$100 million will be needed to cover these bills.

**ONE TIME FUNDING OPPORTUNITIES****VFD Grants:**

The current backlog of unfunded VFD grant requests is \$158,961,400. A one-time appropriation of \$100,000,000 would result in a significant reduction in the backlog of requests. The current supply chain and manufacturing delays caused by COVID is expected to impact delivery time, so unexpended balance authority beyond the following biennium would be needed.

**TIFMAS Grants:**

The current backlog of unfunded TIFMAS grant requests is \$23.4 million. A one-time appropriation of \$8,000,000 would result in a significant reduction in the backlog of requests. The current supply chain and manufacturing delays caused by COVID is expected to impact delivery time, so unexpended balance authority beyond the following biennium would be needed.

**TEXAS A&M UNIVERSITY SYSTEM FUNDING PRIORITIES**

A robust higher education sector is key to long term economic growth and resiliency through a well-educated and prepared workforce. With a direct presence in all 254 Texas counties, Texas A&M System Agencies offer research, training, and service to the state's citizens, to improve the social, economic, educational, and health status of Texans. These agencies also play a critical role in supporting statewide disaster preparedness and response, from natural disasters such as wildfires and hurricanes to the coronavirus pandemic.

However, the A&M System Agencies are facing steep cost increases in every area, from employee health insurance to fuel to labor costs. Over the last decade, the state's population has grown by 22 percent while our base funding has remained generally flat. Increases in funding for the agencies have been only for new initiatives and have not provided any increased support for our ongoing programs that improve the daily lives of Texans and are an integral part of the state's emergency response system. We request continued investment in higher education and the A&M System Agencies to ensure we maintain our ability to serve our growing state. Key agency funding issues are detailed below:

**Base Funding**

Over the last decade, and particularly in response to Hurricane Harvey and the COVID pandemic, the A&M System Agencies have been tapped to help meet Texas' emergency preparedness and response to hurricanes, tornados, flooding, wildfires, the pandemic, and other events, while continuing to fulfill their ongoing research and service missions to improve the lives of Texans.

While base funding is provided to institutions of higher education by the state through both formula and non-formula support, there is no mechanism to provide base funding to our agencies or to address increased need for their services as the state's population grows. These agencies are rapidly reaching the point where they cannot keep up. They are facing high turnover, difficulty in attracting qualified applicants, low salaries, high fuel costs, and high inflation for other operating costs.

**Administrator's Statement**

8/1/2022 6:43:36PM

88th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

---

**576 Texas A&M Forest Service**

---

**Keeping Texas Prepared**

Four of our service agencies – Texas A&M AgriLife Extension Service, Texas A&M Forest Service, Texas A&M Veterinary Medical Diagnostic Laboratory, and Texas A&M Engineering Extension Service – are asking for an increase to their base funding to address years of declining purchasing power through a set of exceptional item requests - Keeping Texas Prepared. This funding will help these agencies maintain their level of service to Texans in the areas of training and workforce development, testing and disease surveillance, extension education and emergency response. In short, these funds will help our agencies Keep Texas Prepared.

**Higher Education Group Health Insurance**

Declining state support for our employees' health insurance over the last several biennia has become a direct cost to our agencies to cover these additional costs. We request funding to cover increases in covered enrollments and in health care costs. We also request restoration of the over 20 percent gap in funding for our employees compared to state employees in the ERS group plan. Additional funding to cover the state's proportional share of our health insurance will help us keep costs lower and preserve vital programs and services for the people of Texas.

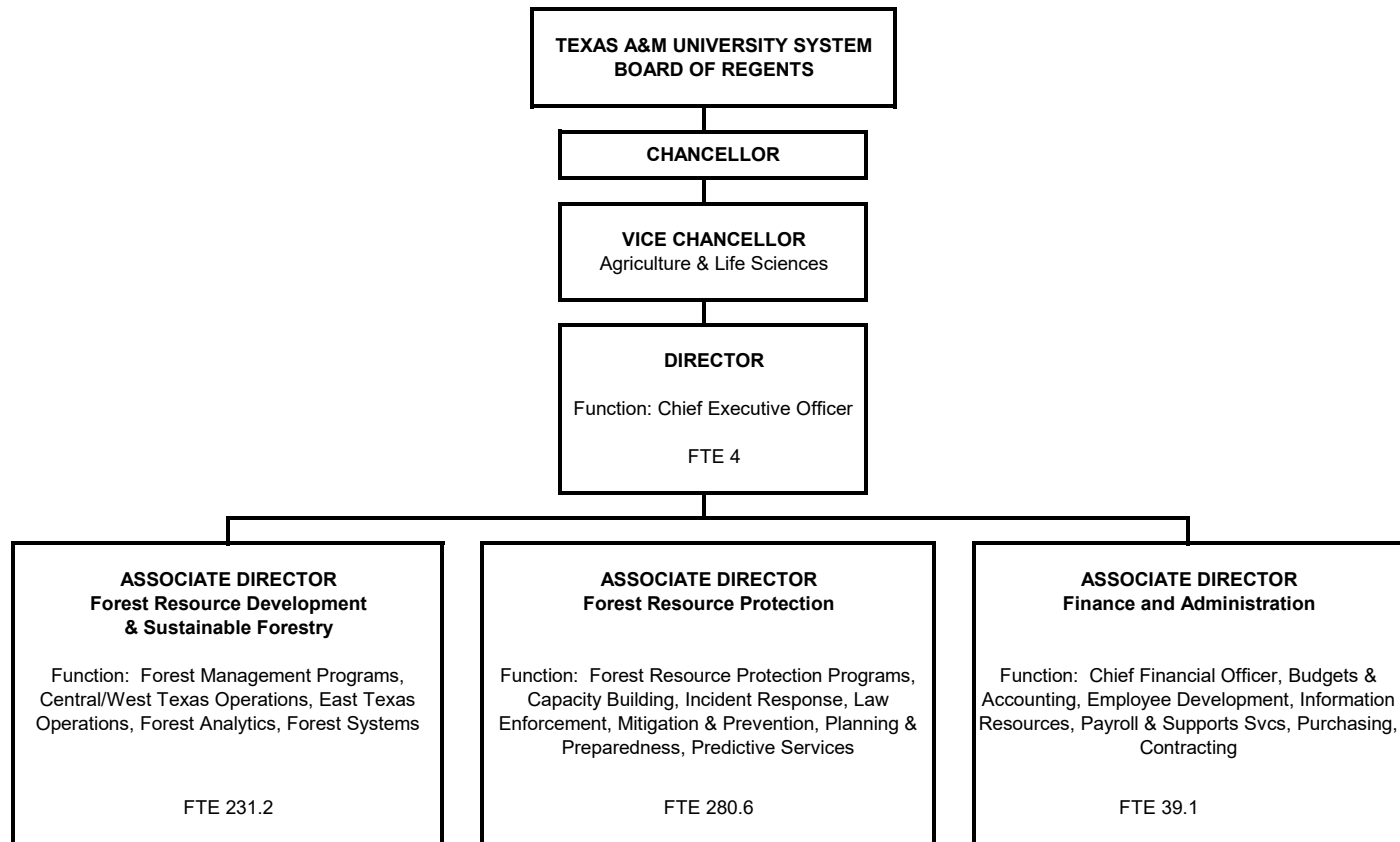

**BACKGROUND CHECKS**

The Texas A&M Forest Service has designated all budgeted, seasonal and student worker positions as security sensitive. Prior to extending a final offer of employment, the agency obtains criminal history information. Adverse information is reviewed by appropriate agency management prior to obtaining final approval for hiring.

-------------	--------------------	-----------------	-----------------	-----------------	----------------	----------------

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Very high demand by private forest landowners for professional forestry guidance and forestry services causes the Texas A&M Forest Service to place high priority emphasis on this strategy. This is accomplished by a strong technical assistance program where professional foresters provide timely, science-based information to Texas landowners. Major efforts are also directed to attracting new forest industry to Texas through resource assessments, evaluation of new products and markets, and use of alternative species.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The demand for forest resources continues to increase in Texas. We currently supply less than half of our own wood needs and must rely on imports from other states and Canada. The Texas A&M Forest Service will lead a coordinated effort, joining all aspects of the forestry community, to meet these challenges and prepare Texas forest landowners for the future. Fragmentation of the forest land base, access to markets, and increased demands are but a few factors emphasizing the critical need for leadership, technical assistance, and accurate resource information if non-industrial private owners are to meet the future forest needs of Texas.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

Urban and community forestry programs have been expanded into every major population center of Texas because of tremendous public demand and the availability of federal funds for this purpose. In addition, across the non-forested portion of the state, numerous farmers, ranchers, and other owners benefit from professional land management assistance, continuing education and windbreak tree seedlings. All of these forestry practices enhance air quality, wildlife habitat and overall quality of living.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Environmental concerns are dominant among most Texans, and it is imperative that the Texas A&M Forest Service take a positive leadership role in dealing with stewardship of urban and other tree resources. Eighty-four percent of Texans live on three percent of the land. As our population continues to grow beyond 30 million, the Texas A&M Forest Service must take an increased leadership role in building community capacity within these urban/wildland interface areas to sustain the environmental quality and protect the lives and property of our urban citizens.

------	-------------	----------	----------	----------	---------	---------

The Texas A&M Forest Service forest health program provides statewide leadership in the identification, education and suppression for a variety of pests known to affect the state's forests, woodlands and trees. Texas A&M Forest Service staff are integral in identifying known pest outbreaks, identifying threats and developing strategies for mitigating those threats. Part of any mitigation strategy includes an educational and outreach component through which agency staff educate Texans of known pest outbreaks, the current threat level and how Texans can assist in combating the establishment and spread of pests which pose a severe threat to the Texas economy and natural resources.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Native bark beetle activity is cyclical but with continuing weather extremes increased activity can be expected. Invasive insects such as emerald ash borer and Asian longhorn beetle among others have the potential to negatively affect Texas trees, forests and woodlands. Diseases such as oak wilt continue to threaten trees and woodlands throughout Central Texas and the cities of Austin, San Antonio, Fort Worth, and others. State funds are needed to reduce the impact of these pests.

CODE	DESCRIPTION	Exp 2021	Est 2022	Bud 2023	BL 2024	BL 2025
------	-------------	----------	----------	----------	---------	---------

The Texas A&M Forest Service delivers wildfire response and protection through the Texas Wildfire Protection Plan (TWPP). The agency first launched TWPP as a pilot program more than two decades ago and it is now a national model for state wildfire protection. TWPP is a tested and proven emergency response model emphasizing ongoing analysis, mitigation, prevention and preparation, followed by a coordinated and rapid response. TWPP also recognizes the importance of building the local response capacity across the state, providing more protection for communities during initial response and reducing fire size and losses. The Texas A&M Forest Service provides leadership and wildfire protection on 156 million acres across Texas. In addition, the agency actively cooperates with the Texas Division of Emergency Management agency (TDEM) to respond to any emergency when needed.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Many changes in recent years impact the wildfire prevention and suppression programs of the Texas A&M Forest Service. Below are listed only a few for emphasis:

1. Population/Demographics: Currently at 29.9 million and growing rapidly, every part of the state is impacted by the sheer number of people. With over 90% of wildfires started by man, increased population means increased dangers of wildfire.
2. Wildland Urban Interface: Where the country meets the city, there is a significant increase in the risk of disaster due to wildfire. A short drive in the hills west of Austin graphically demonstrates this danger. Spatial analysis of Texas wildfires show that 86% of wildfires occur within 2 miles of a community.
3. Expanding Demands: Wildfires, hurricanes, floods and occurrences make Texas one of the three leading natural disaster states in the nation. This places a significant additional burden on Texas fire departments and the Texas A&M Forest Service for all-hazard incident response. New, innovative approaches must be used to meet expanding demands and to protect the citizens we serve.

**FULL TIME EQUIVALENT POSITIONS:**

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

The Texas A&M Forest Service provides the only major source of support and assistance to its valuable volunteer fire department (VFD) partners. This support and assistance includes training, equipment, coordination and cost-sharing for needed equipment and supplies. The Rural VFD Assistance Program is the largest VFD grants program administered by the agency. It is funded through a special assessment to the insurance industry and provides funding for equipment and training. The Rural VFD Insurance Program is a much smaller program, which is also administered by the agency. It is funded through sales tax on fireworks and provides funding for workers comp and life insurance.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

Local fire departments are the first line of defense against wildfires across the state. Currently there are 1,839 fire departments in Texas - 1,333 of these are fully volunteer. Of the 55,000 local firefighters in the state, nearly half are volunteers; dedicated men and women who serve their state and communities, but have other jobs. Many departments operate with aged, battle-worn equipment and very limited funding.

CODE	DESCRIPTION	Exp 2021	Est 2022	Bud 2023	BL 2024	BL 2025
------	-------------	----------	----------	----------	---------	---------

In 2007 the 80th Texas Legislature passed SB 11, establishing the framework for mutual aid response. Operating under this legislative direction, the agency worked with TDEM and the Texas Fire Chiefs Association to develop TIFMAS. Managed and coordinated by the Texas A&M Forest Service, the program includes training, qualification and mobilization systems to make statewide use of local resources. The program was first used during Hurricane Ike in 2008 and has since been used in response to the Presidio flooding, Hurricane Alex, the plant explosion at West, 2016 and 2017 flooding, Hurricane Harvey, and wildfires in 2009, 2011, 2012, 2015, 2016, 2017, 2018, 2019, 2020 and 2021. Since 2008, TIFMAS mobilizations have provided 1,730 fire engines, 45 boats and 7,790 firefighters during state- led emergency response to disasters. By mobilizing local resources from unaffected areas, TIFMAS fills a critical surge capacity need that cannot be met using out-of-state resources.

The 81st Texas Legislature enacted legislation allowing the agency to provide grants for fire trucks, protective gear and training to municipal fire departments who agree to mobilize under TIFMAS. Developed with support from the Texas Fire Chiefs Association, State Firefighters' and Fire Marshals' Association and the Texas State Association of Fire Fighters, these grants directly benefit both local and statewide response capabilities. Since the inception of the TIFMAS grants, the agency has awarded grants to fire departments for 61 fire trucks, 540 pieces of PPE and 10,743 training tuitions.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

TIFMAS Mobilizations are supported in Government Code Section 418.110 and Sub-Chapter E-1 and the State Emergency Management Plan. This program directly benefits both local and statewide response capabilities, reducing the reliance on out-of-state resources during periods of high fire danger.

**STRATEGY DESCRIPTION AND JUSTIFICATION:**

This strategy includes those indirect administration costs which are not directly attributable to any specific strategy. Costs include the agency Director's office and the Division of Finance and Administration.

**EXTERNAL/INTERNAL FACTORS IMPACTING STRATEGY:**

The agency must maintain sufficient administrative staff to properly handle the complex and unpredictable levels of emergency response activity.

		<i>This rider has been updated to update current targets for certain measures for the 2024-25 Biennium.</i>		
3	III - 257	<b>Overtime Payments, Contingency.</b> Included in the appropriation above, \$335,223 for each year of the biennium is for the sole purpose of paying overtime expenses of employees of the Texas A&M Forest Service when such overtime is incurred in emergency response activities. It is further provided that payments from this appropriation shall be made only upon overtime payroll vouchers submitted to the State Comptroller. Any balances remaining as of August 31, 2023 <del>4</del> , are hereby appropriated for the same purpose for the biennium beginning September 1, 2023 <del>4</del> , and balances remaining as of August 31, 2024 <del>2</del> , are hereby appropriated for fiscal year 2025 <del>3</del> .		
		<i>This rider has been updated to reflect the years for the 2024-25 biennium.</i>		
4	III - 257	<b>Texas Wildfire Protection Plan.</b> Out of the funds appropriated above, \$ <del>17,723,159</del> <del>17,649,641</del> from the GR-Dedicated Texas Department of Insurance Operating Fund and \$ <del>3,623,242</del> <del>3,696,760</del> in General Revenue in each year of the biennium shall be used for the Texas Wildfire Protection Plan.		
		<i>This rider has been updated to reflect corrected split between the two funding sources, but the total of the two is the same.</i>		

### 3.B. Rider Revisions and Additions Request

Agency Code:	Agency Name:	Prepared By:	Date:
576	Texas A&M Forest Service	A.G. Davis	August 5, 2022
Current Rider Number	Page Number 2016-17 GAA	Proposed Rider Language	
7	III - 257	<p><b>Rural Volunteer Fire Department Assistance Program (Texas Wildfire Protection Plan).</b> Out of the funds appropriated above, \$22,840,230 in fiscal year 2024<del>2</del> and \$22,840,321 in fiscal year 2025<del>3</del> in General Revenue-Dedicated Volunteer Fire Department Assistance Account No. 5064 shall be used to assist volunteer fire departments and provide for equipment and training needs, <del>including specific training for handling industrial emergency incidents and response involving ammonium nitrate used as fertilizer, by building their capacity to respond to fires locally. The Texas A&amp;M Forest Service shall submit a report to each member of the Legislature regarding expenditures of all grants under this program, including enrollment numbers and type of training administered through the expenditure of these funds. An amount not to exceed 7 percent of total appropriations per fiscal year from General Revenue-Dedicated Volunteer Fire Department Assistance Account No. 5064 shall be used to administer grants.</del></p> <p><i>It is recommended that a portion of this rider be deleted because use of Fund 5064 is already laid out in statute in Gov't Code Chapter 614, Subchapter G, and there is no need to duplicate statute in the GAA. The verbiage related to training for handling incidents involving ammonium nitrate is not needed because it falls within the allowable training for which grants are provided. Also, this rider has been updated to reflect the years for the 2024-25 biennium.</i></p>	
701	III	<p><b><u>Carryforward Authority for Supply Chain Delays.</u></b> Any obligated balances from the appropriations for the fiscal year ending August 31, 2021 for grants to fire departments for the purchase of vehicles and equipment that are not fully expended by August 31, 2023, are hereby appropriated for the same purpose for the fiscal year beginning September 1, 2023. Any obligated balances from the appropriations for the fiscal year ending August 31, 2022 for grants to fire departments for the purchase of vehicles and equipment that are not fully expended by August 31, 2024, are hereby appropriated for the same purpose for the fiscal year beginning September 1, 2024.</p> <p><i>The purchase of vehicles and equipment has been adversely affected by supply chain delays caused by the worldwide COVID pandemic. These delays are unpredictable in length and are outside of the control of fire departments. The delays can result in outstanding obligations for grants to fire departments for the purchase of vehicles and equipment not being fully expended by the normal two fiscal year lapse date. This rider would allow the agency to carry forward the funds obligated for this purpose for an extra fiscal year to mitigate the effects of the supply chain delays and honor the obligations to fire departments.</i></p>

**DESCRIPTION / JUSTIFICATION:**

As an agency with substantial responsibilities in emergency response, including wildfires and all-hazard, sustaining a properly trained and qualified workforce is critical to protecting the citizens of Texas and their property.

Total impact of the Texas Wildfire Protection Plan - Texas A&M Forest Service Operations for FY2005-FY2021 is \$9.53 billion in property values saved (\$8.8 billion net taxpayer savings after state funding) and 61,569 homes saved.

Agency code: 576 Agency name: Texas A&M Forest Service

CODE	DESCRIPTION	Excp 2024	Excp 2025
------	-------------	-----------	-----------

Funding will be used to achieve four critical objectives:

1. Add 100 fire/emergency response positions to maintain effective statewide wildfire mitigation and response
2. Improve current pay levels to strengthen the agency's ability to recruit and retain employees to sustain a trained and qualified workforce capable of meeting the agencies statutory mandated responsibilities.
3. Add/replace suppression equipment
4. Fund aviation support costs (e.g. retardant) that can no longer be deferred under federal agreement

Funding will be used in all bill pattern strategies that contain salaries. Staff are cross-trained and multi-program, delivering both emergency response and forest management programs. Central administration provides support to the delivery of all programs.

This item supports agency Goals to Protect Forest/Tree Resources, Citizens and Property and to Develop Forest/Tree Resources to Sustain Life, Environment and Property.

**EXTERNAL/INTERNAL FACTORS:**

Due to current funding constraints, the agency is unable to hire currently-qualified candidates and instead must hire entry-level candidates for most positions and train them. Applicant pools have declined and retaining employees after they are trained has become increasingly difficult, with the top factor being pay. Inflationary impact on salaries has eroded the agency's competitiveness in the workforce market over the years. The agency has exhausted all internal options for cutting other costs and does not have other funding sources to help meet this need.

Texas A&M Forest Service is statutorily responsible for wildfire suppression in Texas and is best positioned to respond to wildfires that exceed local capabilities. Since 2002, the number of volunteer firefighters in Texas has declined by 21% while the state's population has increased by 36%, resulting in increased requests for Texas A&M Forest Service firefighters to respond to wildfires. From 2015 to 2021, Texas A&M Forest Service responded to 5,004 wildfires for 1.6 million acres burned and 11,888 homes saved.

Federal policy changes for certain suppression aircraft support costs change the timing of when Texas A&M Forest Service has to pay the bills. Previously these costs were paid by the USFS and later billed to Texas A&M Forest Service, which allowed us time to obtain a supplemental appropriation to pay for them. Now, the costs must be paid immediately and funding for them was not factored into previous TWPP funding requests.

**PCLS TRACKING KEY:**

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Out-year costs include (1) Salaries, wages, and operating, (2) equipment and vehicle replacements, and (3) federal contract costs (such as aviation support).

2026	2027	2028
\$15,700,000	\$15,700,000	\$15,700,000

**APPROXIMATE PERCENTAGE OF EXCEPTIONAL ITEM :** 37.00%

**CONTRACT DESCRIPTION :**

Description of goods or services to be procured by contract: Vehicles and heavy equipment, building rental, and federal contract costs.

Expected duration of the anticipated contract or contracts: Building rentals are typically done for a 1 to 5-year period, depending on the circumstances. Federal, state, and cooperative contracts are used as needed and the agency has no obligation beyond the year of purchase.

Anticipated method of procurement for the contract or contracts: Texas A&M Forest Service uses existing state, federal (GSA), or cooperative purchasing contracts to the maximum extent possible. For items not currently under contract, the agency issues a request for bid on the Electronic State Business Daily.

<b>TOTAL, METHOD OF FINANCING</b>		<b>\$8,948,452</b>	<b>\$8,948,451</b>

**DESCRIPTION / JUSTIFICATION:**

Funding will be used to help reduce the growth in backlog of unfunded VFD and TIFMAS grant requests

VFD Grants (Requested MOF - Fund 5064)

- Program established by the 77th Legislature in 2001. Help volunteer fire departments (VFDs) sustain and improve local firefighting capabilities. VFD grants are for fire trucks, protective gear, equipment and training for eligible VFDs. Since 2002, the program has provided 2,062 trucks, 64,646 pieces of equipment ( emergency, firefighting and personal protective), and training tuitions for 120,624 firefighters.

TIFMAS Grants (Requested MOF - Fund 036)

- Program transferred to TFS by the 81st Legislature in 2009. Help TIFMAS departments sustain and improve the state's surge capacity. TIFMAS grants are for fire trucks, protective gear and training to participating municipal fire departments. Since 2010, this program has provided 61 fire trucks, 540 pieces of protective equipment and training tuitions for 10,743 firefighters. Participating departments agree to maintain and mobilize this equipment at the request of the state to help meet critical emergency response operation needs.

- TIFMAS mobilizations were used to support state operations for wildfires in 2009, 2011, 2012, 2015, 2016, 2017, 2018, 2019, 2020, and 2021, Hurricane Ike, the 2009 Presidio Flood, Hurricane Alex, the plant explosion in West, floods in 2016 and 2017 and Hurricane Harvey, Winter Storm Uri, and COVID-19. Since 2008, TIFMAS mobilizations have provided 7,790 firefighters and 1,730 fire engines during state-led emergency response to disasters. 2021 Fire Response - 928 firefighters and 149 engines from 89 FD's

Agency code: **576** Agency name: **Texas A&M Forest Service**

<b>CODE</b>	<b>DESCRIPTION</b>	<b>Excp 2024</b>	<b>Excp 2025</b>
-------------	--------------------	------------------	------------------

- Currently funds 6 fire trucks and training grants for 1,650 firefighters per biennium.

Funding will be used in the TWPP VFD Grants and TWPP TIFMAS Grants strategies.

**EXTERNAL/INTERNAL FACTORS:**

VFD Grants

The current backlog of unfunded VFD grant requests is \$158,961,400. On average, VFD grant requests exceed current funding by \$16.7 million/year. VFDs are the state's first line of defense against wildfires and are often the first responder to vehicle accidents on the state's roads and highways. The response areas for VFDs covers 89% of the state.

The cost of fire trucks continues to increase, thereby making it more difficult for VFDs to be able to afford them on very limited resources.

TIFMAS Grants

Currently the program has \$23.4 million in unfunded requests. Benefits both rural and urban/municipal fire departments by providing a mobile pool of mutual aid resources.

Total combined impact of VFDs and TIFMAS departments for FY2005-FY2021 is \$7.44 billion in property values saved (\$7.1 billion net taxpayer savings after state funding) and 69,168 homes saved.

**PCLS TRACKING KEY:**

**DESCRIPTION OF ANTICIPATED OUT-YEAR COSTS :**

Out-year costs include grants payments to volunteer fire departments and TIFMAS departments.

	<b>Total Expenditures</b>		<b>15.5%</b>		<b>\$1,189,612</b>	<b>\$7,653,104</b>		<b>23.4%</b>		<b>\$1,387,119</b>	<b>\$5,916,862</b>	

**B. Assessment of Attainment of HUB Procurement Goals**

**Attainment:**

The agency attained or exceeded two of five, or 40% of the applicable agency HUB procurement goals in FY 2020.

The agency attained or exceeded four of five, or 80% of the applicable agency HUB procurement goals in FY 2021.

**Applicability:**

The "Heavy Construction" category was not applicable to agency operations in fiscal year 2020. The agency did not have any estimated purchases related to that category.

The "Heavy Construction" category was not applicable to agency operations in fiscal year 2021. The agency did not have any estimated purchases related to that category.

**Factors Affecting Attainment:**

As an emergency response agency, a substantial amount of purchases are for highly specialized equipment and services required to support agency operations in wildfire suppression/prevention, forest development, and other forestry related operations. The agency continues to experience a challenge in locating the HUB vendors that can actually bid on and supply these specialized items. Additionally, emergency purchases that occur in remote areas of the state, continue to create situations where (a) the available HUB vendor base is very limited or non-existent, or (b) there is inadequate time to locate HUBs.

**C. Good-Faith Efforts to Increase HUB Participation**

**Outreach Efforts and Mentor-Protégé Programs:**

Outreach - Participated in TAMUS HUB Performance Improvement Plan activities and SMSDC Virtual Vendor Expo on November 5, 2020.

**6.A. Historically Underutilized Business Supporting Schedule**  
88th Regular Session, Agency Submission, Version 1  
Automated Budget and Evaluation System of Texas (ABEST)

Date: **8/1/2022**  
Time: **12:52:19PM**

---

Agency Code: **576**      Agency: **Texas A&M Forest Service**

Mentor-Protégé Program - sponsored one mentor protégé relationship - EPMA CORP dba Johnston Supply Houston (mentor) with Competitive Choice Inc. (protégé)

**HUB Program Staffing:**

Contract Officer - 50% of time spent on locating HUB vendors for bidding opportunities.

Buyer - 50% of time spent on training field staff and assisting staff with locating HUB vendors . Also spent 50% of time placing orders with HUB vendors.

Purchasing Department Head - 50% of time spent on training field staff and assisting staff with locating HUB vendors .

Administrative Associate - 50% of time spent on training field staff and assisting staff with locating HUB vendors .

**Current and Future Good-Faith Efforts:**

During FY2020 and FY2021 the agency made the following good faith efforts to comply with statewide HUB procurement goals per 1 TAC Section 111.13(c): 1) Insured that all delegated purchases were in accordance with adopted CPA rules and procedures in regard to HUB programs ; 2) Identified potential HUB subcontracting opportunities that require subcontracting plans for contracts of \$100,000 or more and, where such opportunities existed, provided potential bidders with referenced list of certified HUBs for subcontracting; 3) Participated in System and Statewide HUB Economic Forums, including: ACCESS 2020 (virtual) on August 4th, 2020 and ACCESS 2021 (virtual) on May 24th, 2021; HUB Discussion Workgroup Meeting (virtual) on May 17th, 2021; TUHCA Virtual Meeting on June 9th, 2021; HUB Discussion Workgroup Meeting on June 30th, 2021 and HUB Talk Series - HUB Reporting 101 on September 2nd, 2021.
