# FAMIS – Screens for Workday

#### Introduction

As part of the transition from B/P/P to Workday, many screens and functions formerly found in the BPP System now reside in FAMIS. Several new screens have been added and others have been modified to replace existing B/P/P screens or to provide new functionality that is needed for the Workday HCM implementation.

This manual provides a screen cross walk, functionality change summaries and introduction of additional screens which have been created.

The chart below provides information for each screen:

- FAMIS Screen Number and Title
- B/P/P Screen equivalent
- B/P/P Title
- Screen Type(Inquiry or Update or Both)
- Update control suggested area to maintain screen values
- Update / Primary User

Following the chart, we include screen examples and further documentation for each new screen.

BPP users which are required to maintain or review any of the screens covered in this document, may require FAMIS Security access to continue those activities. A list of Security Administrators can be found on the following site for all Members: <a href="https://it.tamus.edu/famis/security/famissecadmins/">https://it.tamus.edu/famis/security/famissecadmins/</a> Access requests should be directed to the appropriate contacts on this list.

Please contact FAMISHelp@tamus.edu with any questions.

## Screen M72 – Payroll Accounting Menu

Screen M72 is a Menu of screens that have been added to FAMIS to support additional functionality needed for the Workday HCM system.

This is an inquiry only screen and no explicit security is required for a valid FAMIS user to be able to view this screen.

```
M72 Payroll Accounting Menu

## Screen 720 - Part / Account Maintenance

Screen 720 is used by TAMUS Members who do not use FAMIS as their accounting system of record. The screen is used to maintain a list of valid payroll accounts. The information provided on this screen can be maintained by both a batch interface file provided by the Member and/or online screen entry by the Member.

FAMIS sends this information to Workday on a daily basis. FAMIS uses data from this screen to create and supplement USAS transactions sent to the State for non-FAMIS Members' payroll reimbursement process.

This is an update screen. To update or view the screen, users must have the appropriate screen number access. It is recommended that update access only be given to a select few business office or payroll office users who maintain payroll accounts for the Member. Daily batch files provided by the non-FAMIS member(s) will update any manually entered information.

Initial values to this table are loaded from batch file(s) provided by TEEX and WTAMU.

This screen replaces B/P/P Screen 301 - TAMUS B/P/P System - Part/Account Maintenance.

## Screen 721 - Project Add/Modify

Screen 721 is used to maintain and display projects and project tasks for TAMUS Members that use them in their payroll processes.

A combination of methods is used to maintain the information on this screen, including:

- a) A Member-provided batch interface file that is processed by program FBPU560 (currently used for TEEX project tasks)
- b) A daily batch program (FBPU561) that reads current FAMIS SL/SA accounts for a Member and constructs project numbers based on predefined terms (currently used for TTI projects)
- c) Online data entry by Members

On a daily basis, this entire information is pulled (by program FBPU562) and sent to Workday. The FAMIS payroll posting processes and Payroll Cost Transfers (PCTs) for selected Members use this data to augment the payroll account data the pay history file and associated transactions.

Existing project and project task data from existing B/P/P screens will not be converted.

This is an update screen. To update or view the screen, users must have the appropriate screen number access. It is recommended that only a select few business office or payroll office users be given update access to this screen.

This screen replaces B/P/P Screen 311 - TAMUS B/P/P System - Project Code Maintenance.

### Screen 722 - Adloc Maintenance

Screen 722 is used to add, update, and delete the TAMUS Member Adlocs table. Workday also maintains an org table containing valid TAMUS Member Adlocs. It is important to keep the two Adloc tables in sync because Adlocs are used for varying purposes by both Workday and FAMIS.

On a daily basis, a process is run by the data warehouse to compare the Adlocs used by Workday against those downloaded from FAMIS by the DBAR237 extract program. An exception report is produced identifying any discrepancies. The Workday Operations team is responsible for resolving these discrepancies.

FAMIS program FBWTLDUI downloads the existing BPP Adloc table from B/P/P and FBWTLOAD loads it into the new FAMIS Adloc table.

Screen 722 is an update screen. To update or view the screen, users must have the appropriate screen number access. It is recommended that only a select few business office or payroll office users be given update access to maintain Adlocs on this screen.

This screen replaces B/P/P Screen 306 - TAMUS B/P/P System - ADLOC Maintenance.

#### Screen 723 - Carrier Maintenance

Screen 723 is a centrally controlled screen used to maintain payment information about the various carrier codes used in payroll processing. The values on this screen are used by FBPR5032 to produce the consolidated insurance billing files used by FAMIS.

Screen 723 is an update screen. To update or view the screen, users must have the appropriate screen number access. Users must have Element Security #8 (ACH Information) to view/add/update the ACH information at the bottom of the screen. Since this is a centrally maintained screen, update is controlled and done in the FAMIS Master Campus (cc=00) and access should be given to only a minimal number of central office staff.

Initial values were copied from existing B/P/P tables by FAMIS program FBWTLDCA and loaded into FAMIS by FBWTLOAD.

This screen replaces multiple B/P/P Screens:

- 308 Annuity Carrier Table UT prefix ANU
- 310 ORP Carrier Table UO prefix ORP, SORP
- 403 Dental/Vision Carrier Table 03 prefix DEN
- 408 Medical Carrier Table 08 prefix MED
- 409 CHE Carrier Maintenance 09 prefix CHE
- 415 Employee Organization Maintenance 15 prefix EORG
- 416 State Income Tax Maintenance 16 prefix SIT

FAMIS – Screens for Workday Page 9 of 30

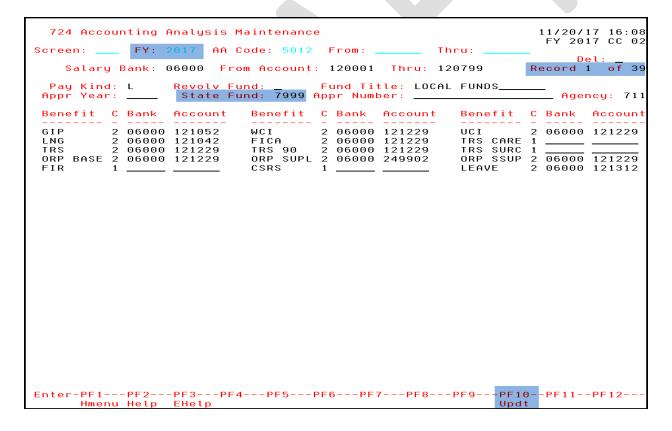

## Screen 724 – Accounting Analysis Maintenance

Screen 724 is used by TAMUS Members to maintain Accounting Analysis (AA) tables which are key to payroll. FAMIS uses data from this screen to distribute payroll benefits to the appropriate accounts and to later send transactions to USAS. This screen is fiscal year oriented. The data on Screen 724 can also be viewed in Canopy.

Screen 724 is an update screen. To update or view the screen, users must have the appropriate screen number access. It is recommended that update access only be given to a select few business office or payroll office users who maintain payroll accounts for the Member. Since this screen is so important to the payroll posting process, extra precautions have been taken to avoid accidental updates. Existing accounting analysis entries can be updated only after the PF10 <Updt> key has been pressed.

Initial AA table values and their association information will be copied from the existing B/P/P tables by FAMIS program XXWDAADN and then loaded into FAMIS by FBWDAAUP. The data can then be updated in any open Fiscal Year.

This screen replaces B/P/P Screen 309 - TAMUS B/P/P System - Accounting Analysis Maintenance.

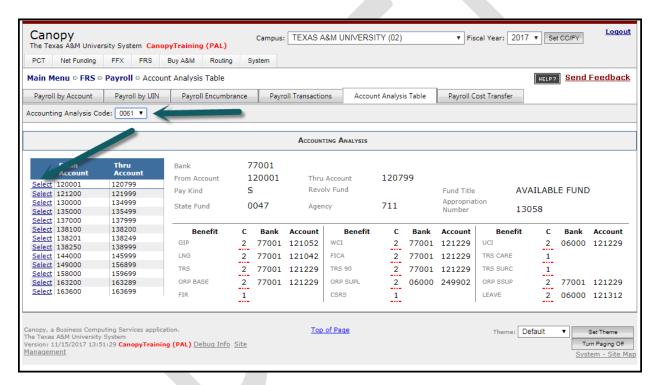

#### **Accounting Analysis Inquiry in Canopy**

The ability to view Accounting Analysis Codes exists in Canopy. Users will access this by logging into Canopy, then go to FRS  $\rightarrow$  Payroll  $\rightarrow$  Account Analysis Table.

Enter the Accounting Analysis Code to view, then all ranges for that Campus/AA Code will appear. View the individual Accounting Analysis settings for each range by clicking the Select next to the range.

Canopy offers view access only, all entry or maintenance must be done in the 3270 screens on Screen 724.

Screen 724 access is required in order to view the data in Canopy. To update or view the screen, users must have the appropriate screen number access. It is recommended that update access only be given to a select few business office or payroll office users who maintain payroll accounts for the Member.

FAMIS - Screens for Workday

## Screen 725 – Accounting Analysis Override

Screen 725 is used by TAMUS Members to temporarily override an account's Accounting Analysis (AA) code to one specified for a select campus code / fiscal year /payroll cycle(s) / time period / account mask / accounting analysis code combination.

When FAMIS receives the pay results file from Workday, FAMIS looks up the AA code associated with each payroll source account and then checks this table to see if the override exists on this table. If so, the new AA code specified on this screen is validated against the Accounting Analysis table (Screen 724), and if it is valid, the new AA code is assigned to the payroll source record. If it is not valid, the payroll source account and associated AA code are set to the campus code's default payroll account/AA value. This substitution is done when the payroll history tape is created and when a Payroll Cost Transfer (PCT) is processed.

Accounting Analysis values can additionally be overridden at the individual UIN level. To view or update the UINs associated with a Part 09 source record overrride, type an 'x' in the "F" (Function) column of the appropriate override line and press <ENTER>. Control is then passed to Screen 726 – AA Override by UIN. View this screen for more detail.

This is an update screen. To update or view the screen, users must have the appropriate screen number access. It is recommended that update access only be given to a select few business office or payroll office users. This screen can also be maintained by the FAMIS Services Help Team upon request.

Initial AA override values and their association information will be copied from the existing B/P/P tables by FAMIS program XXWDAADN and then loaded into FAMIS by FBWDAAUP.

This screen replaces B/P/P Screen 323 - TAMUS B/P/P System - Accounting Analysis Changes.

### Screen 726 – AA Override by UIN

Screen 726 is used by TEEX to override the accounting analysis value that would normally be assigned to a payroll source record (based on the account's AA value / overridden value specified on Screen 725 – Accounting Analysis Override) to one specifically overridden based on the source record's UIN. When FAMIS receives the pay results file from Workday, FAMIS looks up the AA code associated with each payroll source account and then checks the Accounting Analysis Override table to see if an override exists. If it does, but an additional override has been set for the payroll source record's UIN, the new AA code is validated against the accounting analysis table (Screen 724), and if it is valid, the new AA code is assigned to the payroll source record. If it is not valid, the payroll source account and associated AA are set to the campus code's default payroll account/AA value. This substitution is done when the payroll history tape is created and when a Payroll Cost Transfer (PCT) is processed.

To view or update the UINs associated with a source record override, go to Screen 725 (Accounting Analysis Override), type an 'x' in the "F" (Function) column of the appropriate override line, and press <ENTER>. This causes control to be passed to Screen 726 (AA Override by UIN), where specific UIN overrides can be seen or updated. Direct access from Screen 726 is available, but it is not as user-friendly as coming from Screen 725.

This is an update screen. To update or view the screen, users must have the appropriate screen number access. It is recommended that update access only be given to a select few business office or payroll office users.

\*\* NOTE: For initial conversion, Members must manually assign overrides for individuals (UINs) needing specific AA handling.

This screen does not replace an existing B/P/P screen, but replaces B/P/P functionality.

## Screen 727 - College Work Study Maintenance

Screen 727 is used by TAMUS Members to define the portion of a college work study student's salary that is paid from a central account. This information is not passed from the Workday via the pay results calculation. FAMIS receives a Workday pay results source line for an individual with an earnings code of CWS. FAMIS takes the payroll source line's amount, multiplies it by the percentage indicated on the screen, and creates an additional payroll source line for the CWS amount. The original source line's amount is then reduced by this same amount and the original source line is then stored on the pay history file. The accounting analysis code associated with the college work study account is used to determine the benefit funding source(s) of the associated college work study account.

Screen 727 is an update screen that is maintained on each campus by the FAMIS User Services team. To update or view the screen, users must have the appropriate screen number access.

The initial data populating this screen will be manually entered by the FAMIS Services Help staff using a data file provided from the B/P/P Operations Center.

Maintaining this data on a screen is new. B/P/P did not previously maintain this data on a screen.

## Screen 730 – Earning Code / Object Code Table

Screen 730 is used by FAMIS to assign a FAMIS object class code (subcode) to each payroll record based upon its Workday earnings code plus additional fields. Earnings attributes are associated with each earnings code to indicate the earning code is eligible for certain benefit types, FICA, etc.

Data for this screen is provided to FAMIS by the payroll accounting functional lead via a spreadsheet that is then loaded via a batch process. Manual changes can be made to this screen, however it is recommended that all changes be made to the spreadsheet and then programmatically loaded to avoid the changes being overwritten with a subsequent batch load.

This is an update screen maintained centrally by the FAMIS User Services team. To update or view the screen, users must have the appropriate screen number access, and be a member of the FAMIS User Services Team.

This is a new FAMIS screen that does not replace an existing B/P/P screen.

Pressing PF6 with the cursor placed on an individual line will display the flag values for GIP, WCI etc...

```

#### Screen 731 - Title Codes

Screen 731 is used to view the Title Code (job profile) table. The information on this screen is provided to FAMIS daily via a Workday integration. This data is also used to populate the previously existing FAMIS Title Code table maintained on Screen 853 – Generic Table. By default, the System Pay Plan / Unified Title Codes are displayed.

Common Pay Plan and Classified codescan be viewed on this screen by changing the 'Type' field in the Action Line to either an 'N' (Non-Classified title codes-UB) or a 'C' (Classified title codes-UC) and entering the appropriate Workstation..

This is an inquiry screen that is updated daily from Workday data feed. To view the screen, users must have the appropriate screen number access.

The initial title code values (U-Unified, C-Classified, and N-Non-Classified) and their associated information will be copied from the existing B/P/P tables by FAMIS program FBWTLDTC and loaded by FBWTLOAD. After the initial load, only the unified title codes will be maintained. A daily title code file will be provided by Workday and FAMIS will use program FBPU731 to update this table.

This screen replaces B/P/P Screens:

- Screen 302 TAMUS B/P/P System Non-classified position
- Screen 303 TAMUS B/P/P System Classified position
- Screen 455 SPP Title Code Maintenance

## Screen 732 - Employee ACH

Screen 732 is a restricted screen containing ACH information that employees provided to Workday to be used for Accounts Payable-type reimbursements. FAMIS receives an updated file of employee A/P ACH information from Workday daily and uses the FBPUACH program to both update existing FAMIS vendor records and to store them in this table. The table is kept to be used in cases where the employee gets added as a vendor on one or more FAMIS campuses, then the ACH information can be automatically populated on that vendor record. FBPUACH only updates only vendor records with a vendor type of EM, IN, or ST that match an active employee's Federal Tax ID.

This is a confidential Inquiry Only screen. To view data on the screen, users must have the appropriate screen number access AND FRS Security Element #8 – ACH Information. Few people should have viewing access to this information, and they should be in the Vendor Administrator and/or the Payroll Office.

This screen supports and enhances functionality that did not exist previously in either B/P/P or FAMIS.

```

## Screen 823 - Payroll Interface Control Record

Screen 823 is an existing FAMIS screen used by TAMUS Members to control FAMIS Payroll postings. It indicates the different types of accounts and banks that are used in the process. For Workday, two default values have been added to the screen:

- SL Account This is the default account that will be used for posting Payroll and/or USAS transactions when the account passed to FAMIS from Workday is invalid for payroll expenditures. The Accounting Analysis value for this default account must be valid and it is used for all associated benefit transactions posted to the default account. Postings to this account must be corrected by Payroll Cost Transfers (PCTs) by the users having payroll access to the employee's Adloc department.
- Adloc This is the administrative location (Adloc) that is used whenever an invalid Adloc is passed to
  FAMIS from Workday. This value is used to identify the appropriate Member or organization when a
  valid value is not provided from Workday.

Members must provide these default values to FAMIS User Services prior to Workday going live.

This is an update screen maintained by the FAMIS User Services team. To update or view the screen, users must have the appropriate screen number access.

## Screen 830 - Employer Payment Credit Account Table

Screen 830 is an existing FAMIS screen used by TAMUS FAMIS Members to identify FAMIS Employer Payment Credit Accounts used for payroll processing. Additional values have been added to the screen to accommodate processes that were previously performed by the B/P/P System.

The new values are:

- CSRS Civil Service Retirement
- FIR Federal Insurance Regular
- FIM Federal Insurance Medicare

Members must provide these accounts to FAMIS User Services prior to Workday going live.

This is an update screen maintained by the FAMIS User Services team. To update or view the screen, users must have the appropriate screen number access.

FAMIS – Screens for Workday Page 22 of 30

## Screen 837 - Employee Deduction, Insurance/Benefits Liability Accounts

Screen 837 is an existing FAMIS screen used by TAMUS FAMIS Members to identify FAMIS employee deductions and insurance and benefit liability accounts used for payroll processing. Additional values have been added to the screen to accommodate processes that were previously performed by the B/P/P System.

#### The new values are:

- BNKR Bankruptcy
- CHAR Charitable Contributions
- CHE Charitable Cont. Higher Ed
- COD Court Ordered Deductions
- CSRS Civil Service Retirement
- EORG Employee Organization Deduction
- FIA Federal Ins Opt A
- FIB Federal Ins Opt B
- FIC Federal Ins Opt C
- FIR Federal Insurance Regular
- LEVY Tax Levy
- LIT Local Income Tax
- PARK Parking
- SIT State Income Tax
- STDL Student Loans
- S4S Save For Summer (formerly EPP)
- TTF Texas Tomorrow Fund
- TXPR Texas Protects
- USRF User Service Fee

Members must provide these accounts to FAMIS User Services prior to Workday going live.

This is an update screen maintained by the FAMIS User Services team. To update or view the screen, users must have the appropriate screen number access.

## Screen 863 - Payroll Accounting Tables

Screen 863 is a generic table that is used primarily for Workday payroll related functions. Tables maintained on 863 (flagged with a 'Y' in the "Maint on 863" field) are maintained centrally by FAMIS User Services. Entries not maintained on 863 typically have a companion FAMIS screen that is used to maintain their values by Member users.

This is an update screen maintained by the FAMIS User Services team. To update or view the screen, users must have the appropriate screen number access.

This screen replaces many table values from the B/P/P system, including those accessed and maintained by B/P/P Screen 450 - TAMUS B/P/P - System Tables Maintenance.

## Screen 755 – Payroll Encumbrances by PIN

Screen 755 shows all payroll encumbrances by PIN for FAMIS Members. Prior to the implementation of Workday Payroll, this screen only showed salary and wage encumbrances, not those for supplements or EPA corrections in process. These encumbrances shown are typically initially created by the original budget load process and are then updated through payroll postings and/or auto-adjust process. Both salary and supplemental encumbrances are now updated via the initial budget load, daily encumbrance load, and auto-adjust processes.

This is an inquiry only screen. Users must have both inquiry access to this screen and the EPHIST entity to view information for PINs on this screen
