Section I
FAMIS 1099 Processing
Summary

The FAMIS 1099 process is a series of IT processes combined with end-user 1099 processor actions that result in the creation and delivery of the IRS-required 1099 documents.

The FAMIS A/P Voucher data table is scanned for payments made during the tax year, and based on moderately complex selection criteria, voucher payments are selected for 1099 processing and review. FAMIS provides a series of screens that allow 1099 processors in each A&M System business office to edit and adjust the voucher records that have been selected.

The business offices are given about three weeks to make the necessary edits and adjustments and then the editing process is closed and final reports are produced. The data is then packaged up and sent to the 1099 Pro application.

The 1099 Pro application allows for further edits and review, but ultimately the 1099 Pro application is used to mail and print the 1099 forms, create the files, and file the 1099 files with the IRS.

Background

In October 2020, much of the FAMIS process was rewritten to simplify and streamline a process that had become technically fragmented and confusing. It was also not well documented.

Overall, the changes can be summarized as follows:

- Voucher selection is now streamlined and was moved to a single program: VBYR200. Significant hardcoding has been removed and moved into the FAMIS control tables.
- Coding for the 1099-G object code is now in the standard table.
- Coding for interest vouchers and GL Code 1616 are now in the standard table.
- IT batch processes now run all A&M System members at the same time.
- Creation of the IRS Fire files is now the responsibility of the 1099 Pro application.
- 1099 thresholds are applied at the IRS form box level, not at the overall form level.
- The 1099 Pro application will provide the ability to reprint, correct, and submit 1099 forms.
Set Up the Object Code Tables for the New Tax Year

In February, after completion of the prior tax year processing, the 1099 object codes should be reviewed and set up for the new year.

The System Office of Budgets and Accounting (SOBA) maintains a master object code database. As of October 2020, this can be found at https://apps1.system.tamus.edu/objcodes/. SOBA staff should review that database for accuracy and compare it to the FAMIS control tables.

FAMIS support staff must set up and review the object code tables the new tax year.

- **Table of 1099 object codes**
  - FAMIS tables 1099-SUBCDYYYY, where YYYY is the tax/calendar year
  - Maintained and viewable in FAMIS Screen 853

- **Table of 1099 exception / override codes**
  - FAMIS tables 1099-SUBCDYYYYE, where YYYY is the tax/calendar year
  - Maintained and viewable in FAMIS Screen 853
  - These codes are the Medical and Legal payments codes that force voucher items to move into the 1099 process regardless of the vendor type.

- **Table of reimbursement object code (primarily Travel)**
  - FAMIS tables 1099-SUBCDYYYYR, where YYYY is the tax/calendar year
  - Maintained and viewable in FAMIS Screen 853
  - These codes are for reimbursable expenses.
  - Special business logic in the selection rules excludes payments to TAMUS employees from being added to the 1099 working database.

- **Table of Qatar sponsor codes**
  - FAMIS tables 1042S-EXSPNYYYY, where YYYY is the tax/calendar year
  - Maintained and viewable in FAMIS Screen 853
  - Voucher tied to theses sponsor codes are omitted from reporting.
During the Tax Year – Reporting and Review

During the tax year, the VBYR202 report (report ID VxxVR202) will be run periodically and placed in the Laserfiche Accounts Payable folder. The primary purpose of this process is to give the business office a preview of the upcoming 1099 reporting cycle and to address and handle any 1099 adjustments early.

Four reports are produced by VBYR202:

- **Full Detail:** The full detail report shows every voucher that has been selected for 1099 processing. Not every payment that is selected will result in a 1099; when aggregated many payments may not reach the threshold, and no 1099 will be created.

- **1099 Forms Created:** This report shows only the aggregate totals by taxpayer ID and only includes the forms that meet the appropriate threshold for that payment type.

- **1099 Warning and Review:** This report currently has six categories of payments that should be reviewed by the business office:

  - W2-Employees: This list will not trigger 1099s but should be reviewed to see if an emolument should be recorded in Workday to reflect a taxable payment to an employee.
  
  - Foreign Vouchers: Payments made to vendors marked as foreign vendors. These payments are not included in the 1099 process. Voucher entries tied to college QT accounts for select campus codes or to funds from Qatar sponsors are omitted.
  
  - Alternate Vendors: A list of vouchers for which the alternate vendor has been used.
  
  - Employees: Payments made to employees that are 1099 reportable. Since a 1099 should not be generated for an employee, an emolument should be entered in Workday for the payment amount, and the voucher should be marked “N” during the 1099 reporting editing cycle in January.
  
  - Vendor 1099=N: The vendors were set up and marked as 1099=N. However, these vouchers are now included in the 1099 process and subject to review.
  
  - Medical and Legal: All payments on the Medical / Legal object codes are 1099 reportable regardless of the vendor type. These should all be reviewed.

- **1099/1042S Foreign Vendors:** This report is a subset of the 1099 Warning and Review report (category 2 foreign vouchers). It is included as a separate report to aid system members in producing IRS form 1042S as required.
The data from the four reports above are also now available for download in CSV format. These files are available in the File Transfer Portal, under the Download F1099 folder and then the specific member:

**F1099.TYyyy.***

- **F1099.TYyyy.DETAIL.CSV**
  - This file has all voucher detail that has been selected for 1099 processing. Note that this file includes vendor payments that may not have met the reporting amount threshold.

- **F1099.TYyyy.SUBMIT.CSV**
  - This file has all a single row for each 1099 that will be submitted. Only payments that aggregate and exceed the reporting threshold will be included.

- **F1099.TYyyy.WARN.CSV**
  - This file contains all warnings as described in the previous section.

- **F1099.TYyyy.FRGNVEND.CSV**
  - This file contains only the Foreign Vendor warnings as described in the previous section.

Once downloaded, the CSV files should be able to be opened directly into Excel.

For access to the File Transfer Portal, please complete the File Transfer Portal Access Request Form on our website, [https://it.tamus.edu/famis/services/security/](https://it.tamus.edu/famis/services/security/) and submit to the appropriate FAMIS Security Administrator for review. If the request is approved, they will forward to FAMIS Services to grant the access.

**Annual Review – August to October of the Tax Year**

SOBA staff, FAMIS Operations, and FAMIS support staff should take the following actions:

- Review IRS regulations for potential changes that impact the process.
  - Specifically review box reporting amount thresholds
  - Review form or box number changes

- Review 1099 Pro Filer (Payer) mappings and addresses.
  - Each TAMUS System member (except campus 26 and 27, which are included with 01-System offices, is defined as a payer or filer in the 1099 Pro application.
  - This configuration should be reviewed by TAMUS/SOBA staff each year.

- Determine if 1099 Pro has any changes to its software that will impact TAMUS and its integration to 1099 Pro.
  - Review 1099Pro form upload mappings in conjunction with any integration changes.

- Review object code table setup and configuration (Section 3.1).

- Review and adjust Tables of TAMUS IRS codes used on form 1099-xxxx (G, INT, MISC and NEC). (See VBYR205 developer notes below for detail.)
  - 1099-G-BOX
  - 1099-INT-BOX
  - 1099-MISC-BOX
  - 1099-NEC-BOX
Vendor Setup and Vendor Ownership Codes

System members should ensure that vendors are being set up with proper ownership codes so that 1099 processing will be accurate.

Utilization of the FAMIS Master Vendor table can assist members in this assurance. Although the Master Vendor table was created for use in AggieBuy, the vendors created on this table are available for use by any member, including those not participating in AggieBuy. The Master Vendor table is maintained by the TAMU Vendor Setup Team; their website is:

https://fmo.tamu.edu/accounts-payable/vendor-setup/

Voucher Entry

System members should be reminded that they can override 1099 processing rules as they enter and process vouchers in the FAMIS A/P system. Setting the voucher 1099 flag to “N” will prevent a voucher payment from being selected for 1099 processing. Forcing a voucher 1099 flag to a reportable code will cause that voucher to be selected for 1099 processing.
Tax Year Processing - January

This section of the document enumerates the steps and procedures that must be taken in order for the 1099 process to be completed.

January Processing – Voucher Selection and Loading the 1099 Reporting Tables

On or about January 4 or 5 of the new year, 1099 processing season begins. The VR200 and VR201 processes are run to identify and select vouchers for loading to the FAMIS 1099 working tables. These tables are viewable and maintained in FAMIS Screens 180 through 189.

Another version of the VBYR202 report will also be produced.

January Processing – Selection Criteria

This section provides the detailed business logic used to select FAMIS vouchers for the 1099 selection process.

FAMIS Voucher Table

The FAMIS voucher table is scanned to find all vouchers with a check date or a state voucher print date in the tax year. Voided, dropped, and canceled voucher are excluded.

Prompt pay interest pending vouchers are also scanned in the rare case that a check dated in December does not have its prompt pay interest accounting posted until January.

Foreign Vendor Voucher Payments

Any payment made to a vendor with an “R” (foreign) ownership code is bypassed and not selected for 1099 processing. All bypassed foreign vouchers are written to the VBYR202 warning report and are also added to the warning CSV file. (See note in Section 3.2 above).

Voucher Payments on GL Object Code 1616

GL payments made on Object Code 1616 are always included and selected for 1099 processing. This object code is now found on the standard 1099 Object Code table.

Payment Card Vouchers - Excluded

Voucher payments made for purchases on the A&M System payment card program are excluded from the selection process. These are identified as:

- Payments made to the Credit Care Vendor. Currently identified by a hard-code on the Vendor ID
- Vouchers with a voucher type of “C” and a USAS doc type of “2”. These vouchers originate from Concur and are for the payment card program. Vouchers from the travel/expense part of Concur could be included if they meet the other criteria.
Voucher Payments to Employees
The voucher taxpayer ID is compared to the FAMIS employee tables received from Workday. If a payment was made to a vendor that is matched to the employee table, then the voucher is flagged as an employee payment.

Two notes:
- Voucher payments to employees that are for reimbursable expense (e.g., travel) are not selected and NOT loaded to the 1099 working tables.
- Vouchers flagged as payments to employees are included in the FAMIS 1099 working tables. They are also included in the warning report. 1099 processors should do the following:
  Process for employees:
  - If the employee is an active employee, ensure they have an emolument created in Workday to ensure proper taxes are withheld and paid
  - Once the emolument is entered, the employee payment voucher can be marked as 1099=N on FAMIS Screen 180.

Prompt Payment Interest Vouchers
Prompt payment interest vouchers are identified on the regular 1099 table with an “I” TAMUS IRS mapping code. As of October 2020, these include GL Subcode 5680 and SL Subcode 6230.
- No vendor ownership codes are excluded from selection of prompt payment interest. All of these vouchers are passed to the 1099 working databases.

Vouchers for Medical and Legal Payments
All payments on the Medical / Legal object codes are 1099 reportable regardless of the vendor type.

No ownership exceptions are made for voucher payments and legal payments. However, all of these payments are written to the VBYR202 warning report and also the warning CSV file for review.

Vouchers for Reimbursements
Payments made to vendors using the object codes on the 1099E table (exception table) are selected for 1099 processing unless the vendor or the alt-vendor is marked as vendor type code equals ‘EM’.

Payments on reimbursable expenses are generally travel expenses.

All Other Voucher Payments
The following vendor ownership codes are excluded from the remaining selection criteria:
- C – professional corporations
- U – state agency / university
- T – Texas corporation
- O – Out-of-state corporations
- G – Governmental entities
For all other vendor ownership codes, if the voucher payment object code is found on the regular 1099 table or on the 1099-R (reimbursement) object table, the voucher will be selected for 1099 processing.

The one exception to the above rule is if the voucher itself was coded as 1099=N when created in FAMIS.

**Note on Alternate Vendor Processing**

The FAMIS alternate vendor will be used if the payment voucher was paid on one of the “reimbursement” object codes, and an alternate vendor exists.

Prompt pay interest payments for reimbursement voucher will also use an alternate vendor if one is present.

**VBYR206 Report during January**

During January, the VBYR206 report will be run daily and added to the system member’s Laserfiche repository.

While many voucher payments may be loaded into the 1099 working tables, aggregate payments to vendors must exceed IRS thresholds before an actual 1099 form is created and sent.

The VBYR206 report will perform the aggregation and filtering so that only 1099 forms to be sent will be present on the report.

The data from the VBYR206 report creates downloads in CSV format. These files are available in the File Transfer Portal, under the Download F1099 folder and then the specific member:

**F1099.TYyyyy.***

- **F1099.TYyyyy.PRO.WARN.CSV**
  - This file has any warnings reported for each 1099 to be submitted.

- **F1099.TYyyyy.PRO.SUBM.CSV**
  - This file has the data for each 1099 to be submitted

Additionally, the VBYR206 report will:

- Inspect change to the 1099 flag made in the FAMIS 1099 working data tables and include or exclude voucher payments as specified in those tables.
- Apply any vendor address and type changes in the Vendor table to the 1099 working tables if the individual working table record has not been previously updated through screens 180, 184 and 187.
January Processing – FAMIS Screens 180 through 189 Editing

FAMIS Screens 180 through 189 are to be used by 1099 processors to accomplish the following tasks:

- Change the 1099 flag on a particular voucher payment, usually to exclude it from the process.
- Add payments that may have been missed to the FAMIS 1099 working database.
- Correct tax IDs, addresses, and other items as needed.

Non A/P Payments

Non-A/P payments may be reported via the 1099 process by making a manual entry on Screen 180 (MISC) or Screen 187 (INT). The process is as follows:

- Type a “dummy” voucher number and voucher item number on the Action Line. Leave Pull from A/P field as “N,” and press <ENTER>.
- Enter the Net Amount, a Vendor number, Federal Tax ID, and IRS Indicator (Reporting Box) fields.
- These entries can be validated by reviewing the VBYR206 report on the following day to verify that the entries do appear on the report.

Notes on Address Mapping

Addresses on the FAMIS Vendor table and contain four address lines as well as the City, State, and Zip code.

The IRS 1099 forms and 1099-Pro allow for addresses as follows:

- a Payee Name
- a second line for Payee name
- address Line 1
- and address Line 2

The FAMIS integration with 1099-Pro (and subsequently the IRS) maps the address lines as follows:

When the address on screen 180 (or 184 or 187) in FAMIS contains one or two address lines:

- Vendor name is mapped to Payee name
- The second line for Payee name is left blank
- Address line one is mapped into the “Address Deliv / Street” column.
- Address line two is mapped into the “Address Apt / Suite” column.

When the address on screen 180 (or 184 or 187) in FAMIS contains three or four address lines:

- Vendor name is mapped to Payee name
- Address line one is mapped into the Payee Name 2 column
- Address line one is mapped into the “Address Deliv / Street” column.
- Address line two is mapped into the “Address Apt / Suite” column.
- Address line four is not mapped to column and will not be included in the IRS file or on the 1099 mailer.

*Also Note: Any address line beginning with an exclamation point will be skipped during the upload extract process (VBYR205).*
Employees, W2s and Workday

The FAMIS VBYR202 report now contains a record of voucher payments made to employees. The warning CSV file also contains payments made to employees who will be receiving W2 forms.

*See the 1099 Extracts/Reports section for detailed information on the VBYR202 warning report.*

These payments should be reviewed. Process for employees:

- If the employee is an active employee, ensure they have an emolument created in Workday so that proper taxes are withheld and paid.
- Once the emolument is entered, the employee payment voucher can be marked as 1099=N on FAMIS Screen 180.

*All previous reports from BPP or FAMIS or BPP are now obsolete, including VBYR152, VBYR153, VBYR154, VBYR155, VBYR9105, VBYR9106, VBYR9107, and VBYR9108.*

FAMIS Process Completed - 1099 Pro Process Begins

The A&M System now uses software from 1099 Pro to print, mail, file and make corrections to 1099 forms after the process in FAMIS is complete.

*This will normally be around the 23rd or 24th of January.*

At the completion of the FAMIS process, aggregate data (as shown on the VBYR202 report) will be placed in files and sent by the FAMIS support staff to 1099 Pro.

- Data will be imported into 1099 Pro.
- Final validations will occur.
- Forms will be scheduled and sent for printing and mailing.
- Data will be sent to the IRS.

1099 Corrections and Reprints

Beginning in Tax Year 2020, the A&M System will begin to use 1099 Pro software for two additional purposes:

- Reprints can be done in 1099 Pro, and PDFs can be printed or emailed to vendors.
- 1099-C corrections can be issued and sent to the vendors and the IRS.

Access to 1099 Pro will be extended to two users per member; this restriction is due to the limitation on the number of licenses the A&M System has in the contract with 1099 Pro.

Users requesting access should complete the 1099 Pro Access Request Form on our website (https://it.tamus.edu/famis/services/security/) . Once it has been reviewed and approved by their supervisor, it should be emailed to FAMIS-Security@tamus.edu for processing.
FAMIS Operations Production Process

Job F13VR200 – Select and Extract FAMIS Vouchers
The process reads the FAMIS voucher tables for all system members and creates two files:
- The master warning file
- The file used for reporting in VBYR202. This file is also used in VBYR201 for loading up the FAMIS working 1099 databases.

Program VBYR202 is included in this job and is run for all members.
- Frequency: April, June, September, November – reporting only
- Separates the warning file by system member and creates the CSV files for download
- Produces reports for each system member (all members in this job)

Job F13VR201 – Load IRS 1099 Working Tables
- Frequency: Once a year only
- Loads data from the file created by F13VR200 to working files

Job F13VR205 – Reports during Working Period
- Runs VBYR205 for all members in a single pass
- Runs VBYR206 for each system member
- Frequency: daily during the January 1099 season
- Produces files and reports from the 1099 working database
- Specifies the tax year and retrieves data for that tax year from the 1099 working database

1099 Pro data file uploads
- Uploading to 1099Pro
  K:\FA\DOC\WRKNPRCS\AP\1099\Uploading to 1099Pro.docx

1099 Pro – IRS Error Handling
- 1099 Pro provides feedback back on IRS answers to the IRS file process.

More information to follow.
## 1099 Extracts and Reports

**VBYR200**

Reads the FAMIS voucher tables for all system members and creates two files:
- The master warning file
- The file used for reporting in VBYR202. This file is also used in VBYR201 for loading working 1099 databases into FAMIS

**VBYR202**

Three reports are produced by the VBYR202:
- **Full Detail:**
  The full detail report shows every voucher that has been selected for 1099 processing. Not every payment that is selected will result in a 1099; when aggregated many payments may not reach the threshold, and no 1099 will be created.
  - This report is also available in a download: K7xxFA.DOWNLOAD.F1099.TYyyyy.DETAIL.CSV
- **1099 Forms Created:**
  This report shows only the aggregate totals by taxpayer ID and only includes the forms that meet the appropriate threshold for that payment type.
  - This report is also available in a download: K7xxFA.DOWNLOAD.F1099.TYyyyy.SUBMIT.CSV
- **1099 Warning and Review:**
  This report currently has six categories of payments that should be reviewed by the business office:
  1. W2-Employees: This list will not trigger 1099s but should be reviewed to see if an emolument should be recorded in Workday to reflect a taxable payment to an employee.
  2. Foreign Vouchers: Payments made to vendors marked as foreign vendors. These payments are not included in the 1099 process.
  3. Alternate Vendors: A list of vouchers for which the alternate vendor has been used.
  4. Employees: Payments made to employees that are 1099 reportable. Since a 1099 should not be generated for an employee, an emolument should be entered in Workday for the payment amount, and the voucher should be marked “N” during the 1099 reporting editing cycle in January.
  5. Vendor 1099=N: The vendors were set up and marked as 1099=N. However, these vouchers are now included in the 1099 process and subject to review.
  6. Medical and Legal: All payments on the Medical / Legal object codes are 1099 reportable regardless of the vendor type. These should all be reviewed.
  - This report is also available in a download: K7xxFA.DOWNLOAD.F1099.TYyyyy.WARN.CSV
1099 Extracts and Reports (cont’d)

**VBYR201**  Loads working 1099 databases into FAMIS for edits.

**VBYR205**  Creates an extract of the current working 1099 database to be reported on VBYR206 and creates a formatted file of data to meet IRS requirements to be imported into 1099 Pro for printing and IRS submission.

**VBYR206**  Produces reports of 1099-G, 1099-INT, 1099-MISC and 1099-NEC data that will be printed on forms and sent to the IRS electronically. Two reports are created by the VBYR206

- **1099 Forms Created:**
  This report shows only the aggregate totals by taxpayer ID and only includes the forms that meet the appropriate threshold for that payment type.
  - This report is also available in a download: K7xxFA.DOWNLOAD.F1099 TYyyyy.PRO.SUBM.CSV

- **1099 Warning**
  This report shows a list of payments that could be errors on the submission of 1099s
  - This report is also available in a download: K7xxFA.DOWNLOAD.F1099 TYyyyy.PRO.WARN.CSV

**VBYR208**  Produces a report of vendor address and type changes in the Vendor tables that have been applied to the 1099 working tables. Changes are only applied to records that have not been previously updated through screens 180, 184 and 187.
FAMIS 1099 Tables

There are multiple tables that are used in the FAMIS 1099 processing. These can be used to flag vendors, vouchers and identify the subcodes that will be included. The information displayed is current as of the 2020 fiscal year.

Table IAFRS-VO-1099-FG
This table provides the values for marking the (in this document, this is referred to as the TAMUS IRS IND) on the voucher create screens, Screens 104, 112 and 345. This field is displayed on the Voucher Line Item Inquiry, Screen 169.

- Voucher lines with 1099 field) marked as “N” are excluded from the 1099 extract.
- Voucher lines with 1099 field marked as “F” are excluded from the 1099 extract, but are written to the warning report for foreign vendor reporting evaluation.
- When this field is set to any other values listed in this table, the voucher line is included in the extract.
- TAMUS IRS IND = “G” will create a 1099-G Form
- TAMUS IRS IND = “I” will create a 1099-INT Form
- TAMUS IRS IND = “7” will create a 1099-NEC Form
- All other values for TAMUS IRS IND create a 1099-MISC Form

Table IAFRS-VN-1099-1042-CD
This table provides the values for marking the 1099 flag on the vendor set up screens. These include the Master Vendor Add/Modify, Screen 401 and the Member Vendor Add/Modify, Screens 103 and 203.

- When this field is set to “N”, payments are excluded from the 1099 extract.
- When this field is set to “2”, payments are excluded from the 1099 extract, but are written to the warning report for foreign vendor reporting evaluation.
- When this field is blank, payments will need to be analyzed at the voucher level.
- When this field is set to “Y,” payments are included in the extract.

Screen 180 – 1099-MISC Record Add/Modify/Delete

Screen 180 is used as part of the Federal Government 1099-MISC and 1099-NEC tax reporting process and is used to access and edit the 1099 data in FAMIS. The information shown is pulled from the voucher file according to the selection criteria, which makes a payment reportable as a 1099-MISC or 1099-NEC.

Changes to this screen do not change the information on the voucher file.

The edits made on this screen change the data that is reported to the IRS.

Note: This screen is used as part of the Federal Government 1099-MISC tax reporting process. The information displayed should be verified for accuracy to avoid any IRS penalties. 1099-MISC Vouchers selected should be paid within the calendar year from Jan 1st through Dec 31st.

Basic Steps

• Enter a voucher number in the Voucher field, and include the Item number and the Fiscal Year of the voucher to be displayed.  
  (NOTE: The Fiscal Year has to match the fiscal year of the voucher.)

• If the voucher number doesn't exist in the 1099 file, you may search the voucher file by typing “Y” in the Pull from AP field and pressing <ENTER>.
  ▪ The required information will be filled in automatically.
  ▪ Make necessary modifications and press <ENTER>.

• Add or modify information as needed, and press <ENTER>.
  ▪ To search for the vendor ID, type an asterisk (*) in the Vendor field, and press <ENTER>.
    o Type an “X” in the selection field next to the vendor to be selected, and press <ENTER> to pass the information back to Screen 180.
    o If an address change is required on a voucher, all other vouchers with the same vendor number and tax ID will also be updated.

• If the record is to be deleted, type “Y” in the Delete field, and press <ENTER>.
Field Descriptions (◆ = Required; Help = Field Help using PF2, ? or *)

**Action Line**

◆ Voucher: 7 digits
Enter a valid voucher number.

◆ Item: 3 digits
Type the item number on the voucher to be modified or deleted. The default is “1.”

◆ Fiscal Year: 4 digits
Indicate the fiscal year in which the voucher was paid.

Pull from AP: 1 character
Type “Y” to pull data from the Accounts Payable database.

**Screen Information**

Tax Year: 4 digits
Displays the calendar year for which you are reporting information to the IRS.

◆ Account: 15 digits
Enter the account number from which the voucher item was paid.

◆ Net Amount: 14 digits
Include the net amount for the item on the voucher.

◆ Description: 35 characters
Type a description of the voucher item.

Date Paid: 8 digits
Enter the date the voucher was paid.

◆ Vendor: 11 digits
Indicate the vendor identification number.

◆ Name: 40 characters
Enter the name as it should appear on the 1099-MISC form.

◆ Remit To Address: 40 characters/digits (4 lines)
Indicate the address to which the 1099-MISC should be mailed.

◆ City: 21 characters
Enter the city for the “remit to” address.

◆ St: 2 characters
Type the state code for the indicated address.

◆ Zip Code: 9 digits
Indicate the Zip Code for the mailing address.

Country: 3 characters
Type the code for the country where the voucher will be mailed.

Fed. Tax Id: 9 digits
Enter the Federal Tax Identification number for the vendor.

IRS Indicator: 1 character/digit
Indicate the type of 1099 payment.
### Vndr 1099 Cd:
1 character
Enter a valid 1099 vendor code.

### Vndr Business Type:
2 characters
Include the vendor business type code used by the IRS.

### Delete (Y/N):
1 character
Type “Y” to delete this 1099-MISC voucher record.

### Additional Functions

| PF KEYS | See the Appendix for an explanation of the standard PF keys. |
Screen 182 – 1099-MISC Vendor Browse/Delete

Screen 182 is used as part of the Federal Government 1099-MISC tax reporting process. The information shown is pulled from the voucher file according to the selection criteria which makes a payment reportable as a 1099.

Once the 1099 data has been extracted and loaded in the file it can be browsed using Screen 182.

Description: 18 characters
Shows a description of the item.

Date Pd: 8 digits
Indicates the date voucher was paid.

Additional Functions

PF KEYS See Appendix for explanation of standard PF keys.
Screen 187 – 1099-INT Record Add/Modify/Delete

Screen 187 is used as part of the Federal Government 1099-INT tax reporting process, and is used to access and edit the 1099 data in FAMIS. The information shown is pulled from the voucher file according to the selection criteria, which makes a payment reportable as a 1099-INT.

Changes to this screen do not change the information on the voucher file.

The edits made on this screen change the data that is reported to the IRS.

Basic Steps

- Enter a voucher number in the **Voucher** field, and include the **Item** number and the **Fiscal Year** of the voucher to be displayed.
  
  **NOTE: The Fiscal Year has to match the fiscal year of the voucher.**

- If the voucher number doesn't exist in the 1099 file, you may search the voucher file by typing “Y” in the **Pull from AP** field and pressing <ENTER>.
  - The required information will be filled in automatically.
  - Make necessary modifications and press <ENTER>.

- Add or modify information as needed, and press <ENTER>.
  - To search for the vendor ID, type an asterisk (*) in the **Vendor** field, and press <ENTER>.
    - Type an “X” in the selection field next to the vendor to be selected, and press <ENTER> to pass the information back to Screen 180.
    - **If an address change is required on a voucher, all other vouchers with the same vendor number and tax ID will also be updated.**

- If the record is to be deleted, type “Y” in the Delete field, and press <ENTER>. 
Field Descriptions (◆ = Required; Help = Field Help using PF2, ?, or *)

**Action Line**

◆ Voucher: 7 digits
   Enter a valid voucher number.

◆ Item: 3 digits
   Type the item number on the voucher to be modified or deleted.
   The default is 1.

◆ Fiscal Year: 4 digits
   Indicate the fiscal year in which the voucher was paid.

Pull from AP: 1 character
   Type “Y” to pull data from the Accounts Payable database.

**Screen Information**

Tax Year: 4 digits
   Displays the calendar year for which you are reporting information to the IRS.

◆ Account: 15 digits
   Enter the account number from which the voucher item was paid.

◆ Net Amount: 14 digits
   Include the net amount for the item on the voucher.

◆ Description: 35 characters
   Type a description of the voucher item.

Date Paid: 8 digits [PF2 Help]
   Enter the date on which the voucher was paid.

◆ Vendor: 11 digits
   Indicate the vendor identification number.

◆ Name: 40 characters
   Enter the name as it should appear on the 1099-MISC form.

◆ Remit To Address:
   40 characters/digits (4 lines)
   Indicate the address to where the 1099-MISC should be mailed.

◆ City: 21 characters
   Enter city for the remit to address.

◆ St: 2 characters [Help]
   Type the state code for the indicated address.

◆ Zip Code: 9 digits
   Include the Zip Code for the mailing address.

Country: 3 characters [Help]
   Type the code for the country to which the voucher will be mailed.

Fed. Tax Id: 9 digits
   Enter the Federal Tax Identification number for the vendor.
Screen 187 – 1099-INT Record Add/Modify/Delete (cont’d)

**IRS Indicator:** 1 character/digit [Help]
Identify the code for the type of 1099 payment.

**Vndr 1099 Cd:** 1 character [Help]
Enter a valid 1099 vendor code.

**Vndr Business Type:** 2 characters [Help]
Include the vendor business type code used by the IRS to describe the type of business.

**Delete (Y/N):** 1 character
Type “Y” if this 1099-INT voucher record should be deleted.

**Additional Functions**

**PF KEYS**
See Appendix for explanation of standard PF keys.
Screen 188 – 1099-INT Vendor Browse/Delete

Screen 188 is used as part of the Federal Government 1099-INT tax reporting process. The information shown is pulled from the voucher file according to the selection criteria which makes a payment reportable as a 1099.

Once the 1099 data has been extracted and loaded in the file it can be browsed using Screen 188.

Basic Steps

- Enter a vendor identification number in the **Vendor** field.
- Specify a **Tax Year**, if other than the default year, and press <ENTER>.
- If the vendor number is unknown:
  - To search for the vendor ID, type an asterisk (*) in the **Vendor** field, and press <ENTER>.
  - Type an “X” in the selection field next to the vendor to be selected, and press <ENTER> to pass the information back to Screen 180.

Field Descriptions (◆ = Required; Help = Field Help using PF2, ? or *)

**Action Line**

◆ **Vendor**: 11 digits Help
Enter a valid vendor identification number.

◆ **Tax Year**: 4 digits
Displays the calendar year for which you are reporting information to the IRS.
**Screen Information**

Sel: 1 character
Type “X” to select voucher, and advance to Screen 180.
Type “D” to delete.

Voucher: 7 digits
Displays associated voucher numbers for vendor.

Itm: 3 digits
Indicates the item number on the voucher.

FEI: 9 digits
Shows the Federal Employee Identification number assigned to the vendor.

FY: 4 digits
Displays the fiscal year in which voucher was created.

Amount: 13 digits
Shows the amount on the voucher.

IRS Ind: 1 character/digit
Identifies the type of 1099 payment.
Blank = Not Required
A = Crop Insurance (After 1997)
B = Excess Golden Parachute
C = Gross Proceeds Paid To Attorney
F = Foreign Indiv - 1042S Reportable
G = Form-G: Grants
I = Form INT: Interest
N = Not 1099 Reportable
0 = Crop Insurance (Code Before 1998)
1 = Rents
2 = Royalties
3 = Other Income
4 = Federal Income Tax Withheld
5 = Fishing Boat Proceeds
6 = Medical and Health Care Payments
7 = Form NEC: Nonemployee Compensation
8 = Substitute Payments for Interest

Description: 18 characters
Shows a description of the item.

Date Pd: 8 digits
Indicates the date voucher was paid.

**Additional Functions**

PF KEYS
See Appendix for explanation of standard PF keys.

Voucher: 7 digits
Displays the voucher number associated with the vendor.

Itm: 3 digits
Indicates the item number on the voucher.

FEI: 9 digits
Shows the Federal Employee Identification number assigned to the vendor.
Section III

W2 Inquiry and Maintenance
Screen 181 – Add/Modify/Delete W2 Record

W2 information is no longer entered in FAMIS; emoluments should be entered in Workday for these payments to be included on an employee’s W2. These payments will appear on the warnings section of the VBYYR202:

1. W2-Employees: This list will not trigger 1099s but should be reviewed to see if an emolument should be recorded in Workday to reflect a taxable payment to an employee.
2. Employees: Payments made to employees that are 1099 reportable. Since a 1099 should not be generated for an employee, an emolument should be entered in Workday for the payment amount, and the voucher should be marked “N” during the 1099 reporting editing cycle in January.

The following screens are still available in FAMIS, but no data is extracted from them.

Employees: Payments made to employees that are 1099 reportable. Since a 1099 should not be generated for an employee, an emolument should be entered in Workday for the payment amount, and the voucher should be marked “N” during the 1099 reporting editing cycle in January.

A voucher must pass both of the following criteria to be considered a reportable expense in the W2 process:

1. Voucher void/drop or state voucher void flag is not equal to “Y.”
2. Check date for local vouchers, or state voucher print date for state vouchers must be in the specified calendar year (11/01/96-10/31/97).

If a voucher does not meet the criteria, it is rejected and not considered reportable. If it passes, the object code on the voucher is compared against the Emoluments, Mileage, and Qualified Moving subcode tables on Screen 853, which were set up for that calendar year to determine whether the type of W2 is Automatic (A) or Manual (M). Only type “A” W2s are written to the extract file (VBYYR152).

Screen 181 is used as part of the Federal Government W2 reporting process. The information displayed is pulled from the voucher file according to the selection criteria that makes a payment reportable as a W2. The results of the edits made on Screen 181 will be sent to BPP to be combined with payroll W2 information. Each voucher should be reviewed to determine whether or not it should be sent on to BPP.

Once the W2 data has been extracted and loaded (VBYYR153) in the file, it can be accessed and edited using this screen. Edits made to the information on this screen do not change the information on the voucher file, only that which is reported to the IRS.
VBYR155 is used to report the W2 information after edits have been entered.

### Screen 181 – W2 Record Add/Modify/Delete (cont’d)

Delete (Y/N):

Note: This screen is used as part of the Federal Government W2 reporting process. The information displayed should be verified for accuracy. Correct any errors and supply missing information to avoid penalties. W2 vouchers selected should be paid within the calendar from November 1st through October 31st.

Basic Steps

- Type a **Voucher** number, **Item** number and **Fiscal Year** in the fields provided. To pull vouchers from Accounts Payable, type “Y” in the **Pull From AP** field and press <ENTER>.
- If the voucher is found, the appropriate fields will be filled in automatically. You must enter the dollar amount in the appropriate field: **Emolument Amt.**, **Mileage Amt.**, or **Qualified Moving Amt.**. **Only one amount should be filled in per voucher item.**
- Add, modify or delete the information as needed. Type an asterisk (*) in the **SSN** field to view a pop-up window that will allow you to search for the appropriate Social Security number. Type “X” next to a number to select it and pass the name and number back to Screen 181. If the record needs to be deleted, type “Y” in the **Delete** field.
- Press <ENTER> to record the information.

Field Descriptions (◆ = Required; Help = Field Help using PF2, ? or *)

**Action Line**

- **Voucher:**
  - 7 digits
  - Enter the number to be created, modified, or deleted.

- **Item:**
  - 3 digits
  - Enter the item number on the voucher to be edited.
  - The default is 1.

- **Fiscal Year:**
  - 4 digits
  - Indicate the fiscal year in which the voucher was paid. The default is the current fiscal year.

- **Pull from AP:**
  - 1 character
  - Type “Y” to pull data from the Accounts Payable database.
Screen Information

- **Tax Year:** 4 digits
  Shows the calendar year for which you are reporting information to the IRS.

- **Account:** 15 digits
  Enter the FAMIS account number from which the voucher item was paid.

- **Work Stat.:** 1 character
  Displays the payroll work station for the campus code. This will automatically be filled in when adding a record.

- **Dept Ref.:** 7 characters/digits
  Enter a departmental voucher reference number.

- **SSN:** 9 digits
  Enter the Social Security number or Tax Identification number.

- **Name:** 21 characters
  Type the name as it should appear on the W2 form.

- **Date Paid:** 8 digits
  Designate the payment date of the voucher.

- **Emolument Amt.:** 8 digits
  Include the dollar amount of the emolument.

- **Mileage Amt.:** 8 digits
  Indicate the dollar amount of mileage to be paid.

- **Qual. Moving Amt.:** 8 digits
  Enter the dollar amount qualified for moving expense.

- **Delete (Y/N):** 1 character
  Type “Y” to delete the W2 voucher record.

Additional Functions

**PF KEYS**
See Appendix for explanation of standard PF keys.
Screen 183 is used as part of the Federal Government W2 tax reporting process. The information shown is pulled from the voucher file according to the selection criteria which makes a payment reportable as a W2. Each voucher should be reviewed to determine whether or not the voucher should be sent on to BPP.

Once the W2 data has been extracted and loaded in the file it can be viewed and deleted with this screen. **Deletions made to the information on this screen do not change the information on the voucher file, only that which is reported to the IRS.**

### Basic Steps
- Enter a Social Security number in the **SSN** field and **Tax Year** from which vouchers would have been pulled, and press <ENTER>. If the Social Security Number is not known, you may type an asterisk (*) in this field to view a pop-up window to search for a person by name. Type “X” next to the selected name to pass the correct SSN back to this field.
- If records exist for the individual selected, a list of vouchers will be displayed. If not, the system will respond with “No vouchers found.”
- To select a voucher, type “X” in the **Sel** (Select) field and press <ENTER> to view the information on Screen 181.

### Delete Record
- To delete records from the file, type “D” in the **Sel** (Select) field and press <ENTER>. Multiple records may be marked for deletion. A pop-up window will appear to confirm the deletion(s). Press <ENTER> to record.
Field Descriptions (◆ = Required; Help = Field Help using PF2, ? or *)

**Action Line**

◆ SSN: 9 digits **Help**
Enter a valid Social Security number to view vouchers paid for the specified Social Security number.

◆ Tax Year: 4 digits
Enter the tax year to be viewed.

**Screen Information**

Sel: 1 character
Type an “X” to select an item and advance to Screen 181.
Type “D” to delete.

Voucher: 7 digits
Displays the voucher number.

Itm: 3 digits
Designates the item number on the voucher.

Emolument: 6 digits
Shows the amount of the emolument.

Mileage: 6 digits
Indicates the mileage to be paid.

Qualified Moving: 6 digits
Displays the amount qualified for moving expense.

Dept. Ref.: 7 characters/digits
Shows the departmental reference indicator.

Date Paid: 8 digits
Designates the payment date.

FY: 4 digits
Indicates the fiscal year in which the voucher was paid.

Section IV
Appendix
Instructions

Listed below are general instructions that will make your job easier as you use FAMIS to input or view document information. Please become familiar with the information in this reference as it can make your navigation in FAMIS more efficient.

3270 Emulation Keys

Special keys and key combinations must be used when working with FAMIS. These keys are known as 3270 emulation keys and may be defined differently by each 3270 terminal or PC emulation software that you are using. Contact your computer support person if you do not know how to identify the following keys on your computer.

**PF Keys**
When a key is listed as **PFn**, “PF” represents Program Function. Many PCs use the function keys labeled **Fn** for these PF keys. Others have special combinations of keys to represent the PF keys, for example, on a Memorex emulation, a combination of the ALT key and the number 1 will represent the **PF1** key.

At the bottom of the FAMIS screens, there are PF keys listed that can assist in the use of the screen. For example, at the bottom of *Screen 164* (Voucher Inquiry by PO Number) there is a **PF11** key with the word “Right” under it. This means that by pressing the **PF11** key, the screen listing will scroll to the right for an additional panel of information.

**TAB and BACKTAB Keys**
Use the **TAB** and **BACKTAB** keys on a 3270 terminal to move from field to field. This will position the cursor at the start of each field. Most PCs have a key labeled TAB, while the BACKTAB is a combination of the SHIFT/TAB keys.

Using the arrow keys, instead of the TAB keys, to move around the screen may lock the computer keyboard. Use the **RESET** key, then the **TAB** key, to position the cursor and unlock the keyboard.

**CLEAR Key**
The **CLEAR** key on many PC keyboards is the **PAUSE** key. This key is often used to clear, or refresh, the screen before typing.

**RESET Key**
After pressing <ENTER> to process data information, note the status bar at the bottom of the screen. When the system is processing information, the symbol "X ()" or hour glass icon (⌛) will appear. You cannot enter additional information until the system is finished processing. If any other symbols appear, press your **RESET** key -- often the **ESCAPE** key on a PC.
ERASE END OF FIELD Key

To erase all the information in a field with one stroke, the ERASE EOF key on a 3270 keyboard is helpful. For example, a vendor name is held in context when moving from screen to screen. To change to a different vendor, use this key and the current vendor name on the Action Line will be removed. Now the new vendor name can be input. On most PCs, the correct key to use is the END key on the numeric keypad.

HOME Key

From anywhere on the screen, the most efficient way to take the cursor back to the Screen field on the Action Line is by pressing certain keys. For the 3270 terminals, the correct combination is the ALT/RULE keys. On most PCs, the HOME key on the numeric keypad will work.

Protected Area

The Protected Area is the area of the screen that will not allow the user to enter information. Typing information in the protected area may freeze the screen. Use your reset key and then tab key to release your system when it freezes.

Action Line/Context

The Action Line is usually the first line of information on each screen. The Screen field is used to navigate from screen to screen by entering the number of the screen desired. Fields such as screen, vendor, voucher number, account, etc. are often found on the Action Line.

Data that is entered on the Action Line will be carried in “context” from screen to screen until changed. For example, the GL account number 032365 is entered on the Action Line of the screen below. That account will be carried in “context” until the user keys a different account in the field.

The <ENTER> key must be pressed after entering Action Line data. If a user does not follow this step, all information entered on the screen may be lost and must be re-entered. After pressing <ENTER>, a message will be given at the top of the screen asking for modifications or providing further processing instructions.

<table>
<thead>
<tr>
<th>F0002 Record has been successfully added</th>

</tr>
</tbody>
</table>
Appendix – Instructions (cont’d)

Message Line

The line above the Action Line is used to display messages to the user. These messages may be error messages or processing messages, such as the one below.

```
F6537 Please enter a valid six digit GL account
002 GL 6 Digit                                               11/16/10
10:47
```

Scrolling Through Data

Pressing <ENTER> will scroll through information listed on a screen. On some screens, there are PF keys to use to scroll forward, backward, left and right. These PF keys are displayed at the bottom on the screens with that function.

Help

HELP functions are available for many screen fields in FAMIS. Tying a question mark (?) in the blank beside the desired field and pressing <ENTER> will access a pop-up window with specified field information. Another way is to place your cursor in the desired field and press PF2.

To get out of the HELP function, either select a value and press <ENTER> or press PF4. The distinction on which key to use will normally be designated in the pop-up window (EX: PF4 = Exit).

Escaping from a Pop-Up Window

When in a pop-up window, pressing PF4 will usually take you back to the original screen. There are a few screens when pressing <ENTER> will take you back to the original screen.
Field Help Using the PF2 Program Function Key

On selected fields, additional information can be displayed using the PF2 key. This HELP information is accessed by moving the cursor to the field in question and pressing PF2.

For example, place the cursor in the **Year-end Process** field and press PF2. The first screen displayed explains the purpose of the field. Sometimes you will be shown the values immediately, without a definition or explanation.

**Screen 2 – GL 6 Digit**

Question Mark (?) or Asterisk (*) Help

FAMIS has a Help feature on some screen fields that will display a field definition and/or values that may be entered.

To use the Help feature, type a question mark (?) or asterisk (*) in the field and press <ENTER>. If Help is available for the field, a pop-up window will appear displaying a definition and/or valid values. To make a selection, type an “X” next to a value and press <ENTER> to pass it back to the previous screen. This is called the “Passback” feature.

+----------------------------------------------------------+
PF keys are used in the FAMIS modules to access additional information. Wherever possible the same assignment has been given to the same PF key, such as PF9 always being the key used for NOTES. Occasionally this has not been possible and a different assignment has been made.

The following list should help you identify the functionality behind the PF keys that you will see on the many screens in FAMIS.

Many screens have extended information windows assigned to various function keys that are designated at the bottom of each screen or pop-up window. Placing the cursor (using the cursor arrow keys) on a particular line and pressing the extended information function key will display the pop-up window information for the document or item on that line.

To exit a pop-up window, press <PF4> to return to the previous window or inquiry screen. If multiple windows have been opened pressing <PF3> will return you directly to the screen where you started.

From within many of the pop-up window an additional set of extended function keys may appear to further inquire on the document or item.
