Subject: New course: Universal Waste Management

Date: Friday, December 14, 2012 12:14:49 PM

Dear A&M System Training Coordinators,

I am pleased to announce the availability of a new online course in TrainTraq: *Universal Waste Management* (course no. 2111791). This course was developed in conjunction with Gordon Evans in the A&M System Office of Safety. The course will be activated on Tuesday, December 18th.

The Universal Waste Management course covers the following topics: 1) general definition of Universal Waste (UW); 2) rules governing UW; 3) specific types of UW and how to tell the difference; 4) requirements for managing UW; 5) steps for responding to a spill or breakage; and 6) where to go for more information. It also provides a link to the A&M System's Universal Waste Management Program document.

This course will not be a System requirement, but you may choose to require it based on the individual strategic goals and initiatives of your System member. Please work with your Environmental Health & Safety Office to determine who (if anyone) needs to be assigned this course. If you need to develop assignment rules, please contact me (phsieh@tamu.edu, 979-845-0077).

Thanks,

Pat
