

From: [Mizer, Lesley A](#)
Subject: Revised Information Security Awareness course available on August 8
Date: Friday, July 29, 2016 3:57:19 PM

Dear A&M System Training Coordinators,

The System-required course, Information Security Awareness (no. 3001), has been revised with new content provided by The Texas A&M System Information Security Officers Working Group and System Enterprise Applications. The updated course will be made available in TrainTraq on Monday, August 8, 2016. The new content addresses two-factor authentication, insider threats and The Texas A&M System Member Data Use Agreement.

Note that because of the extent of the revisions, it is likely that employees who have started but not yet completed the course at the time of the update will experience issues when they try to access the course again. The remedy is to clear the browser history and restart the course.

All applicable assignment rules are still in effect and all course reports will remain the same. If you have any questions regarding the changes made to this course, please contact Lesley Mizer (lmizer@tamu.edu, 979.845.0083).

Sincerely,
Lesley
